Abstract:

A moving vehicle e.g. bus displaces air which returns into the bus initiating air circulation/ air currents by displacement concept; hence for e.g. water spilt outside from running bus, splashes back into the running bus carried by the air circulation

Similarly in this God ordained Universe celestial objects /planets in the solar system by rotation, revolution along their orbits, results in displacement of their atmosphere with their gases creating circulation to return on the planets surface effecting gravity proportional to their individual mass; probably the displaced gases of the solar system's planets revolving in their orbits-converges towards the centre with ignition in the centre as ball of gases-Sun

This Displacement concept existing in creation could have been configured into miniature solar system with their scaled down orbital data, displaced gases converging in the centre to produce energy, [with ignition]-siphoned / controlled to energise/propel locomotion/ flying/ lighting [nth distant probability made possible with Engineering technology, Science-prior to era of contraception, abortion]

Displacement concept enables to comprehend -after the era of contraception/abortion with consequent environmental blood pollution depleting ozone, [evidenced by rising environmental Oestrogen, alpha foetoprotein, beta human chorionic gonadotropin]combined with documented [as below] toxic, explosive /inflammable gases eg. hydrogen sulphide accumulate in the environment, get displaced towards the sun by earth's rotation/ revolution in the orbit, resulting in geomagnetic storms, solar tsunami, destroyed satellites, inevitable, innumerable Ecological disasters.

Documentation of hydrogen sulphide in red Sea depths-evidences-putrefaction of innumerable aborted fetuses; putrefaction of enormously shed endometrial [necrotic] tissue with menstrual blood pollution [one child policy/ small family norms/ planned parenthood]; putrefaction of millions of bodies of young parents embracing 5 fold increased mortality, by 275% increased morbidity, consequent to global contraception, abortion— emanates toxic, inflammable, explosive gases namely hydrogen sulphide, ammonia to the global environment [air, water, soil, underneath earths surface] with consequent, inevitable, ecological disasters including-geomagnetic storms-destroying satellites-resultant ensuing destruction to information technology, coronal mass ejections-resultant black spots in sun, anticipated black outs, weakened earth's magnet, red river ways, blood moon, land subsidence, [widening cracks in soil, roads, houses, leading to collapse of buildings, can bury lives, sinking towns;] global corona pandemics, emerging, increasing drug resistant microbial epidemics eg. Ebola, H1N1 making polyvalent vaccines only 40% effective, locusts, spontaneous combustion in the skies, forest fire, land fire, oil tanker vessel fire, oil fire, eruption of ring of fire, volcanoes, earth quakes, tsunami, solar tsunami, land slides/ mountain slides, avalanches, increasing lightning strikes, tornadoes, fish spout, encircling stunned fish/ants/ animals/ stunned ravens/birds, flash floods, cyclones, hail storms, snow storms, glaciers of ice melting including Greenland's glaciers, resultant envisioning for eg.Himalayas' peaks global warming, global hypoxia, blizzards, Ozone depletion, disappearing birds/ islands/ grapes/ animals/ water-living, mortality by toxic fumes to well diggers/miners/septic tank cleaners, blood polluted air inhalation, blood polluted bitter water ingestion - resultant increasing lung cancer, endobronchial tuberculosis, Chronic obstructive lung disease, global recession, difficulty in aviation, destroyed space stations, decreased social security, increased remote controlled non nuclear robotic wars, remote controlled Unmanned Air Vehicles [drones] mediated robbery, artillery, missiles, intercontinental ballistic missiles made possible by annihilating 95% of human race with their trillions

of interferences by mobile communication/ voices/ existence, frequent visiting of blood feeding animals to foothill townships, famine, drought

Key Words: Displacement concept, putrefaction of innumerable aborted foetuses, toxic explosive, inflammable gases, Hydrogen sulphide in Red Sea

Date of Submission: 14-01-2023

Date of Acceptance: 29-01-2023

I. Introduction:

When a vehicle [bus, car] starts moving it displaces air, which comes back on to the vehicle as air circulation/breeze; for e.g. when we spill water[for washing hands] from a running bus with open windows or throw a tissue paper from a running bus, with open windows, this phenomenon of ‘displaced air circulating back’ can be witnessed to see the water coming inside splashing on to behind seats, paper also needs a force to make it fall to the ground, or rather paper flies along for a distance before the paper drops down, highlighting ‘Concept of Displacement’ initiated by movement of objects, sets up air currents/air circulation

II. Materials and Methods:

Figure 1: Planets Orbital Inclination [Reference :1]

* Negative values of rotation period indicate that the planet rotates in the direction opposite to that in which it orbits the Sun. This is called retrograde rotation.

The semimajor axis (the average distance to the Sun) is given in units of the Earth's average distance to the Sun, which is called [an AU](#). For example, Neptune is 30 times more distant from the Sun than the Earth, on average. Orbital periods are also given in units of the Earth's orbital period, which is a year.

The [eccentricity](#) (e) is a number which measures how [elliptical](#) orbits are. If e = 0, the orbit is a circle. Most of the planets have eccentricities close to 0, so they must have orbits which are nearly circular.

Last modified October 9, 2008 by [Randy Russell](#).

The planets of our Solar system, with their orbital distances from sun, inclination angles are depicted in the Figures 1,2 [1] and the orbital data [2]

Displacement concept (before the era of contraception, abortion) enables to ponder to comprehend a probable [nth distant probability with engineering science technology]—a miniature solar system with nine planets, dwarf planets [globes simulating with without magnet, mini objects] battery initiated to operate/ rotate and revolve in their elliptical circuits-as scaled down proportionate to actual solar system's orbital data in mini/tiny units, representing our solar system, could have resulted in displaced gases accumulating/ converging in the centre of miniature solar system, with ignitable energy- siphoned/routed with control to propel locomotion/ flying/ lighting could have been considered

Researchers discover lethal brine pool in the Red Sea

The brine pool that kills anything that swims into it contains three to eight times as much saline as the ocean around it

Brine pools contain toxic chemicals like hydrogen sulphide - making them extremely deadly (Source: Rosenstiel School of Marine and Atmospheric Science, University of Miami)

Figure 3: Lethal Brine pool with Toxin-Hydrogen Sulphide in the Red Sea Reference 3

Researchers discovered lethal Brine pool with Toxin Hydrogen sulphide in Red Sea [3] *Figure 3*

Lethal pool that kills anything that swims into it discovered at Red Sea

Figure 4: Lethal pool in Red Sea containing Hydrogen Sulphide Reference 4

A 10-foot long brine pool has been discovered at the bottom of the Red Sea that can stunor kill animals and even pickle them alive. While an underwater pool with a 100 percent kill rate might sound horrific *Figure 4*

Scientists from the University of Miami have discovered a brine pool that can immediately kill or stun anything that swims into it. The pool was discovered at the bottom of the Red Sea at a depth of 1,770m. [4]

Displacement concept operating in the universe enables comprehension of-after the era of contraception /abortion-consequent documented environmental blood pollution-depleting ozone envelope (evidenced by documented rising environmental Oestrogen, Alpha foetoprotein, beta human chorionic gonadotropin)combined with documented [as above-lethal brine pools with hydrogen sulphide] detrimental rise in environmental accumulation of toxic, explosive, inflammable gases for e.g.. hydrogen sulphide, ammonia, *get displaced* by the Earth's orbital revolution/rotation, converges towards centre-Sun, with resultant inevitable innumerable ecological disasters, including, coronal mass ejections with ensuing black spots in the sun, geomagnetic storms, solar tsunamis, destroying space stations, information technology

III. Discussion:

Hitherto applying 'Concept of Displacement' [existing in creation] to rotation, revolution of Celestial objects- Planets in our Solar system, the atmosphere in which their orbit exists, gets displaced, with resultant air circulation, to come back on its surface to effect Gravity; for e.g.. earth displaces 6 times more quantum of atmosphere to return on its surface as 6 times more gravity than lunar surface; it comes to mass and density, the greater these are for a celestial object, the higher its gravity, consequent to higher displaced quantum of atmosphere; since the moon has about 0.0123 the mass [5] of earth and 0.606 its density, it has roughly 15% of its gravity[1/6].

Much the same is true of Mars and mercury. Mars has 0.107 times Earth's mass and roughly 0.713 its density, which works out to it having 37.6% times Earth's gravity.

Mercury is smaller, but is more massive [0.055 Earth's] and almost as dense as earth. Therefore its surface gravity is higher, at 38% that of Earth's gravity.

The atmosphere is an ocean of these gases. It consists of 78% nitrogen, 21% oxygen and 1% other gases and water vapour. [6]

When all the nine planets are rotating, revolving in their elliptical orbits as the Author of the Universe has ordained them, *the displacement of their atmospheres with their gases*, specially Earth being closer to the sun with a bigger mass than Mercury, Venus, *resultant Sun-collection of displaced and converging gases by the planets revolving in their orbits, to the centre of Solar system with other constituting gases- ignition, lighting the earth, with associated solar radiation, layer of ozone [oxygen] stratosphere to shield the earth.* Displacement concept [7] enables us to comprehend Earth and heaven were created in the beginning, later on the fourth day, Author of Universe uttered the Sun to existence.

Displacement concept enables us to ponder to comprehend a probable [nth distant probability with engineering science technology-prior to era of contraception, abortion]—a miniature solar system with nine planets, dwarf planets [globe simulating with without magnet, mini objects] battery initiated to operate/ rotate and revolve in their elliptical circuits-as scaled down proportionate to actual solar system's orbital data in mini/tiny units, representing solar system, can result in displaced gases accumulating/ converging in the centre of miniature solar system, with ignitable energy -could have been siphoned/ routed with control to propel locomotion/ flying/lighting could have been considered

The ozone layer or ozone shield is a region of Earth's stratosphere that absorbs most of the Sun's ultraviolet radiation. It contains a high concentration of ozone (O₃) in relation to other parts of the atmosphere, although still small in relation to other gases in the stratosphere. The ozone layer contains less than 10 parts per million of ozone, while the average ozone concentration in Earth's atmosphere as a whole is about 0.3 parts per million. The ozone layer is mainly found [8] in the lower portion of the stratosphere, from approximately 15 to 35 kilometers (9 to 22 mi) above Earth, although its thickness varies seasonally and geographically.

After the era of contraception abortion, ozone depletion by environmental blood pollution, [evidenced by rising environmental Oestrogen, alpha foeto protein, beta human chorionic gonadotropin] combined with documented toxic, explosive, inflammable gases e.g. hydrogen sulphide accumulate in environment; when environmental toxic, inflammable, explosive gases e.g. ammonia, hydrogen sulphide get displaced by earths orbital revolution, converge towards sun, consequent geomagnetic storms, coronal mass ejections, solar tsunami, inevitable ecological disasters ensue Conventional wisdom has held that eruptions of toxic hydrogen sulphide that occur from time to time in the Atlantic ocean off southwestern Africa were rather isolated near-coastal features, limited both in extent and in ecosystem-scale consequences. Now, however, it has become possible to identify sulphide outbreaks by satellite remote sensing.[9]

This new capability appears to lead to a complete revision of the conventional view, with some eruption episodes being observed to affect areas of ocean surface exceeding 20,000 km². The occurrences are also seen to be more frequent and longer lasting than previously supposed. Example sequences of Sea-viewing Wide Field of View (SeaWiFS) images are presented to indicate general classes of eruption types that are observed and to support discussion of potential eruption mechanisms.

Arbaeen (AR) and Reayat Alshabab (RA) are two shallow lagoons in Jeddah lying on the Red Sea coast. Salinity, dissolved oxygen, hydrogen sulphide (H₂S) and Secchi transparency depth as well as bottom topography of the two lagoons are studied . The results reveal that each lagoon is a fjord like estuary hosting a dammed anoxia and hypersaline water behind the sills covered by a surface brackish water. This water, augmented by entrained water, is freely flowing outside the lagoon and is compensated by a countercurrent of Red Sea water at mid depth (2 m). The brackish water is a seawater mixed with non-saline water discharged from [10] Jeddah sewage treatment plants. Periodic inflow of Red Sea waters into the lagoons frequently occurs but it is not sufficient to replace all the old, dense and euxinic resident waters and (0 stop the evasion of malodorous H₂S-gas, source of people complaint.)

Furthermore, a high concentration of hydrogen sulphide, an extremely toxic gas, lies **dormant** in the deepest layers [11] of the Black Sea 01-Sept-2016 black sea has lost more than a third of its habitable volume

The Black Sea is a unique sea. Its water contains hydrogen sulphide (H₂S). The Black Sea is the world's largest water body containing H₂S and its hydrogen sulphide layer begins about 200 meters below the surface. H₂S potential in the Black Sea is investigated as a source of hydrogen. The total sulphide pool in the [12] Black Sea is believed to be around 4.6×10^9 tons. H₂S, an acid gas, is generally considered to be an environmental pollutant.

The Black Sea hydrogen sulphide inventory [13] is about 4600×10^{12} g, which makes this sea the largest anoxic basin on earth.

Intensities of biogeochemical (microbial) processes of methane production and methane oxidation were determined in bottom sediments and water column of the Black Sea. Aerobic bacterial oxidation of methane is confined to the upper 20-30 cm of Holocene bottom sediments of the shelf (0.7-259 ng C/(dm³ day)) and oxygenated waters (0.2-45 ng C/(dm³ day)). In reduced sediments of the deep-sea zone and in the hydrogen sulfide-containing water column, considerable intensities of anaerobic methane oxidation were recorded, comparable to or exceeding the intensities [14] of methane oxidation in oxygenated layers. From one fourth to one half of the methane formed in bottom sediments was oxidized immediately therein. The major part of the remaining methane was oxidized in the water column, and a smaller portion arrived in the atmosphere.

In 1990 concern for disappearance of fish was observed, it was predicted by 2005, 90% of fish would have disappeared, by 2048, 98% of sea food would have disappeared, by 2050 many islands would have disappeared; hence an International study of four major rivers of Australia, United States of America, United Kingdom to identify pollutant in waters was undertaken by Dr. Susan Jobling of Brunel University of United Kingdom.

Dr. Susan Jobling of Brunel University of United [15] Kingdom discovered *Oestrogenic compounds` increase in waters by 1996.*

In 1997 Professor Paul Devroey discovered *that increasing oestrogen like particles were detected as [16] pollutant in the air*

863,000,000 reported [17] surgical abortions from 1922-2010; 37,500,000 reported surgical abortions per year. 1989, 375,754 women of reproductive age group are liable to menstruate 200 months more, by small family norms, one child policy /contraception;with their shed endometrial necrotic tissue and blood pollution to atmosphere

In 2005 London Times news paper Headlines read 'Are we drowning in our own oestrogen; 2011 first half of March Japan [pacific ocean]had earthquake with Tsunami, second half of March 2011-lakhs and lakhs of fish were washed ashore dead in [pacific ocean]California; scientists could confirm its not due to oil leak or nuclear leak of Japan's tsunami but Unknown hypoxia

2011, Information from the West mentioned, four Heifer's breast started engorging, the veterinarian found out, by analysing the waters, of the streams wherein the animals were fed, contained high levels of oestrogen; the probable reason being, 1km.ahead sewage was draining, into the stream [18] containing menstrual blood, aborted blood; without knowing all these details, the owner of the Heifers, drew water from his wells and fed the animals, and the breasts returned to normalcy in a few months.

2012 in India, some wild elephants which had come down from the virgin forest, to drink water from the streams, close by dams, peoples lodgings, to eat sugarcane, were noticed to have engorged breasts-newspaper reported –probably oestrogen increase in water,

2015-Text books in India mentioned Oestrogen as Pollutant

Oestrogen is secreted directly into the blood, circulates in the blood, bathes, nurtures, maintains, enables differentiation, regeneration of each cell [cell metabolism] oestrogen surveillance guards the cell from neoplasm, oestrogen governs secondary sexual dimorphism, -thereby prevents cylindrical obesity and disappears from blood once its metabolised.

Unless blood is shed oestrogen cannot reach the [19] environment as pollutant; 863,000,000 reported surgical abortions till 2010; World Health Organisation reported 37,500,000 reported surgical abortions per year in the globe; 498 abortions/minute.

$498 \text{ reported surgical abortions/minute} \times 60 \text{ minutes} \times 24 \text{ hours} \times 365 \text{ days} \times 50-80 [1922-2010] \text{ years} \times 350 \text{ ml-1000ml minimum blood loss/abortion} \times 4200 \text{ pg of oestrogen/ml of aborted blood} = \text{Environmental pollutant} = \text{oestrogen};$

When a mother is blessed with ~ 10 children, mother will not menstruate for ~20years or ~200 months during lactation and pregnancy; with contraception/one child policy/small family norms menstrual frequency increases to ~200months/mother $\times 1989,375,754 \text{ women of reproductive age group} \times 350 \text{ ml menstrual blood loss} \times 300 \text{ p.g of oestrogen/ml of menstrual blood} = \text{environmental pollutant} = \text{oestrogen};$ contraception equals to abortion at 1\2 cell, uni, bi, multi cell levels.

Our analysis of sea, river waters detected oestrogen [maternal /foetal/placental blood] alpha foeto protein, [foetal blood representation] β Human chorionic gonadotropins [placental blood representation] confirming further, aborted and contraceptive menstrual blood pollution of the environment

Oestrogen was detected in river water- 3-5 pg/ml and sea water - 0.3 -1 pg/ml. Alpha foeto protein [20] was detected in sea, river water as 0.6 ng/ml, β human chorionic gonado tropin was detected in sea and river water as 0.1 mIU/ml confirming further, aborted blood pollution of the sea, river. And it was more in the rivers getting diluted in the oceans. Hemoglobin could not be detected in the water samples, since the equipment could detect only in grams, unlike, oestrogen estimation in pictogram.

Toxic, explosive, inflammable gases namely hydrogen sulphide, ammonia are produced by

- (a)Putrefaction of innumerable aborted fetuses, with their necrotic foetal tissue, placental tissue, maternal tissue [21] -global abortions-

- (b)putrefaction of enormously shed necrotic endometrial tissue with menstrual blood, consequent to planned parenthood, one child policy, small family norms-wherein a mother is liable to menstruate for >200 months-global contraception ie if a mother is blessed with many children as God ordained [Earth Bus Fare Norms] say e.g.10 children, she'll not menstruate for minimum of 200 months during pregnancy and lactation

- (c)Putrefaction of bodies of millions of young parents practising contraception, abortionembracing early demise -5-6 fold increase in mortality -as seen in Figure 5

secondary to unaware, wanton destruction of germ cells, foetal cells, placental cells, maternal tissue, agonisingly reduced endogenous oestrogen, androgen [22] impaired cell metabolism, defaulted genomic repertoire resultant 275% increase in degenerative, neoplastic, autoimmune, infectious diseases-as depicted in Figures 6, 7, 8 ,9,10,11,12

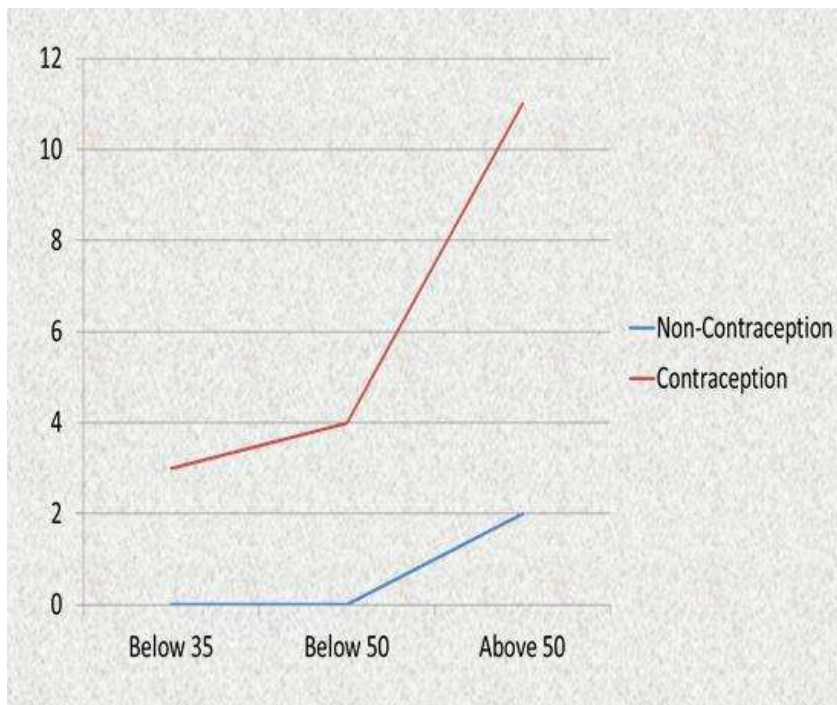

Figure 5: Increase in Prevalence of Mortality Consequent to Global Contraception, Abortion Reference 41

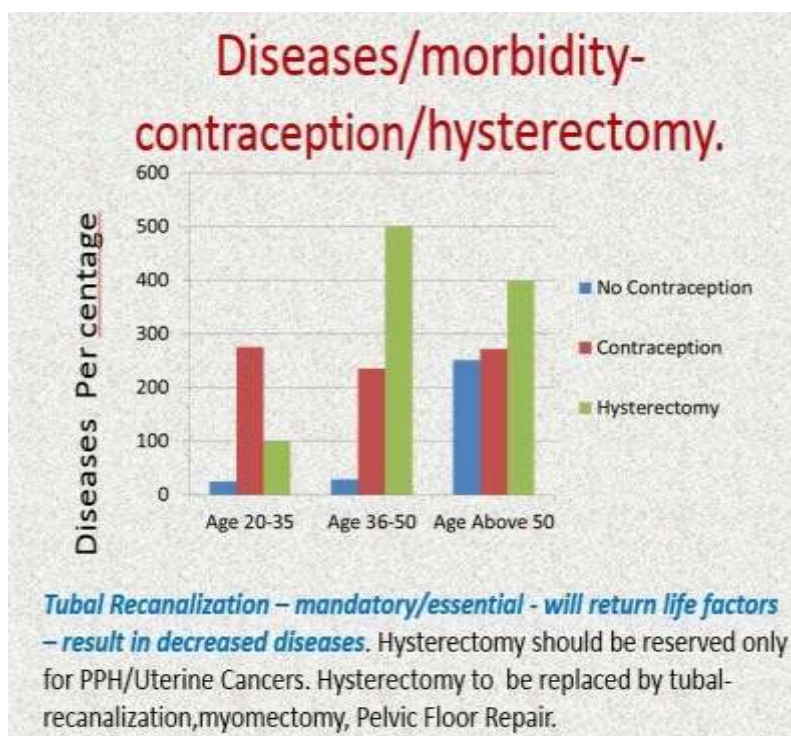

Figure 6: Increased prevalence of Diseases consequent to Contraception, Post operative Hysterectomy status Reference 41

275% increased diseases after Contraception, 500% increased diseases after Hysterectomy status as seen in Figure 6

Figure

7: Increased Morbidity in both parents practising contraception [Reference :41]

Both partners who were using contraception had diseases including diabetes mellitus, hypertension-

Figure 8: Low Endogenous oestrogen Status, Contraception [Reference 22]

Endogenous oestrogen was grossly reduced to ~5 - 8 p.g in 75% of people using contraception: in 20 to <50 years age group; after hysterectomy oestrogen had reduced to as low as 0.4 p.g, suggesting endogenous Oestrogen, androgen surveillance dependent cell-genomic repertoire, differentiation followed by controlled Multiplication of cell cycle, cell metabolism defaults, leading to increased incidence of degenerative diseases including diabetes mellitus, systemic hypertension; any form of contraception results in smashed fragmentation of germ cells leading to this decrease in endogenous hormones.

Degenerative Diseases with Contraception at young age.

Figure 9: Prevalence of Diseases in age group-20-35 years, Contraception Reference 41

Age Group: 36-50

Figure 10: Diseases prevalent in Age group 36-50 years, contraception Reference 41

Figure 11: Prevalent Disease in age group >50 years, contraception Reference 41

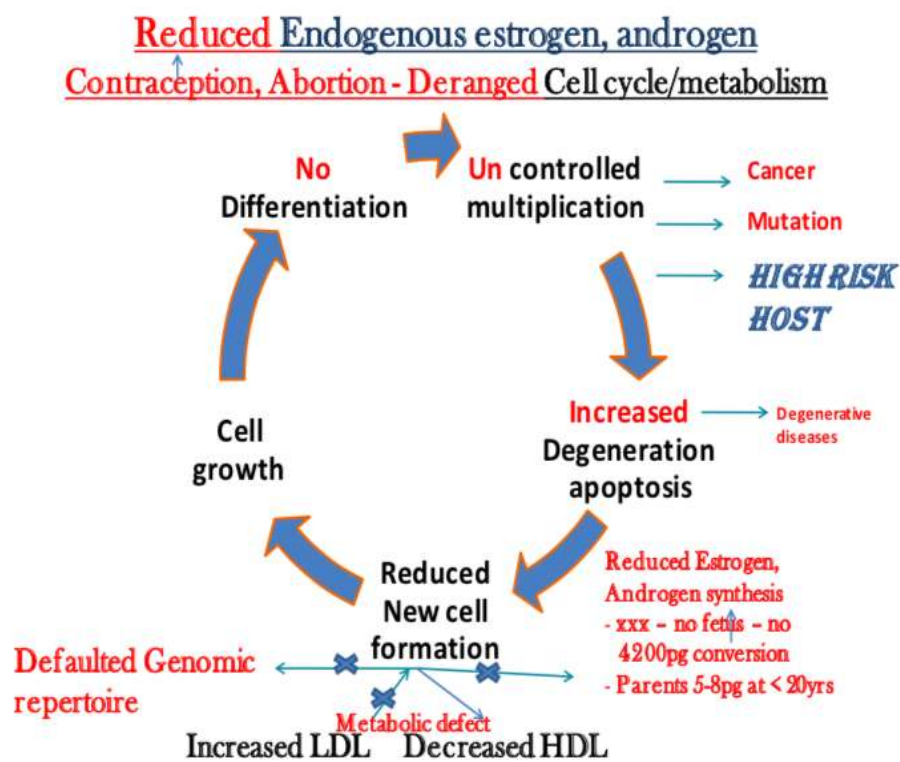

Figure 12: Impaired Cell metabolism, defaulted Genomic Repertoire, reduced endogenous oestrogen, androgen status, contraception, abortion Reference 41

Figure 13:Prevalence of Infectious Diseases , Contraception, abortion,- Blood Pollution Reference 22
 Ebola virus has emerged and microbial epidemics, drug resistance are increasing from 1976 secondary to the increasing global aborted blood pollution, increasing global contraceptive menstrual blood pollution *Figure 13*

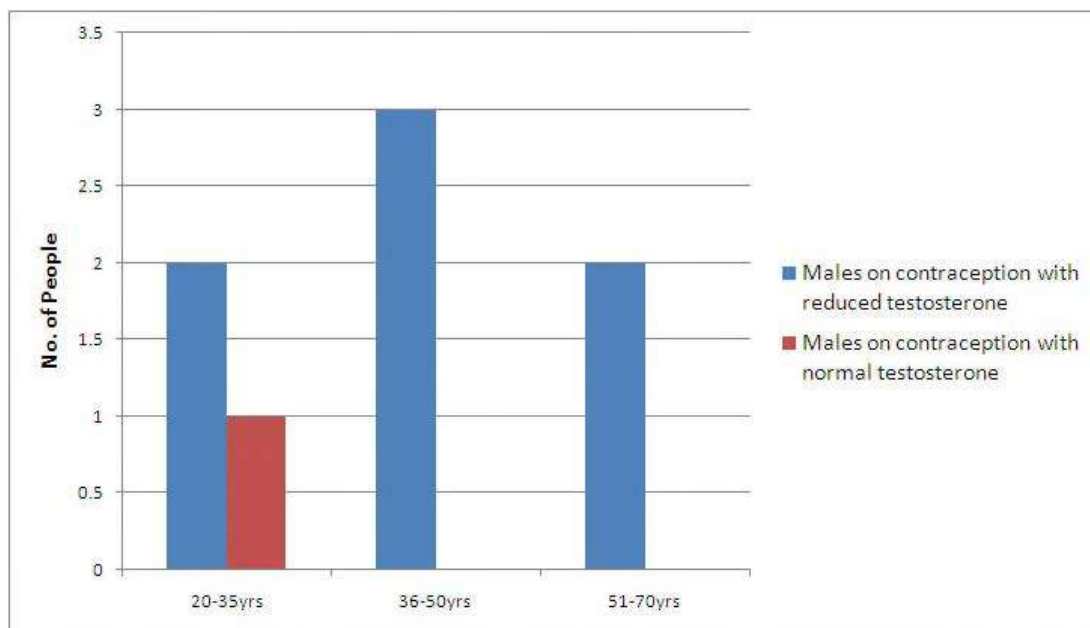

Figure 14:Prevalence of reduced testosterone in male partners, on contraception Reference 22
 Endogenous plasma testosterone levels showed significant decrease in 66.6% [$p < 0.0005$] of male partners of contraception users [e.g. wives had undergone tubectomy, wearing Copper T, had undergone Medical termination of pregnancy..] aged 20-35 years and 100% showed significant decrease among male contraception users aged >36years to >50years [$p < 0.0005$] *Figure 14*

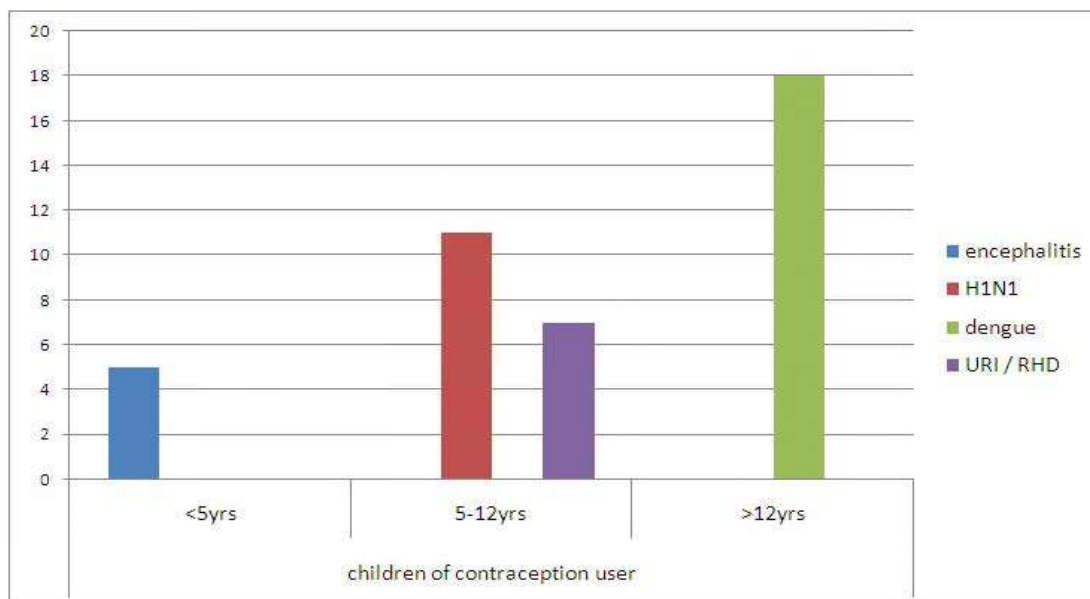

Figure 15: Increased prevalence of serious infections in children of contraception users Reference 22

5 fold increase in encephalitis was seen among <5years [p<0.0005], 7 fold increase in rheumatic fever [p<0.0005] and 11 fold increase in H1N1 [p<0.0005] were seen among 5-12 years; 18 fold increase in dengue [0.0005] was seen among 12-18 years children born to contraception users with few siblings and 200 months more of menstrual blood pollution within the household. All the children's parents were [22] contraception users with absolute significance. *Figure 15*

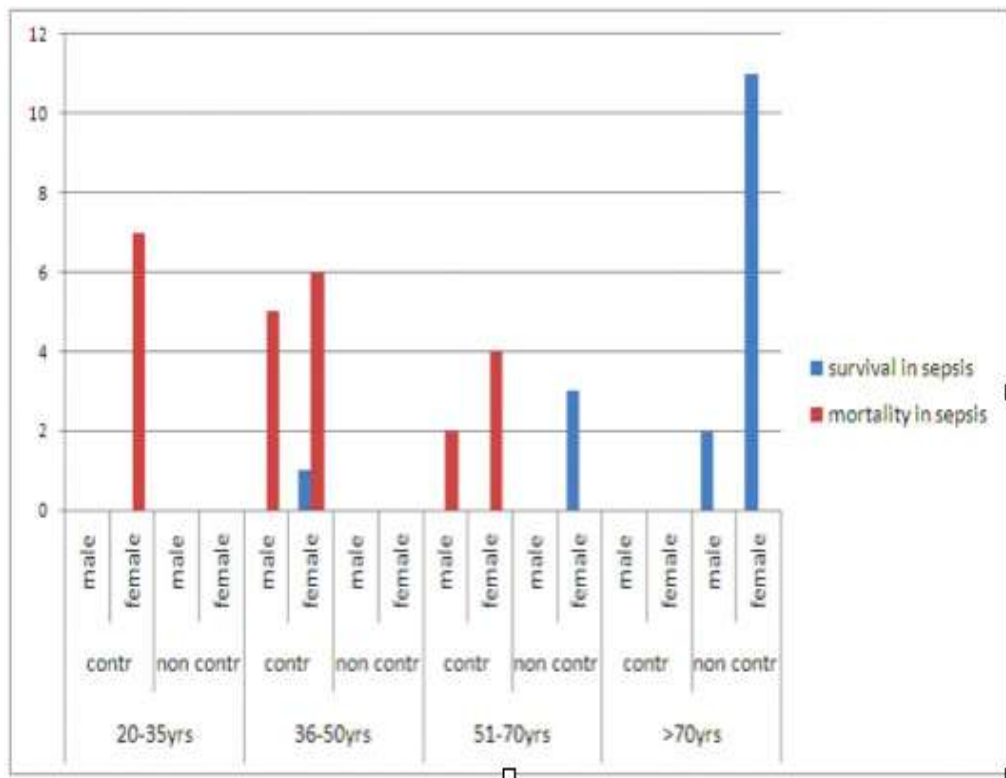

Figure 16 Survival in sepsis among contraception, non-contraception users Reference 22

Contraception users with sepsis showed 7 fold increase in mortality among 20-35 years [$p<0.0005$]; 11 fold increased mortality among 36-50years [$p<0.0005$]and 6 fold increase in mortality among 51 - 70years; whereas 12 fold survival in severe sepsis was seen in non contraception users among >70 years [$p<0.0005$] *Figure 16*.

Figure17:Respiratory diseases – Prevalence – 1989 to 2012-clinical practice Reference 23

Contraception with aborted blood, menstrual blood polluted environment has led to epidemic of Lung Cancer Environmental oestrogen rise suggests, innocent aborted blood, contraceptive menstrual blood pollution in waters, air, for inhalation, ingestion [obnoxious exogenous stimuli]. Innocent blood polluted air favours flourishing growth of multi drug resistant tuberculosis, virulent organisms including H1N1 Mosquito borne diseases including filariasis, resultant eosinophilia, restrictive, obstructive lung pathologies, and asthma are favoured by innocent aborted blood pollution of the environment. Lung cancer was seen as [23] 5 fold increase in 20-35 years age in smokers on contraception, whereas 3 fold increase in cancer in smokers without contraception. No contraception, *Figure 17*contraception; [people on contraception had seen early demise]; of them smokers had minimal increase in chronic obstructive pulmonary disease.

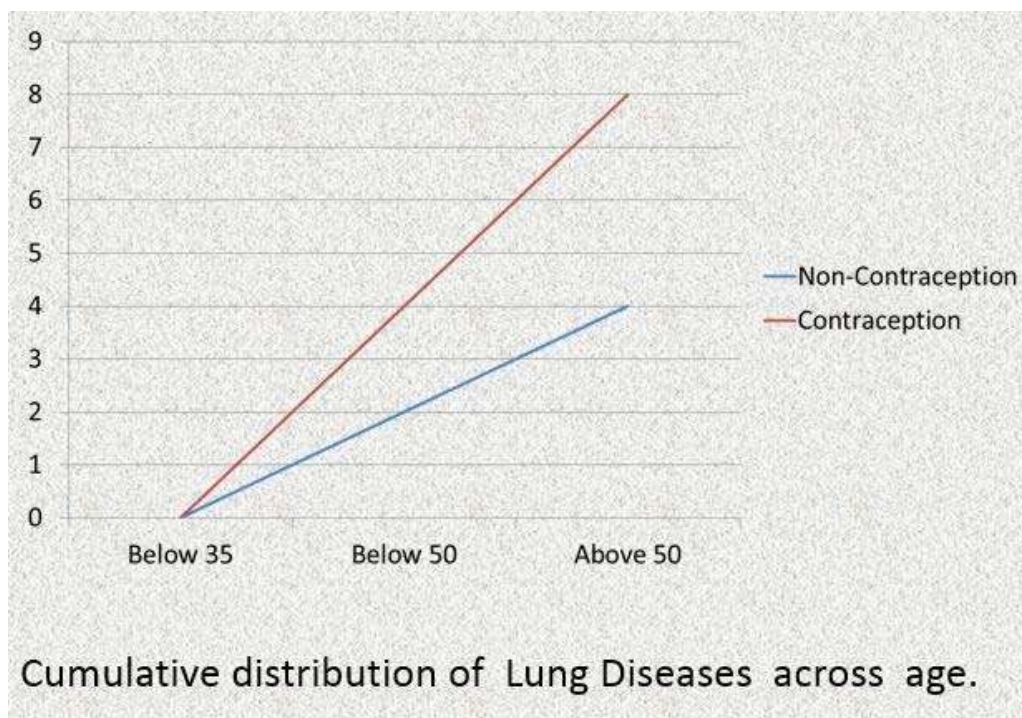

Figure 18: Lung Diseases and contraception Reference 23

Contraception, abortion with its destruction of germ cells, tissue, reduced endogenous hormones with associated cytopathic effects, results in 75 fold increase in chronic obstructive pulmonary disease in 35-70 years of age; Inhalation of innocent aborted blood, contraceptive menstrual blood polluted, hypoxic air[obnoxious exogenous stimuli] evidenced by rise in environmental oestrogen, has resulted in heterogenous manifestations of hyper responsiveness, cancer, agonising immune mediated, degenerative destruction of pulmonary epithelium, alveoli, bronchiolitis, with resultant increased morbidity, mortality of chronic obstructive pulmonary disease (contraception -permitted by life sciences has worse than smoking insult) *Figure 18*

non smokers did not have lung neoplasm at any age in this sample. >70 years mainly consisted of people without contraception

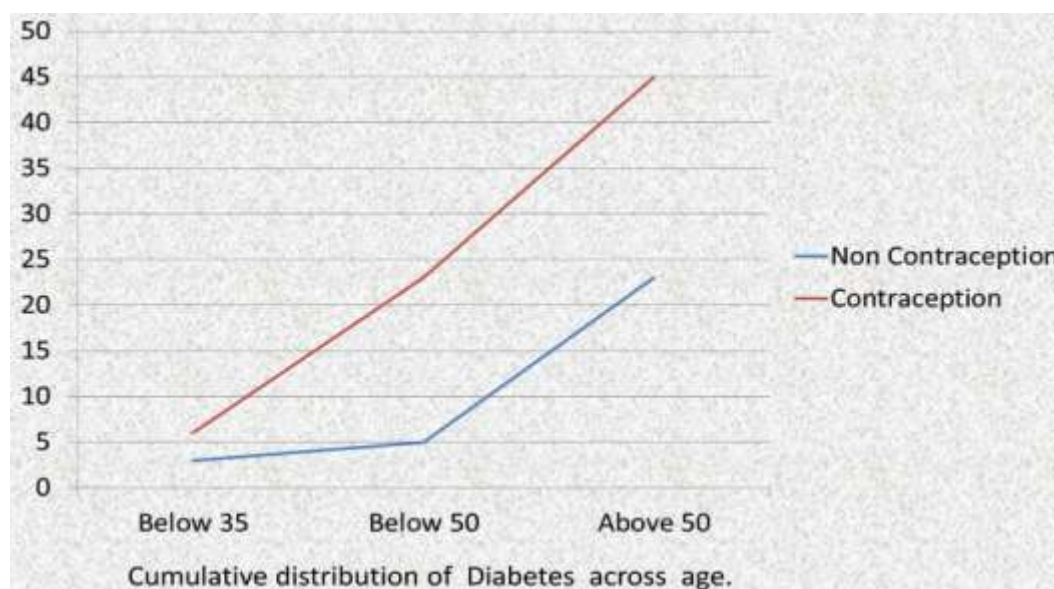

Figure 19: Diabetes Mellitus, contraception Reference 24

Contraception, abortion results in smashed fragmentation of germ cells, as evidenced by chromatid breaks, ring chromosomes, fragmented chromatids and associated reduced endogenous oestrogen, androgen affecting both partners, leading to defaulted genomic repertoire, cell cycle of differentiation, controlled multiplication, deranged cell metabolism, resulting in metabolic syndrome; fragmented germ cells initiate auto immunity

against any cell component. Hence degeneration, [24] auto immune mediated destruction of β cells, insulin receptors, acquired mutations in receptors, cells as part of degeneration, defaulted genomic repertoire, contributes directly to the increased incidence of diabetes mellitus. Contraception is associated with 10 - 45 fold increase in incidence of diabetes mellitus *Figure 19*

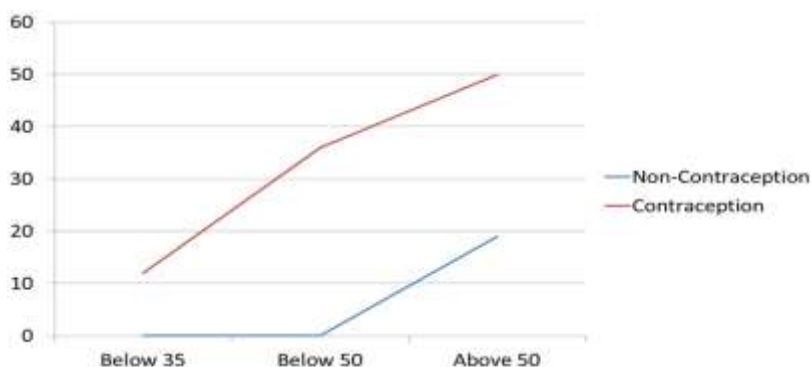

Figure 20: Systemic hypertension, contraception Reference 24

Contraception, abortion associated, defaulted genomic repertoire, cell cycle, cell metabolism, auto immune mediated, down regulation, degeneration of arterial baro-reflex, baroreceptor activity, adreno- receptors, angiotensin 1, 2 receptors, vessel walls, producing inelasticity, more of fibrosis, stiffness leading to systemic hypertension and its complications. Contraception is associated with 15 - 50 fold increase in systemic hypertension among 20 - >50 years age groups. *Figure 20*

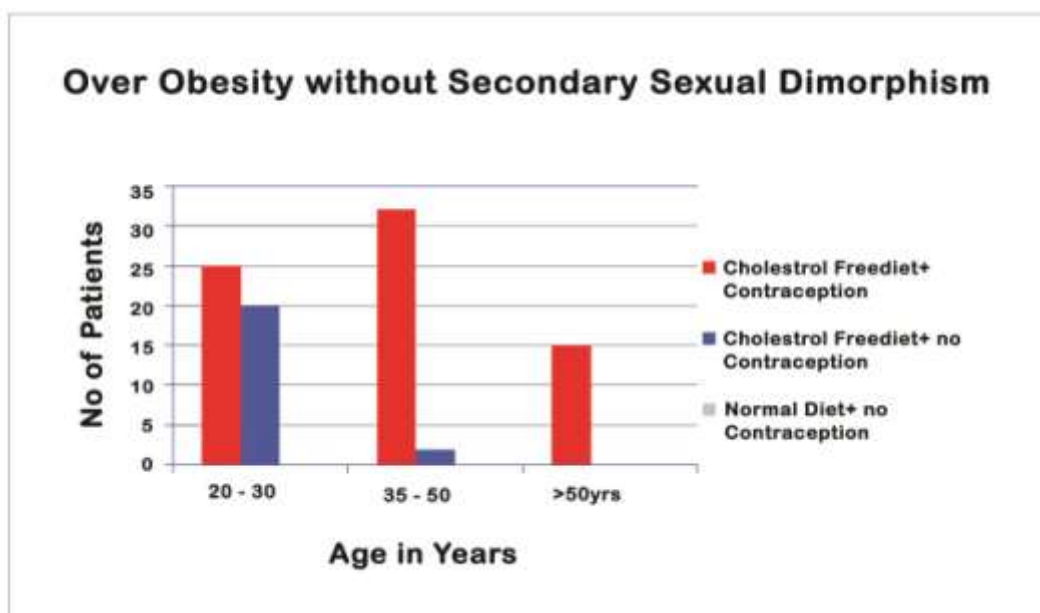

Figure 21: Prevalence of Obesity, contraception, essential fatty acids deprived diet, Reference 25

Acquired contraception, abortion status, with smashed fragmentation of germ cells, consequent reduced endogenous oestrogen: androgen, results in defaulted genomic repertoire, deranged cell cycle, cell metabolism, consequent increased incidence of obesity [25] as part of metabolic syndrome. Contraception status was associated with 3 fold increase in obesity [without secondary sexual dimorphism] among 20-35 years with a p value of <0.025 ; 6 fold increase in obesity among 35-50 years with a p value of <0.0005 ; 1.5 fold increase in obesity among >50 years with a p value of <0.001 . *Figure 21*

Essential fatty acids deprived diet with resultant decreased endogenous oestrogen: androgen synthesis, consequent deranged cell metabolism results in obesity; tight pelvic attires causing thermogenic destruction of germ cells with consequent reduction of endogenous oestrogen: androgen also can lead to defaults in genomic repertoire and obesity.

Physiological genomic repertoire, cell cycle of growth differentiation controlled multiplication, cell metabolism, is dependent upon endogenous oestrogen: androgen surveillance; hence reduced endogenous oestrogen: androgen surveillance results in metabolic syndrome and resultant obesity.

Contraception reversal, consumption of extra virgin olive oil, virgin coconut oil, virgin palmolein oil, preparations from nuts and seeds [diet containing essential fatty acids] , comfortable pelvic attires, slimmed obesity remarkably, as a cause and effect phenomenon.

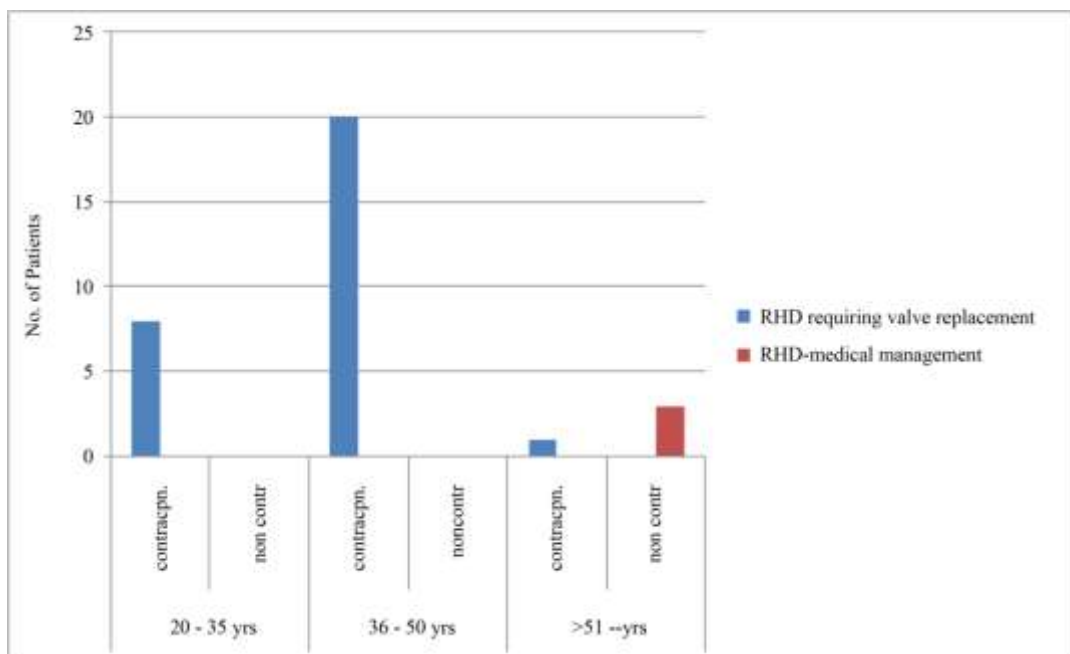

Figure 22; Prevalence of severe Rheumatic heart disease requiring valve replacement, contraception Reference 26

Among contraceptive users aged 20 - 35 years, 7 fold increased requirement of valve replacement surgeries [26] was observed [$p < 0.0005$], *i.e.* all the 7 female patients who underwent valve replacement, had undergone permanent sterilisation; among contraceptive users aged 36 - 50 years, 20 fold increased requirement of valve replacement surgeries was observed [$p < 0.0005$], *i.e.* all the 20 female patients who underwent valve replacement, valvotomy had undergone sterilisation; *Figure 22* whereas among $>51 - 70$ years 3 female and 2 male patients without contraception, received medical treatment only [$p < 0.0005$]. Glaring, obvious difference among contraception and non-contraception users, there was no gender difference

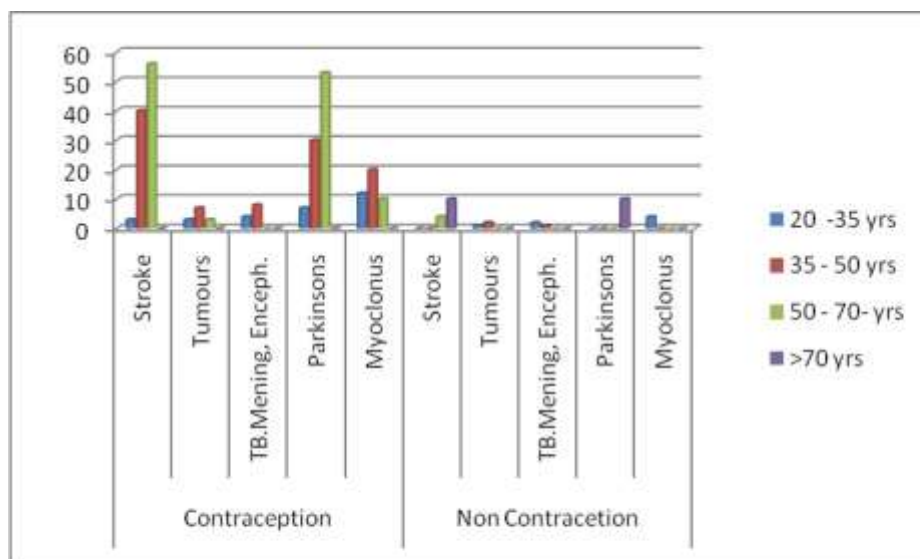

Figure 23: Prevalence of neurological illnesses, contraception Reference 27

Contraception implemented, permitted by Life Sciences as guillotine protocol (without therapeutic indication, without evidence for need or safety as against principles of practice of Medicine) with its unaware, overlooked smashed destruction of Germ Cells, resultant reduced endogenous oestrogen, androgen, resultant increased degeneration of every cell, transmitters, cytokines, autoimmune destruction, demyelination, neoplastic transformation, increased thrombogenicity has led to 40 fold increase in [27] psychosis, dementia, 40-60 fold increase in cerebral infarcts, parkinsonism, demyelination, 10 fold increase in malignant neoplasm, 30 fold increase in myoclonus, seizures with a p value of <0.0005. *Figure 23*

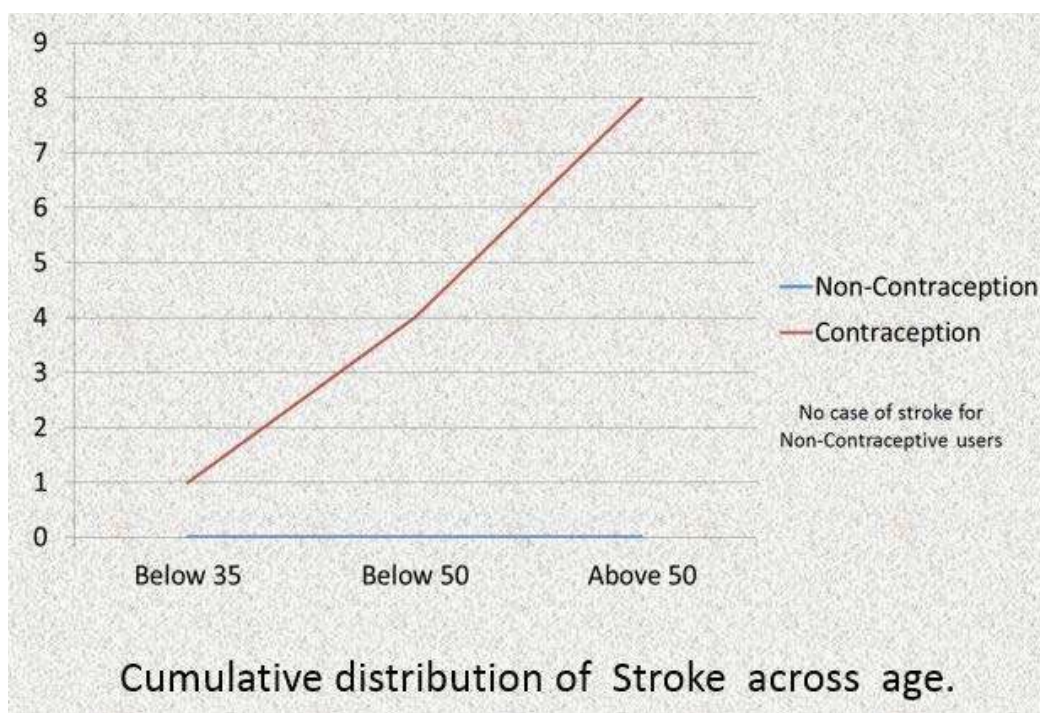

Figure 24: Cumulative distribution of stroke, contraception Reference 27

Stroke was 4-8 fold increased among contraception users aged 20->50 years [p<0.0005] *Figure 24*
 Neuroleptic Malignant syndrome though rare is increasingly seen with absolute significance in people after tubectomy, on antipsychotics;
 Neuroleptic malignant syndrome with high mortality. was seen in contraceptive users
 Consumption of water living without scales, gills [prawns, crabs] also precipitate myoclonus, transverse myelopathies, radiculopathies, demyelination, angioneurotic oedema, pancreatic cancers, diverticulitis, urticaria, nephritis, gastroenteritis probably due to toxin, hap-ten mediated autoimmunity.
 Contraception users have 40 fold increases in dementia, psychosis, cerebral infarcts, Parkinsonism, demyelination; 10 fold increases in [glioblastoma] malignant neoplasm; 30 fold increases in myoclonus, seizures with a p value of <0.0005.

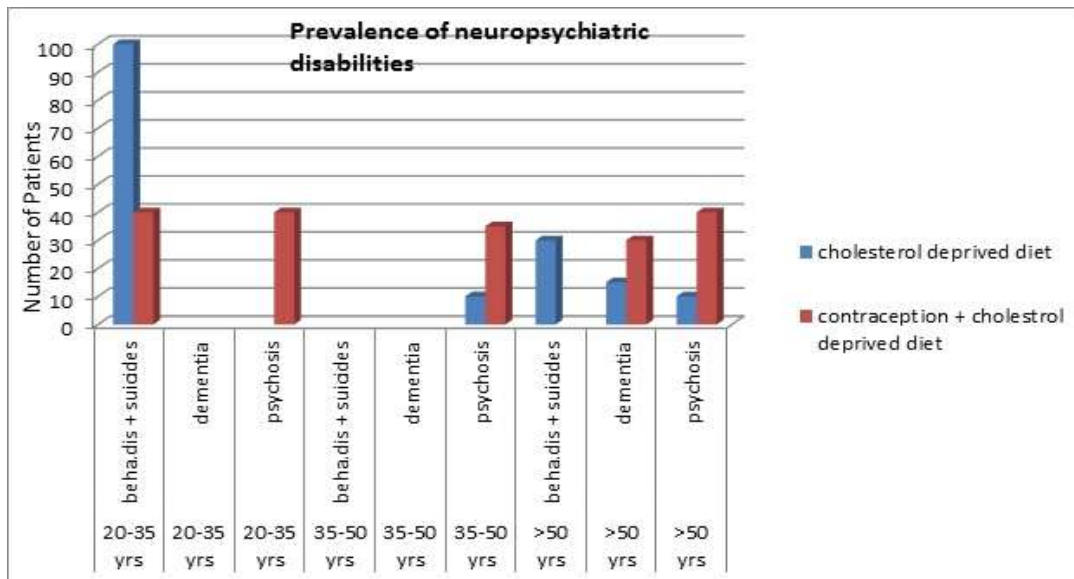

Figure 25:Prevalence of Dementia, Psychosis, behavioural disorders, and contraception, essential fatty acids deprived diet Reference 27

Essential fatty acids, deprived diet due to decreased neuronal, myelin elemental synthesis since the basic fatty acids for nerve synthesis are deprived, results in 10 fold increase in psychosis, dementia in 35-50 years, 50-70 years; whereas in 20-35 years age group 100 fold increase in behavioural disorders, correlating with the longevity of essential fatty acids deprivation more severe degradative impairment in functional, structural pathologies. *Figure 25*

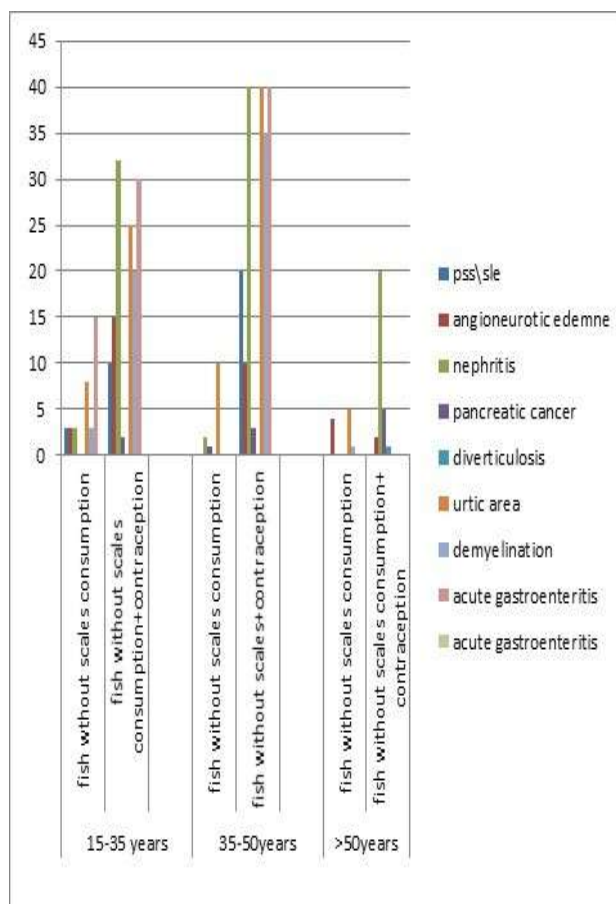

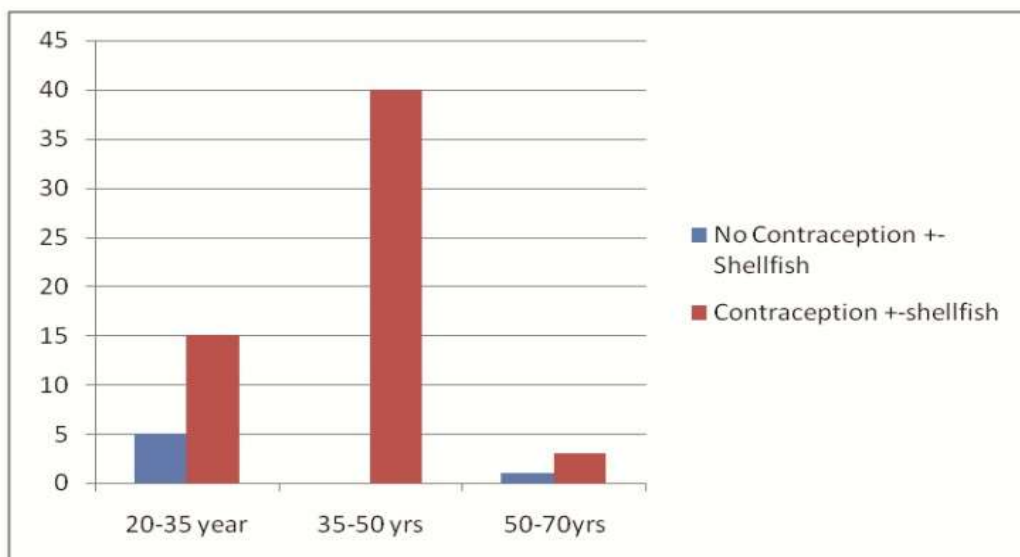

Figure 26: Prevalence of auto immune diseases and contraception Reference 28

Among 20-35 years, 15 fold increase in auto immunity with a p value of <0.0005, was noticed in contraceptive users for e.g. systemic lupus erythematosus, multiple sclerosis, neuro myelitis optica, poly arthritis, Hashimoto`s thyroiditis, transverse myelitis, poly radiculopathies, nephritis progressing to renal failure, demyelination presenting as myoclonus, myasthenia gravis, haemolytic anemia *Figure 26*

Prevalence of autoimmune diseases (1989-2012-clinical practice)

Figure 27:Prevalence of autoimmune diseases, contraception, consumption of water living without scales Reference 28

People of 35-50 years exhibited 40 fold increases in auto-immunity [28] amongst contraceptive users with a p value of <0.0005. *Figure 27*

~70 years were only non contraceptive users; auto immunity with its mortality, had probably resulted in early agonising demise in contraceptive users.

Non contraceptive users also manifest 5 fold increase in auto immune diseases with a p value of <0.0005 probably because of consumption of essential fatty acids deprived diet,[on sunflower, refined oil] fish without scales and gills, exposure of germ cells to raw bloody endometrial surface instead of abstinence during first 7 days after last menstrual period, 45 days after male baby delivery, 90 days after girl baby delivery.

Adolescents manifest auto immune diseases probably by trans placental transmission of auto antibodies from the mother who had used interim contraception in between prior pregnancies and by consumption of fish without scales, gills; essential fatty acids deprived diet, resultant reduced endogenous oestrogen, androgen, genetic acquired defects, increased gene susceptibility to auto antibodies.

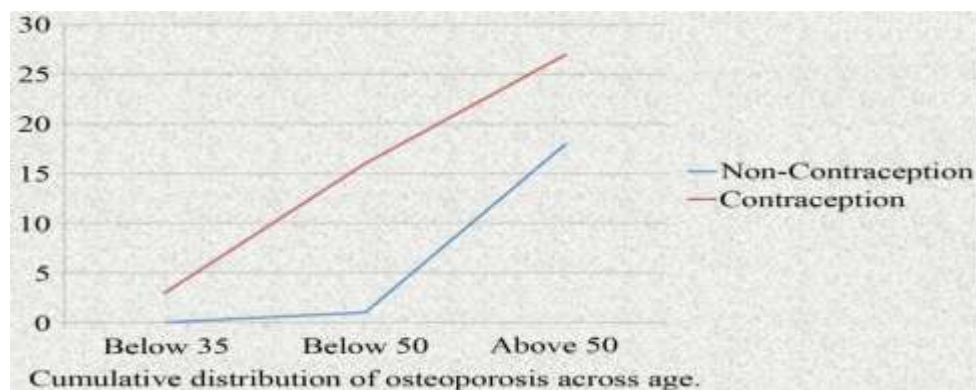

Figure 28: Prevalence of Osteoporosis, contraception Reference 29

~15 - 25 fold increase in [29] osteoporosis among >20 - >50 years with a p value of <0.0005 as manifested by low bone mineral density and low back aches in people using contraception *Figure 28*

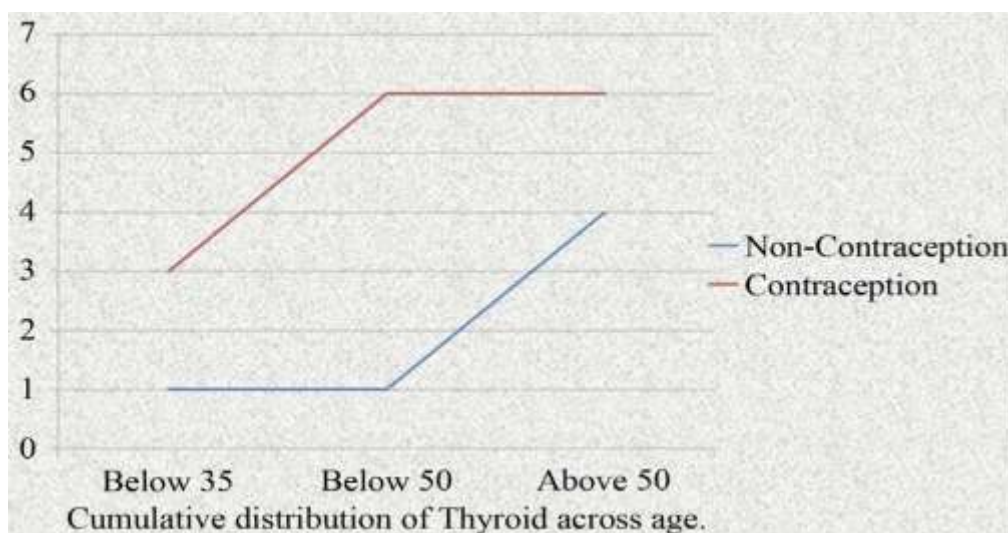

Figure 29: Prevalence of Thyroid diseases, Contraception Reference 29

Weight gain with low thyroid function was seen among contraceptive users 6 fold more among 35 years age group with a p value of <0.0005; 3 fold increase among people using contraception >20 years with a p value of <0.02; 1.5 fold increase was observed in people using contraception among >50 years age group with a p value of <0.025; with 2% of them having autoimmune mechanism documented by fine needle aspiration cytology, antibodies to thyroid peroxidase and thyroglobulin. -*Figure 29*

Essential fatty acids deprived diet *i.e.*, oil without cholesterol {[refined oils] sunflower seed has 6 times less vitamin E than ground nut seed, so sunflower refined oil} resulted in 50% increase in osteoporosis, hypothyroid status in young people without contraception

6 fold increase in cancer incidence was seen in contraceptive users among >50 years with a p value of <0.0005; contraception was associated with 2 fold increase in cancer among 20-35 years with a p value of <0.025, and 4 fold increase in [30] cancer among 35-50 years with a p value of <0.0005 *Figure 30*

10-20 fold increase in breast cancer was seen among 20->50 years age group, in contraceptive users with a p value of <0.0005; 20-30 fold increase in prostate cancer was seen among >35- >70 years in contraceptive users with a p value of <0.0005; 20-40 fold increase in uterine cervix cancer was seen among 20-70 years age group in contraceptive users with a p value of <0.0005 *Figure 31*

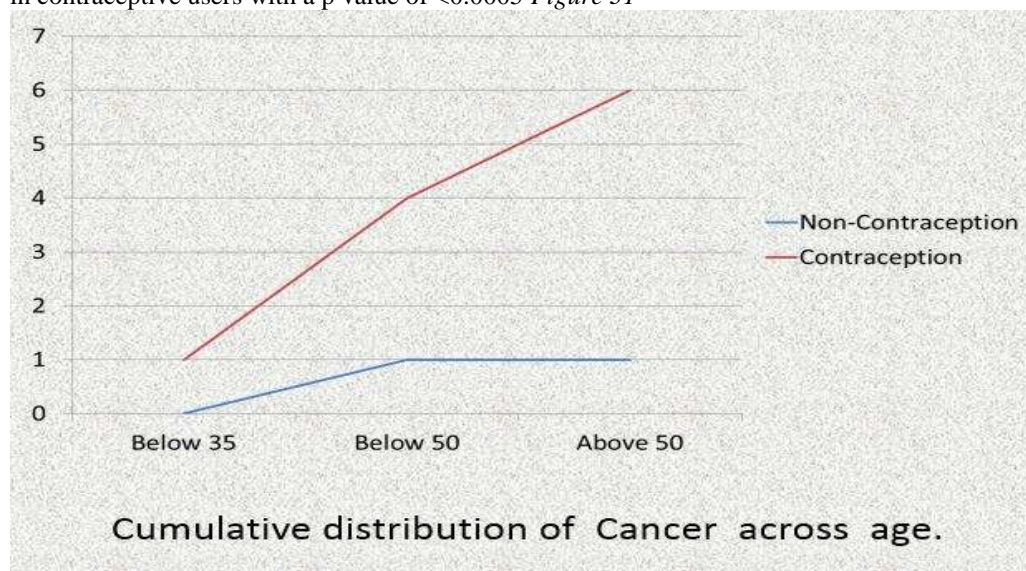

Figure 30: Prevalence of cancer, contraception Reference 30

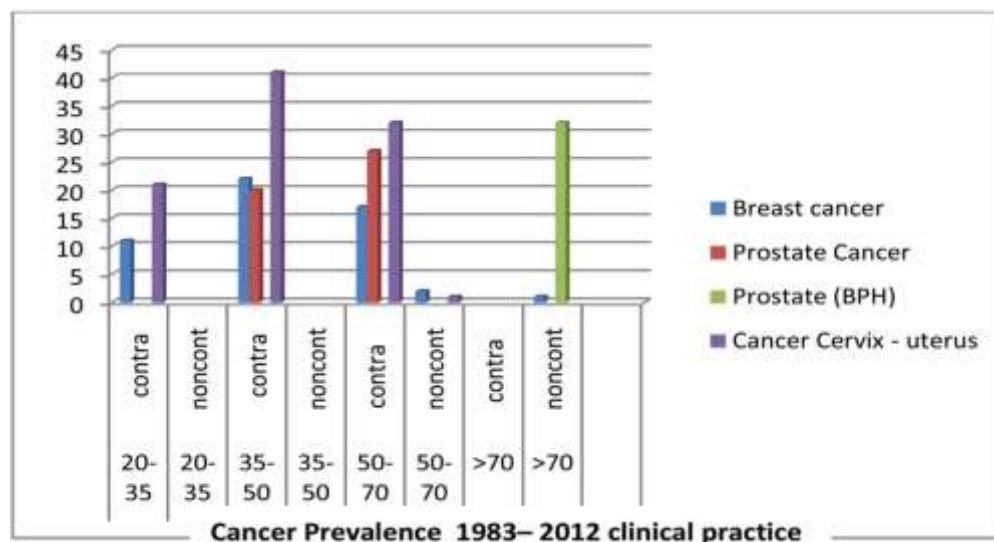

Figure 31:Prevalence of Cancer -1983-2012 Clinical practice [Breast, prostate, cervix] Reference 30

32 fold increase in benign prostatic hyperplasia was seen among >70 years, in non contraception subset of population; most of the patients above 70 years belonged to non contraception group, probably contraceptive users had seen their demise, prior and these geriatrics were born before the era of contraception, so their bodies with unhampered physiology, escaped the damage due to contraception. 61% of contraceptive users had low levels of endogenous oestrogen (~5 - 8 pg) with a p value of <0.0005 and 25% of contraceptive users had low normal oestrogen, corresponding to their age

Oestrogen receptors, [30] were positive in well differentiated cancers of breast, among contraception group, wherein endogenous oestrogen levels were significantly reduced than normal, suggesting a probable compensatory increase in oestrogen receptor expression at the cells in a desperate attempt to avidly bind the

available, suddenly reduced endogenous oestrogen; as against normal physiology) whose surveillance is mandatory for normal growth of breast during the robust fertile, reproductive age group, whereas exogenous, en- forced sterility with sudden artificial destruction of germ cells, reduced hormones sets the agonising faults of cells, organelles, cytokines, genomic repertoire, to result in diseases including cancers.

Poorly differentiated tumours with poor prognosis (high grade anaplasia could not express oestrogen receptors) were not positive for oestrogen receptors; castration, anti androgen: anti oestrogen drugs including tamoxifen were of no avail in curing cancers, rather early mortality was the stay.

Endogenous androgen: oestrogen is essential for normal growth, differentiation and proliferation of cells and will protect from abnormal growth cancer; anti oestrogen therapy, anti androgen therapy, castration, contraception promotes, perpetuates cancer.

Exogenous oestrogen, hormone replacement therapy, will suppress the endogenous oestrogen producing the same effects of contraception, to increase cancer incidence; it's the endogenous oestrogen associated with robust germ cells, zygote (from which every cell has stemmed) safe guards the cell cycle and protects from diseases including cancers.

2 fold rise in breast cancer was seen in non contraception subset of people[unmarried] among 50- >70 years age group, who were on cholesterol deprived diet (on sunflower oil, refined, bleached oil ingestion) for the past 3 - 4 decades; because it's the essential fatty acids, cholesterol, derived from vegetable oil, originating from nuts, seeds (containing seedling, with growth factors to support life) is utilised to produce our endogenous oestrogen: androgen, which cannot be synthesised in cholesterol deprived diet.

Essential fatty acids deprived diet was associated with 8 fold increase in tumours including fibro adenoma breast, myoma uterus, benign ovarian tumour among 20 - 35 years with a p value of <0.0005; 10 fold increase in benign tumours among 35 - 50 years age group with a p value of <0.0005 was seen with essential fatty acids deprived diet. Cancer uterus also was seen in a patient of 20 - 35 years age group with essential fatty acids deprivation; Figure 32

Tight attires around the hip region, pelvis (jeans, tights, barrel, boot cut, pencil cut models) due to increased heat (thermogenic destruction), lead to destruction of germ cells, reduced endogenous reproductive hormones and absolute increase in malignancies of testes, ovaries at young age.

Poly cystic ovarian disease is associated with hormonal imbalance, hence exogenous oestrogen suppressing endogenous oestrogen will compound diseases, rather essential cholesterol rich diet from which endogenous hormones can be synthesised along with omega 3 fatty acids, isoflavanoid supplementation to improve endogenous hormone synthesis addresses the problem.

Contraception reversal [tubal re-canalisation] though recommended, [due to non existing awareness, policies,] could not be done for all; though contraception reversal was done for other medical causes in about ~25 patients wherein the diseases reverted; (>70 years non contraception subset of people, showed 30 fold increases in benign prostatic hyperplasia-universal phenomenon that occurs with disproportionate growth due to gradual physiological reduction of androgen levels and compensatory rise in androgen receptors.

Figure 32: Fatty acids deprived diet and tumours 2005-2012 clinical practice. Reference 30

Contraception was associated with 2 fold increased prevalence of tumour among 20-35 years with a p value of <0.025, 4 fold increase in tumour prevalence among >35 years with a p value of <0.0005, 7 fold increase in tumour prevalence among >50 years was noticed with a p value of <0.0005 Figure 33

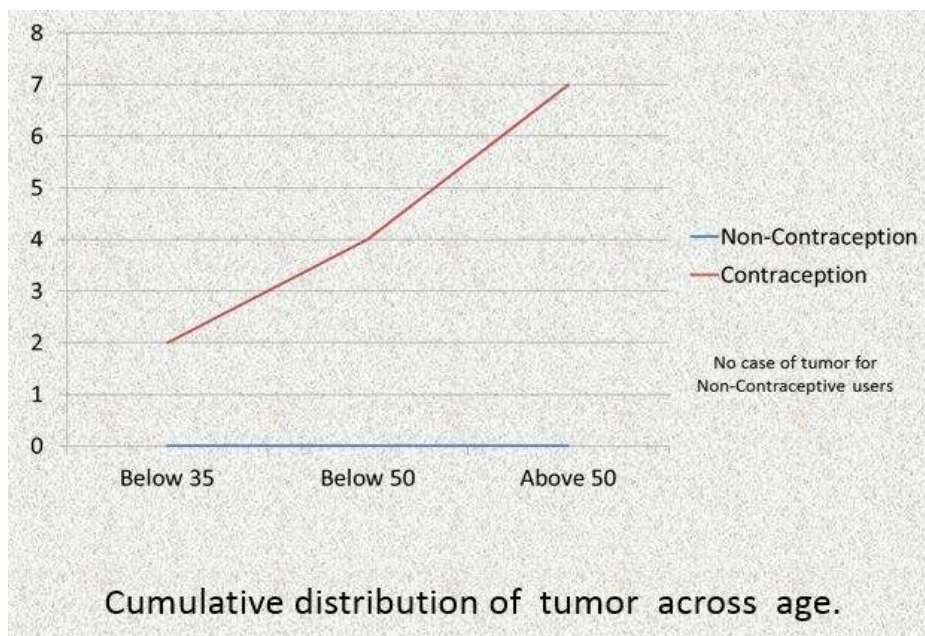

Figure 33: Prevalence of Tumour, Contraception Reference 30

Similarly the concept is Human immunodeficiency virus infection, hepatitis B virus infection will manifest as progressive disease in partners on contraception, including condoms; but remain as carrier status in life partners without contraception reducing mortality,[31] morbidity.

Eradicate aborted blood, contraceptive menstrual blood pollution of the environment to decrease the incidence, virulence, drug resistance of microbes including Hepatitis B virus, Human immune deficiency virus

~100% increase in infectious diseases including Hepatitis B viral infection with a p value of <0.0005 was observed in association with progressive successful implementation of global planned parenthood, abortion

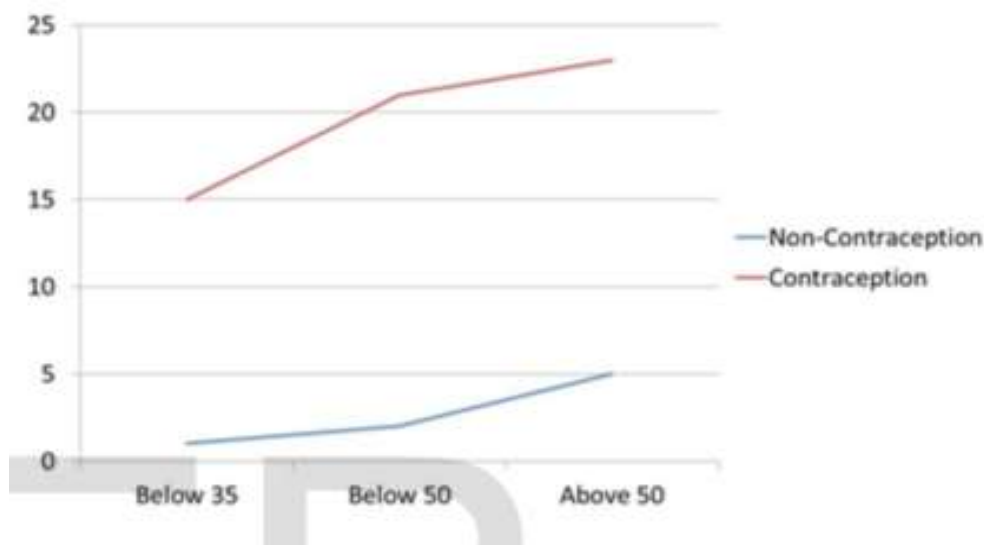

Figure 34:Prevalence of liver diseases, contraception Reference 31

Contraception, abortion was associated with 15-24 fold increase in liver disease with a p value of <0.0005-
 Figure 34

Framingham data mentions 60% increased coronary artery disease if High density lipoprotein is <35mg/dl; if triglycerides increase [32] more than 265mg/dl then 6 fold increase in coronary events due to atherogenesis; Lipid lowering agents decreasing Low, High Density Lipo-Proteins will increase coronary syndrome and impair other lipids dependent cell functions, in addition to hepatotoxicity, cholelithiasis. Exogenous oestrogen will produce contraception by suppressing endogenous oestrogen with impaired cell metabolism and [33] can increase acute coronary syndrome

Pathological contraception results in 45 fold increase in acute coronary syndrome due to artificially, wantonly, unaware acquired germ cell fragmentation and associated decreased endogenous oestrogen.-*Figure 35*
 Essential fatty acids consumption obtained from preparations made of nuts, seeds, egg, using for cooking virgin olive oil/ virgin coconut oil,/virgin palmolein oil, required for the endogenous hormones, cell membrane synthesis, protects from acute coronary syndrome 60%[p<0.0005]

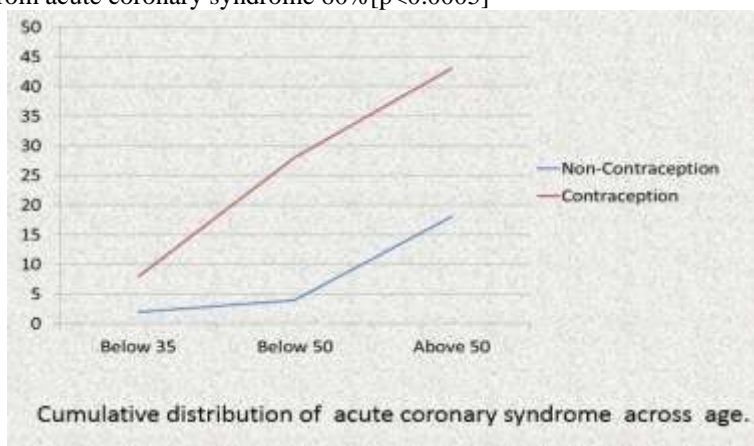

Figure 35:Prevalence of Acute coronary syndrome, contraception Reference 33

Figure 36:Prevalence of intestinal obstruction, fibrous adhesions, retroperitoneal fibrosis, volvulus, contraception Reference 34

Contraception leads to 8-9 fold increase in dense fibrous adhesions, 2 fold increase in volvulus, retroperitoneal fibrosis with a p value of <0.0005 and <0.025 respectively-*Figure 36*
 Contraception results in fragmentation of germ cells in retroperitoneal surface, peritoneal cavity, with decreased hormones results in impaired tissue [34] formation and inappropriate retroperitoneal fibrosis, volvulus, fibrous adhesions leading to intestinal obstruction;

Early diagnosis, with contraception reversal- tubal re-canalisation, coupled with corrective surgeries can correct the cause, prevent recurrence and accelerate healing of intestinal obstruction, retroperitoneal fibrosis, volvulus

Figure 37: Prevalence of Hernia and contraception Reference -34

Contraception, abortion was associated with 3-6 fold increase in prevalence of hernia among 20-50 years with a p value of <0.0025 among 20-35 years, p value of <0.0005 among >35 years, and p value of <0.02 among >50 years -Figure 37.

Hysterectomy, orchidectomy with associated 500% incidence of diseases including fibrous adhesions due to very low endogenous oestrogen is a path of no return, contraception reversal is not possible; hence hysterectomy to be reserved only for cancer uteri, testes and postpartum-haemorrhage.

Essential fatty acids deprived diet, due to decreased endogenous oestrogen, androgen synthesis, reduced essential fatty acids availability for cell cycle, metabolism of mesentery turn over results in fibrous replacement with adhesions, volvulus of intestines. Hernias, uterine prolapse have increased 3-6 fold with a p value of <0.0005 among >35 years, due to contraception with associated degeneration of tissue secondary to decreased hormones

With contraception, incidence of hernias, uterine prolapse have increased due to degeneration of cells of abdominal muscles, pelvic floor, requiring mesh-plasty; recurrence, impaired therapeutic efficacy decreases, when tubal re-canalisation is coupled with corrective surgery, to restore cells healing functional capacity by halting germ cells destruction, restoration of reduced endogenous hormones; because our therapy capitalises on cells healing capacity—we can only suture.

Figure 38. Prevalence of mosquito borne dengue, chikungunya, malaria, with contraception -Reference 35

Prevalence of Dengue, Chikungunya, Malaria showed steep rise by 5-7 fold increase from 1980- 2012 with a p value of <0.0005 -Figure 38

Sea water showed oestrogen level of 0.2pg- 1 pg; river water showed oestrogen level of 1pg- 3pg suggesting oestrogen pollutant was brought by the river and gets diluted in the sea. No visible bands could be seen in sea water analysis for foetal: adult haemoglobin by routine haemoglobin electrophoresis since the equipment can detect haemoglobin in grams only, unlike measurement of oestrogen done in pictograms.

Sea water and river water measured level of alpha foeto-protein [from foetus] as $<0.6\text{ng/ml}$ and β Human Chorionic Gonado-tropins [from placenta of foetus] level as <0.1 further confirming aborted, contraceptive menstrual blood pollution of the environment..

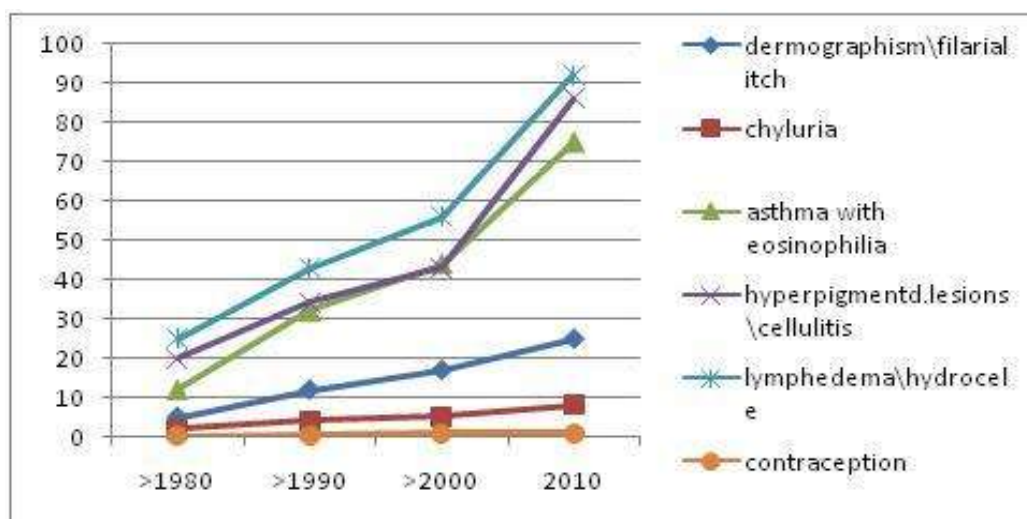

Figure 39. Prevalence of Filarial manifestations, contraception Reference 35

With progressive achievement of global contraception, abortions, from 1980-2012 prevalence of Chyluria showed 4 fold increase with a p value of <0.0005 ; Dermographism urticaria filarial manifestations showed 5 fold increase with a p value of <0.0005 ; asthma with eosinophilic-bronchitis showed 7 fold increase between 1980- 2012 with a p value of <0.0005 ; filarial cellulites, limb oedema, hydrocele showed four fold increase from 1980- 2012 with a p value of <0.0005 -Figure 39

Innocent aborted blood, contraceptive [35] menstrual blood polluted environment-air, water is a feast for mosquitoes breeding and good media for growth, emergence, virulence of microbes including viruses resulting in global increase in mosquito borne diseases namely Filariasis, malaria, dengue, Chikun-gunya and other infectious diseases like human immunodeficiency virus, H1N1, Hepatitis A,B,C,D,E, polyvalent strains emerging making vaccines ineffective, multi drug resistance status, enabling sepsis taking tolls of lives, multi-drug resistant tuberculosis, including today's corona variants, Ebola, Nipah, Marburg virus

If contraception/abortion had not come into vogue, humans were allowed to be born, any amount of emissions will never deplete environmental oxygen; wonderful Author of Universe, Author of Life calculated, eco balanced cycle, of plants utilising carbon dioxide [given by live humans, their fossil fuel emissions, lives on earth] for its photosynthesis, replacing molecule for molecule oxygen exists and plants will become fossil fuels completing the cycle; every creature is interdependent and the creation automatically supports, sustains life on earth-Earth Bus Fare Norms-many childbirth per family as Ordained by Author of Life; but instead of being born as people, when the human race goes down the drain as, innocent aborted blood, contraceptive menstrual blood stain as environmental pollutant [documented by rising environmental oestrogen, detected alpha foeto-protein, β human chorionic gonado- tropin in sea, river water], the obnoxious menstrual, aborted blood depletes oxygen of the environment [due to its high affinity for oxygen] which cannot be replaced by plants, unlike emissions; in fact plants themselves will disappear, perish due to the secondary hypoxia, warming, thriving microbial infections; any amount of good, attempted forestation cannot replace this depleted oxygen by innocent aborted blood since no carbon dioxide is formed -[no live humans],to be replenished by plants; so the global hypoxia of air, water, environment is cumulative, progressive till life sciences on the globe, acknowledge these accumulating scientific facts and end contraception, abortion with urgency, forming policies protocols to revert, halt global contraception [planned parenthood], abortion.

Figure40 Prevalence of Kidney disease, Contraception Reference 36

Renal diseases was seen to increase by 2.5-4 fold among Contraception users aged 20-50 years [$p < 0.0005$] and 1.5 fold increase [36] among >50 years age group [$p < 0.025$] -Figure 40

Consumption of water living without scales and gills was associated with 2.5 fold increase in renal diseases, among 20-50 years age group, but when combined with contraception 20-40 fold increase in diseases were seen in 20 to >50 years age group, [$p < 0.0005$].

Consumption of fish without scales and gills was also associated with pancreatic cancer, urticaria, gastroenteritis, diverticulitis, demyelination leading to poly radiculopathies, transverse myelopathies, myoclonus, hyper pigmentation, angioneurotic oedema

Figure 41: Prevalence of Skin Lesions, solar keratoses, Contraception Reference 37

Solar Keratoses had increased 4 fold [p <0.0005], tumours of the skin including pilomatrixoma had increased by 3 fold [p<0.025], basal cell carcinoma, malignant neoplasms of the skin had doubled over the past decade [p <0.025], corresponding with progressive implementation of [37] contraception, abortion *Figure 41*

Innocent aborted blood, contraceptive menstrual blood environmental pollution, evidenced by rising environmental oestrogen; [endogenous oestrogen present in the blood, can reach environment, by spilt blood only]aborted blood with its haemoglobin, binds oxygen of the environment with high affinity, cannot be replaced by plants, depletes ozone, unlike emissions of live humans-chlorine, bromine, nitrous oxide, exhaled air with carbon dioxide, being essential for manure, photosynthesis of plants, which replace oxygen molecule by molecule; plants become fossil fuels, eco balanced cycle continues to self sustenance by life on earth; ozone-existing oxygen envelope being depleted by aborted blood, radiations result in solar keratoses, skin neoplasms; environmental aborted blood pollution favours flourishing growth of microbes, infectious diseases and drug resistance.Mandatory implementation awareness of Earth Bus Fare Norms [Many Childbirth per family] will restore ecology, economy by restoring Life on Earth

Figure 42: Countries with Liberal abortions, Deaths by Corona Virus April 2020 Reference 38

The recent year abortions, correlated with mortality by corona virus infection, indicating the number of victim hosts who had undergone prior surgical abortions in the recent year to have suffered fatal autoimmune hemophagocytic lymphohistiocytosis, when they encountered corona virus infection as seen in *Figure 42*

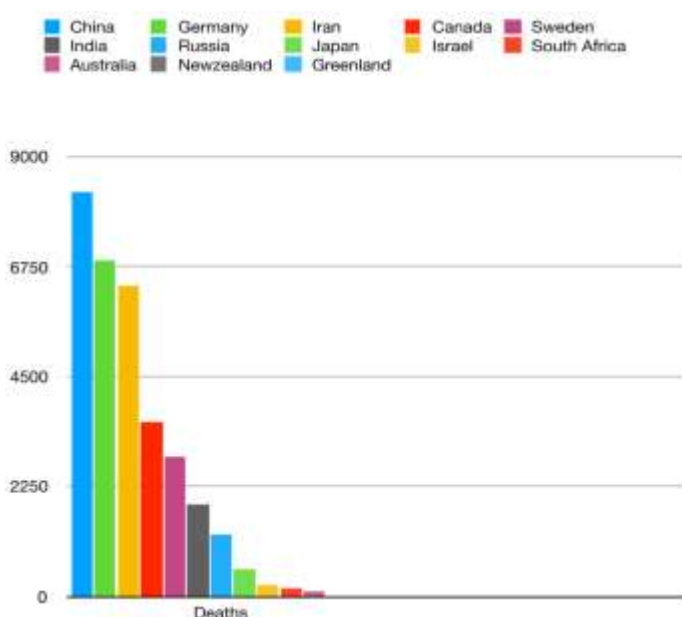

Figure 43: Countries with restricted Abortions, medical means abortions, deaths by COVID 19 [April 2020] Reference 38

The deaths due to corona virus infection in countries which practice restricted abortions, i.e. less than 12 weeks, governments permission required, medical means forming ~85% of total abortions, with relatively less tissue damage, less autoimmunity, the fatalities were from <8266 as depicted in *Figure 43*

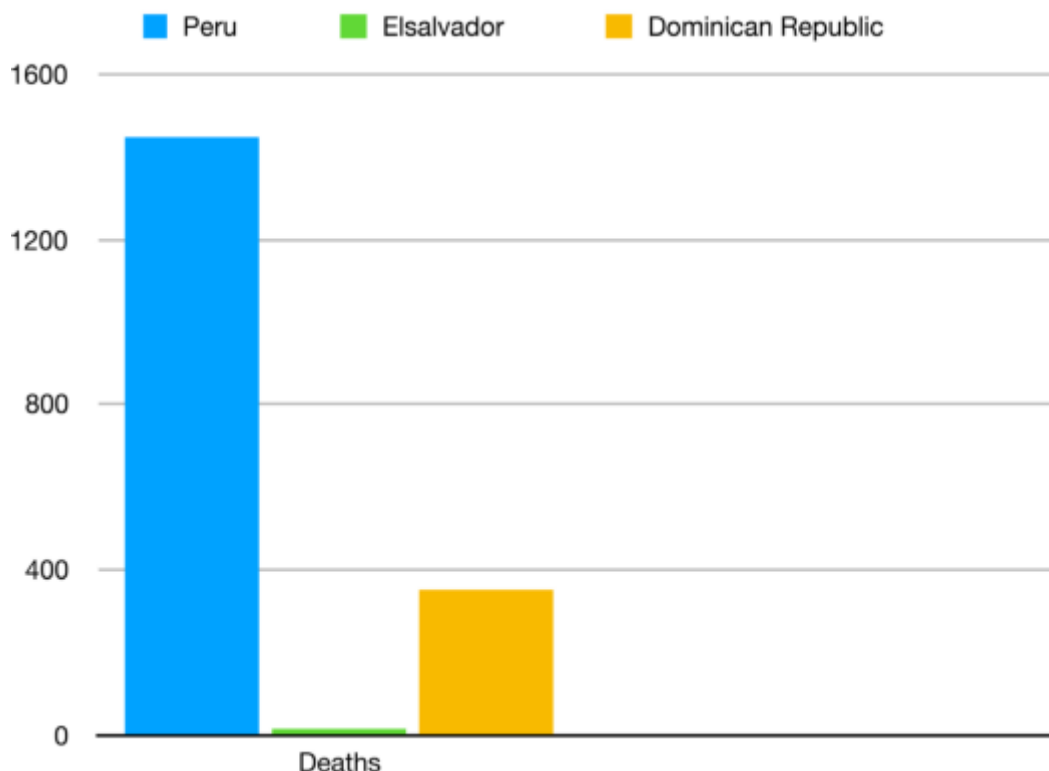

Figure 44 Countries with no abortion but practising contraception-Deaths by Corona virus [April 2020] Reference 38

Deaths due to Corona virus infection- in countries with no abortions but practising contraception, ranging < 1500 as depicted in *Figure 44*

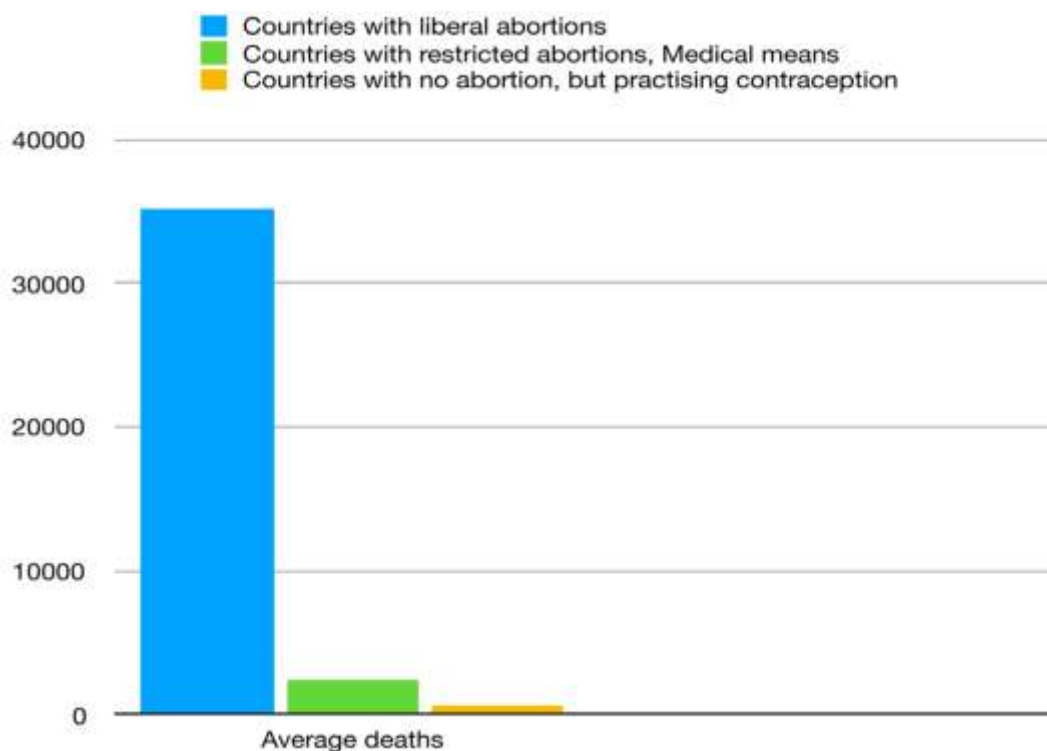

Figure 45 Average number of deaths in countries by corona virus and correlation with status liberal abortion, restricted abortions, no abortions, but practising contraception Reference 38

Figure 45 showed analysis of average deaths between countries with liberal surgical abortions, restricted surgical abortions, medical means of abortions, countries practising no abortions, but contraception-highlighting-countries with liberal abortions had ~18 fold more fatalities than countries with restricted abortions, and ~36 fold more fatalities as when compared to countries without abortions, secondary to autoimmunity namely hemophagocytic lymphohistiocytosis, which occurred purely due to surgical abortions associated extensive tissue damage, in the victim host.

The above data highlights fatal autoimmune Haemo-phagocytic lympho -histiocytosis followed corona virus infection, secondary to the victim host having undergone prior liberal surgical abortions, producing massive tissue damage resulting in soaring autoimmunity. Immunomodulators namely hydroxy chloroquine or plasma exchange could not combat.

From December 2019 till date, abortions, contraception have not been performed, due to corona virus infection, and global [38] lock down; existing humans breath in the nostrils, replenishing oxygen, North Arctic Zone hole has closed by April/May.

Similar to blood moon -consequent to sun rays passing through Earth's abortion polluted air falling on the moon, red river ways, Arctic sea of Norilsk is yet another evidence for aborted blood pollution of rivers, seas, air, reflected more obviously by spill of oil; secondary to aborted blood of 147.28 million total abortions from 1970, depleting ozone leading to global warming with resultant melting of long frozen Permafrost supporting the posts of fuel tanks to crash, leading to tonnes of diesel spill; Global Red river ways, red oceans, seas by globally practising abortions, contraception [planned parent hood, one child policy, small family norms] -aborted blood, contraceptive menstrual blood pollution into rivers, seas, oceans,

Earth's magnetic field is strengthened by iron in the blood flowing within blood vessels, of live humans, by repelling Earths magnet; by global abortions, contraception, eradicating human race by 95%and by blood spilt in environment, with iron in the haemoglobin of shed blood attracts earths magnet, thereby weakening earths [39] magnetic field from Africa to SouthAmerica. Mandatory implementation of Earth Bus Fare norms-many child birth per family after Holy Matrimony [without premarital, extramarital affairs] will restore global ecology, economy, Life on Earth

Putrefaction of Innumerable aborted fetuses, putrefaction of enormous necrotic menstrual blood environmental pollution by one child policy, small family norms, planned parenthood, putrefaction of early demise of millions of parents [bodies] by degenerative, autoimmune, neoplastic, infectious diseases consequent to practising global contraception, abortion -results in toxic inflammable, explosive gases namely hydrogen sulphide,[lethal brine pool] ammonia in red sea, oceans, underneath, over the earth, air -environmental pollution

Contraception reversal declines diseases 80%

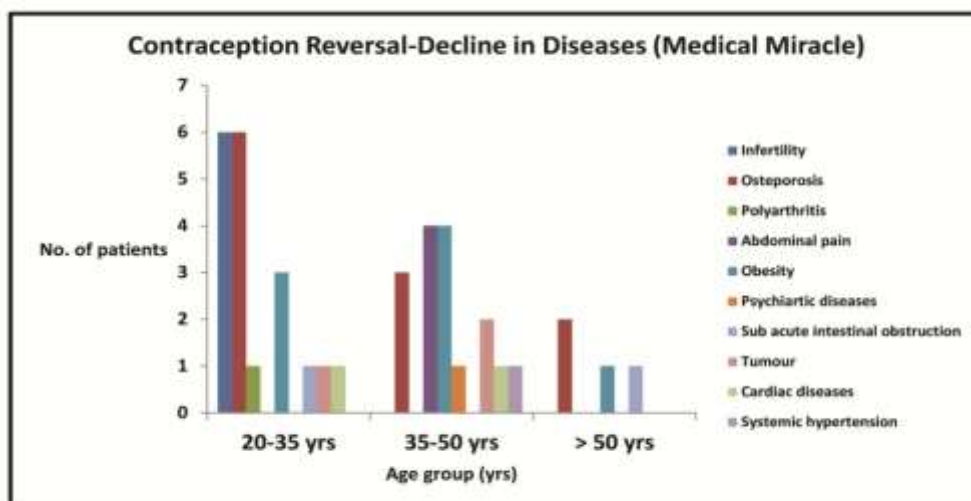

Figure 46: Contraception Reversal -Decline in Diseases [Reference No.40]

Contraception reversal (e.g. fallopian tubal re-canalisation, removal of copper-t, removal of implants, diaphragm, Intrauterine devices, recommendation to stop using condoms) restored oestrogen levels to 79.9% of normal values for that corresponding age -*Figure 46* and restored health with decreased diseases,[degenerative, neoplastic, autoimmune, infectious diseases] regressed [40] metabolic syndrome namely osteoporosis, systemic hypertension, infertility, abdominal pain of probable adhesion colic, sub acute intestinal obstruction, obesity slimmed with pleasurable difficulty to identify them within 15 days, tumours shrivelled, did not recur, poly arthritis with deformity reverted with added supplementation of essential fatty acids, auto immune diseases like neuro -myelitis -optica with dystonia, quadri-paresis disappeared restoring normal power with added low dose intravenous immune globulin, control of uro -sepsis and supplementation of dietary essential fatty acids [virgin olive oil, virgin coconut oil, virgin palmolein oil for cooking, consumption of edible nuts and seeds preparations]

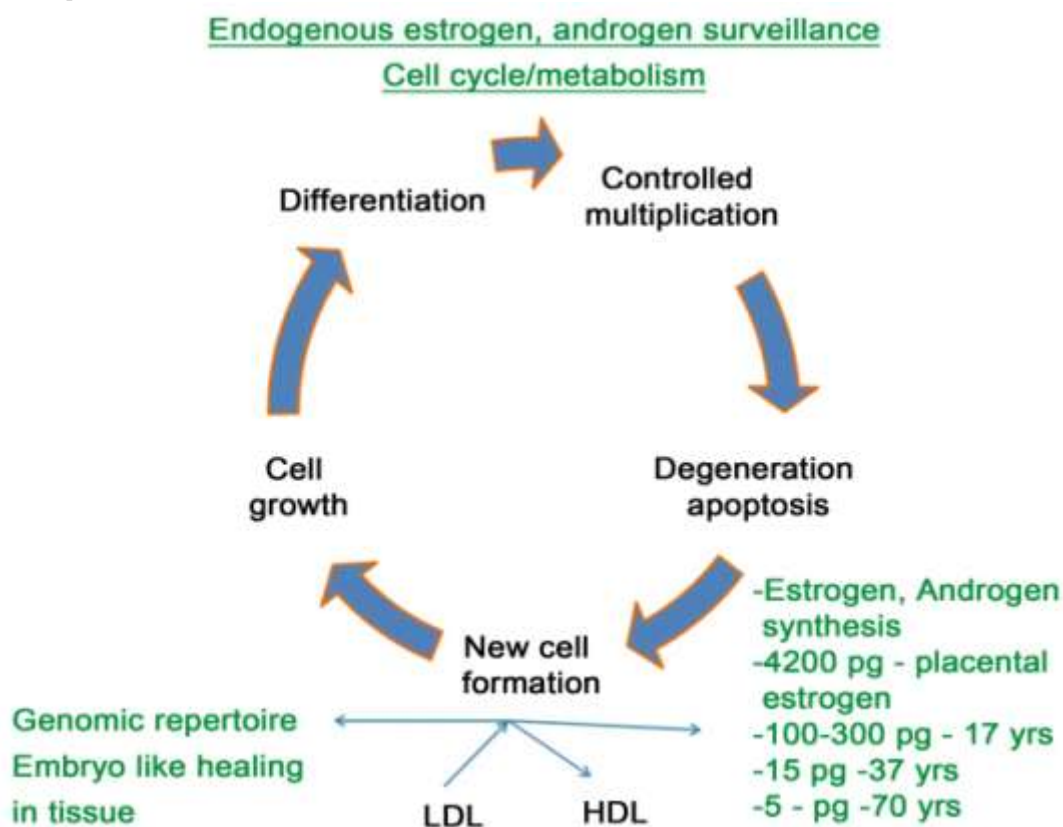

Figure 47: Endogenous Oestrogen, Androgen surveillance for normal cell metabolism, robust Genomic Repertoire. Reference: 41

The “withered tree akin host” concept is contraception, abortion, with smashed fragmentation of germ cells. Reduced endogenous oestrogen, androgen [dried up, destroyed life factors] result in deranged cell metabolism, cell cycle, and de- faulted genomic repertoire, leading to failure of all established pharmacological therapeutics, including advanced technologies which yield gratifying results in non contracepted hosts/people today and in every one, before the era of contraception; subsets of people, host with contraception, with destroyed life factors, behave helplessly, concerning therapeutic applications, compared with subsets of people, host without contraception, with intact genomic repertoire, *Figure 47* normal endogenous oestrogen, androgen, with robust cell metabolism God ordained Life factors, make a remarkable recovery. Contraception reversal replants the germ cells [germ cells destruction stops], hormones rejuvenate to 79.9% of age normal, and diseases abate with recovery.

Absence of diseases was seen by the analysis [41] of health screening camps, 80% - 90% [$p < 0.0005$] only in the people without contraception in 20 - 35 years age, 35 - 50 years age group. Contraception correlates absolutely with increased morbidity, mortality, in young age < 50 years; absence of contraception correlates absolutely with absence of diseases, in young age < 50 years. *Figure 48*

Earth Bus Fare Norms-many child birth per family only after Holy Matrimony as ordained by the Author of Life transforms womanhood into Royal Motherhood with Royal Diadem, her children as Jewels on her crown; woman hood is reduced to napkin status by global contraception, Abortion, premarital, extramarital affairs, living together, [one uses a woman she has to abort[napkin status]]
Global implementation of Earth Bus Fare norms guarantees restoration of ecology, economy, health, Life on Earth

Absence of disease- nil contraception

What a Bliss to have no disease with nil contraception!!

With contraception no disease is not seen i.e., no escape as per human physiology from degenerative diseases – painful tragedy-prevalent-true, but not recognized by doctors/govt./people

Figure 48:Prevalence of Absence of Diseases in age groups 20-35 , 36-50, >50 years, with no contraception status Reference No.41

Ozone layer [O₃] is generated in Author of Life`s -ordained self sustaining Ecology by green leaves of plants through photosynthesis utilising carbon dioxide as God ordained food for plants-carbon dioxide is obtained from respiration of Live people, respiration of Lives on earth, sea, fossil fuel emissions used by Live humans for transport namely aeroplanes, cars, vehicles, this carbon dioxide is God ordained to generate oxygen in the self sustaining ecology-

Many children per family, More carbon dioxide of their exhaled breath in nostrils-[added carbon dioxide of petrol/diesel fumes], more food for plants [photosynthesis], more oxygen/ozone generation [plants by

themselves cannot generate oxygen without carbon dioxide of many people/children]; sunlight, water being available for photosynthesis.

Never carbon dioxide [42] can deplete ozone, always carbon dioxide of exhaled breath in nostrils of many children, through photosynthesis will generate more oxygen/ozone [self sustaining ecology of God's ordination]; e.g. visualise plants blooming in petrol/diesel supply stations. During menstruation if a person plucks a rose flower, next day the plant would have withered, if menstrual contaminated water flows to any tree, it'll wither also, whereas rose plant grown over buried placenta with its life giving factors will bloom in plenty Many children per family as God ordained, more carbon dioxide, more oxygen by photosynthesis, more ozone generation [self sustaining ecology], unailing monsoon rains by earths rotation. God ordained physics exists to support life on earth.

People, their vehicles fuel usurp oxygen to produce carbon dioxide which is utilised in photosynthesis by plants to generate oxygen molecule by molecule-God ordained self sustaining ecology [more people-more carbon dioxide-more ozone automatically generated] by Author of Universe's calculation].

Many children per family, more customers, more buyers, more utilisers, more passengers, more students, more people of nations [population] ... result in invested returns-flourishing global economy crowned by technology [every family would have had helicopters, gliders aeroplanes with guarantee-unailing God ordained self sustaining economy] as in the era before contraception, if only global contraception/abortion had not come into vogue, millions, millions of children had been permitted to be born, wonderful zooming economy we would have had.

God ordained physiology Many children per family, oestrogen has to be ~4500 in first trimester pregnancy to >-30,000 p.g/ml in third trimester, secreted by the placenta of the baby, which increases life time of parents [kidneys/brain/every organ enlarge during pregnancy, Hepatitis B virus has been expelled,bones are strengthened by zoom cell metabolism for parents, myocardial infarction/cancer will be prevented by zoom cell metabolism of parents by the placental hormone of the babe, umbilical cord blood bone marrow transplant will heal 100% acute lymphoblastic leukaemia in the sibling].

e.g. ~10 years life time increases by one male child birth, 45 days [22 days lochia, 22 days detached placental surface healing] abstinence sufficient-smaller placenta-smaller raw surface to heal; for a girl child birth increases life time of parents by ~20 years (XX, more hormone) 90 days [45 days lochia, 45 days healing of detached placental surface as 1 mm/day healing as God ordained in physiology] abstinence required because larger placenta/larger raw surface to heal. So as in the era before contraception people were blessed with many children and they lived many years-constituting present day geriatrics Hence many children per family-parents longevity of life abounds by God ordained cell metabolism-physiology; absence of diseases is significantly obvious, in people without contraception because their cell metabolism of cell growth, differentiation, controlled multiplication, programmed cell death in 48 - 72 hours, followed by new cell formation governed by endogenous oestrogen androgen is robust/unhampered, supported by virgin coconut oil/virgin olive oil/virgin palmolein oil cooking [at cell level-e.g. new kidney, new heart, new brain, new bone, all tissue new in 48 - 72 hours-marvel physiology; this phenomenon of cell's catabolism followed by anabolism under the governance of endogenous oestrogen/androgen prevents neoplasms].

Many children per family more security by their interferences of their presence to remote controlled e.g. unmanned air vehicle-UAV robbery, non nuclear robotic war, intercontinental ballistic missiles, not possible; many children per family, better security-tigers will flee to forests [by presence of many people].

Many children per family more people walking on this earth with their iron within haemoglobin within red blood cells flowing within blood vessels will repel the Earths magnet to strengthen earth's magnet.

As we know annual human excreta of five live people, food wastes of natural ingredients, undergo degradation to produce bio methane, [non toxic to environment] enough to fuel a vehicle for 300 km, and can be used to produce electricity, this is a marvel of existing, God ordained self-sustaining ecology of creation, designed by the Author of Universe to support Life on earth, calculated even to take care of the natural bio waste; everything required by live people God's ordination reacts it at different staratospheres.

So self sustaining ecology, strengthened earth's magnet, stronger security, self sustaining economy, self sustaining life, God ordained increase in longevity of life of parents, by marvel physiology/physics follow many childbirth per family after holy matrimony as God ordained-mandatory *Earth Bus Fare norms*/ticket, in this God ordained Universe [physics] If there's a seed it'll sprout, similarly after holy matrimony mandatory many Childbirth, inevitably follows, children/siblings global systems are tuned to nurture.

Whereas by global abortion, contraception [jumping off cliff to fly-marred science-non evidence based non medical practice] God ordained self sustaining ecology, self sustaining economy, security, on going Life, [supported, geared by many child birth per family-Earth Bus Fare norms] collapses.

Putrefaction of innumerable aborted fetuses, putrefaction of enormous necrotic, menstrual blood pollution [by one child policy, small family norms, planned parenthood], putrefaction of millions of young parents having embraced early demise by 275% increased degenerative, neoplastic, autoimmune, infectious diseases

consequent to global abortion, contraception-emanates toxic explosive inflammable gases namely Hydrogen Sulphide, ammonia as found in lethal brine pool in seas, oceans,

The concept is carcasses of millions of aborted fetuses, millions of dead contracepted young parents, aborted blood, contraceptive menstrual blood pollution, depleting oxygen of the environment, collecting in the ocean bed, earth hollows, sewage tanks-[originally meant to contain only human excreta, but now aborted products of conception, blood from abortion and contraception] form basis for enormous putrefaction, releasing inflammable, toxic , explosive gases, producing spontaneous combustion of the skies, profound churning up of large tidal waves by toxic gases of putrefaction, and bursting/rupture of coastal areas accelerating tsunamis, central areas resulting in land slides, earthquakes, mountain slides, avalanches, robust growth of anaerobic, aerobic microbes, emergence of stinging insects of larger size, makes the potable water bitter, and toxic gases further resulting in lakhs of fish, water living, washed ashore dead due to hypoxia, in spite of the plentiful resources of life supportive oxygen of the oceans; the enormous toxic gases rupture not only the body tissues but also the soil, oceanic beds, hollows of the earth, sewage tanks resulting in tsunamis

The concept is Master planner of the Universe; the Author of Life has designed uniquely, wonderfully the self-sustaining ecology to support Life on earth. Alas! this acquired termination of pregnancy instead of assisted deliveries, numerous dead contracepted young parents, instead of robust youth being blessed with many precious children following Holy Matrimony, cannot be accommodated as part of ecology, which gets destroyed, disrupted agonisingly promoting as vicious cycle further death of Living.

Putrefaction is one of seven stages in the decomposition of the body of a dead animal. It can be viewed, in broad terms, as the decomposition of proteins in a process that results in the eventual breakdown of cohesion between tissues and the liquefaction of most organs. It is caused by bacterial or fungal decomposition of organic matter and results in production of obnoxious odours

Bio methane, carbon dioxide are produced from live humans, excreta, natural food wastes, enabling an alternate energy source, including electricity generation, fuelling vehicles, existing in the nature. Chemical aspects of plant decomposition are always associated with carbon dioxide which will be replaced, molecule by molecule of oxygen by photosynthesis. Both degradation of peoples waste and reaction of emissions of live humans are built in the self- sustaining God ordained ecology of the earth for supporting, sustaining life; growth, multiplication of life is for benefit and sustenance.

Whereas hydrogen sulphide formed from putrefaction of dead bodies of young parents in huge number, aborted fetuses, is explosive, inflammable, toxic, does not ward off radiation, but conducts it leading to global warming.

When accumulating rising toxic, explosive, inflammable gases produced by putrefaction of innumerable aborted fetuses, putrefaction of millions of bodies of young parents practising global contraception, abortion, putrefaction of enormous necrotic tissue with menstrual blood pollution by one child policy, small family norms in the atmosphere are displaced by earths rotation, revolution, reaching the ball of gases -Sun [originally Oxygen, nitrogen -displaced gases with Lives on earth] , inevitable, solar mass ejections, coronal radiations, solar tsunamis with resultant black spots in the sun, ensues, as on/beneath earth, forest fire, ring of fire, volcanoes, oil fir, oil tanker vessel fire, land fire, spontaneous combustion in the skies

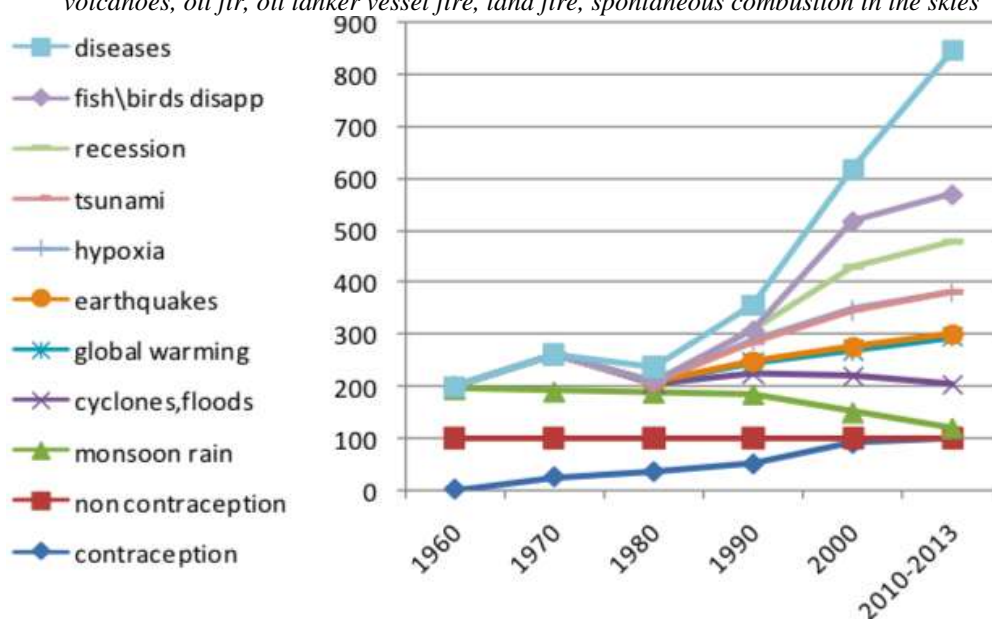

Figure 49 Increased prevalence of tsunamis, hypoxia, recession, global warming, earthquakes, cyclones, floods, disappearing fish, islands, birds with rising global abortion, contraception Reference 18

Ozone layer (condensed oxygen) gets depleted, radiation increases, global warming, global hypoxia, results, hot air currents are set up leading to inevitable cyclones, floods, earthquakes, tsunamis, tornadoes, hurricanes, disappearing water living, birds, islands, animals *Figure 49 by emanating toxic, explosive, inflammable, gases to the environment by global abortion, contraception with associated putrefaction*

Figure 50 Spontaneous combustion of the skies, soil rupture, death by toxic gases in the sewage, increasing stinging insects bees, mites, consequent to global contraception, abortion Reference 21

With enormous putrefaction of millions of dead foetuses, millions of dead young contracepted parents, huge amounts of toxic gases are formed which will burst or split or rupture the earth, will also churn waves to rise as giant tidal waves, especially near the coastal areas with sea entering in, accelerating tsunami.

Toxic inflammable gases can result in spontaneous combustion of the skies. initiated by lightning with resultant sudden unexplained forest fires, land fires fire balls dropping in oceans, oil tanker vessels fire, oil catching fire,

unexplained fires, *Figure 50* increased stinging insects, bees, locusts, increasing microbes including Ebola, corona virus, SARS, Nipah virus, Marburg virus

Inflammable, toxic, explosive gases produced by putrefaction of innumerable aborted fetuses, putrefaction of bodies of millions of young parents embracing early demise by practising global contraception, abortion, putrefaction of enormous necrotic tissue with menstrual blood pollution [one child policy, small family norms] beneath the surface of earth -results in ring of fire, erupting volcanoes, when convection currents sets in brings down hail storms, tornadoes, cyclones, storms, of rain, snow, sand, when earth bursts along coasts-tsunamis, when earth bursts within central areas-earthquakes, land slides, mountain slides, cracks on top of splitting mountains, splitting roads, ground of houses, sinking towns, land subsidences, death of septic tank cleaners, miners, well diggers by these toxic fumes, ...

The water sources including desalination are made toxic, bitter by contraception, abortion associated enormous putrefaction; except the springs from within a rock not contaminated by aborted blood pollution or contraceptive menstrual blood pollution, may be considered safe;

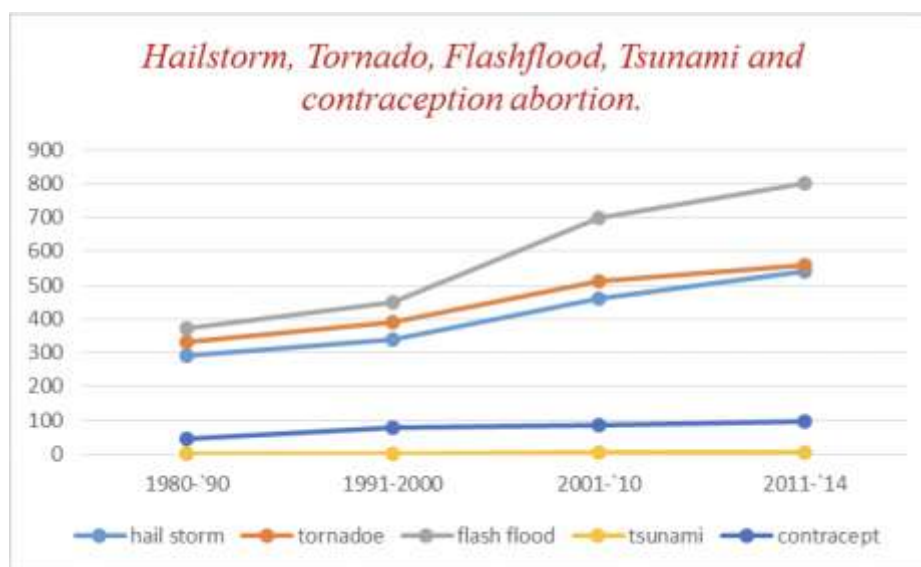

Figure 51 Increased prevalence of Hail Storms, Tornado, Flashflood, tsunami, consequent to global contraception, abortion Reference 20

A tornado is a violently rotating column of air that is in contact with both the surface of the earth and a cumulonimbus cloud or, in rare cases, the base of a cumulus cloud. They are often referred to as twisters or cyclones; although the word cyclone is used in meteorology, in a wider sense, to name any closed low pressure circulation. Tornadoes come in many shapes and sizes, but they are typically in the form of a visible condensation funnel, whose narrow end touches the earth and is often encircled by a cloud of debris and dust. Most tornadoes have wind speeds less than 110 miles per hour (180 km/h), are about 250 feet (80 m) across, and travel a few miles (several kilometers) before dissipating. The most extreme tornadoes can attain wind speeds of more than 300 miles per hour (480 km/h), stretch more than two miles (3 km) across, and stay on the ground for dozens of miles (more than 100km)

Global contraceptive menstrual blood pollution, aborted blood pollution results in progressive, cumulative depletion of oxygen of the air, water, leading to global hypoxia, ozone depletion, admixed with toxic gases emanation in the environment, by putrefaction of innumerable aborted fetuses, leading to global warming, hot air currents furthering on to rising incidence of devastating Hail storms, Tornadoes, *Figure 51* flash floods, tsunamis.

The small amount of oxygen remaining in the body is quickly depleted by cellular metabolism and aerobic microbes naturally present in respiratory and gastrointestinal tracts, creating an ideal environment for the proliferation of anaerobic organisms. *These multiply, consuming the body's carbohydrates, lipids, and proteins, to produce a variety of compounds including propionic acid, lactic acid, methane, hydrogen sulphide and ammonia. The process of microbial proliferation within a lifeless body is referred to as putrefaction and leads to the second stage of decomposition, [43] named as bloat. In the course of putrefaction, the skin tissues of the body rupture and release the bacterial gas. As the anaerobic bacteria continue consuming, digesting, and excreting the tissue proteins, the body's decomposition progresses to the stage of skeletonisation.*

Fish falling from the sky during storm [44] in Texas, in January 2022 *Figure 52*

Figure 52 Fish rain/ fish spout -fish falling from sky in Texas January 2022 Reference 44

Various types of tornadoes include the land spout, multiple vortex tornado, and waterspout. Waterspouts are characterised by a spiralling funnel-shaped wind currents, toxic, explosive inflammable gases including hydrogen sulphide forming currents beneath the soil, in waters, atmosphere connecting to a large cumulus or cumulonimbus cloud. Water spout,[fish rain] land spout [ants, sheep trapped in death circles], stunned dying birds, pigeons, ravens [toxic gases' regional convection currents] lands cracking in central areas, land subsidences, sinking towns, land slides, mountain slides, *-occurring secondary to putrefaction of innumerable aborted fetuses, putrefaction of millions of lifeless bodies of parents practising contraception abortion embracing early demise, putrefaction of enormous necrotic shed endometrial tissue menstrual blood pollution of global abortion, contraception, [one child policy small family norms]*

Figure 53 Hundreds of dead ravens fell from the sky in Russian village,October 2021 Reference 45

In a strange incident that took place in Russia, hundreds of dead ravens fell from the sky in October 2021, in Mexico February 2022, baffling locals and experts alike.*Figure 53* According to media reports, “several hundred” of the birds have been [45] falling each day, while other animals and birds apparently appeared unharmed.[birds succumbed earlier than animals to effects of convection currents set by toxic explosive inflammable gases e.g. hydrogen sulphide due to global abortion, contraception with its associated putrefaction] Some experts have predicted that the phenomenon of dead birds falling from the sky is an omen signifying that the end of the world is near, and termed the event as “aflockalypse. In 2013, reports of dead pigeons falling from the sky and behaving like “zombies” had come to light in Russia. Some of the birds were also seen flying

straight into the faces of passers-by. Many referred to the incident as “pigeon apocalypse.” Mystery of 2000 dead birds [46] falling from sky was seen in US state of Arkansas in January 2011 *Figure 54*

Figure 54 Mystery of dead birds falling from sky -US State Arkansas January 2011 Reference 46

Figure 55 Sheep walking in circles China November 2022 Reference 47

A flock of sheep from China have gone viral. In a video from China's Inner Mongol Region dozens of sheep have been walking in a circle for nearly 12 days without a break. *Figure 55* The farmer in charge of the flock reported that it first started with just a few numbers but was quickly joined by many. The surveillance footage shows the flock continuously walking clockwise in a circle. Some sheep can be seen standing motionless in the centre, while some stood outside watching the circling [47] sheep, in November 2022

Global contraception, abortion with its consequent inflammable, toxic, explosive gases including hydrogen sulphide, ammonia, methane forming convection currents in the Environment, -soil, beneath soil, air, water, in magnitude proportion to the prevalence of regional abortions, menstrual blood pollution by global abortions, contraception policy, results in these death trapped circling of animals, ants, stunned birds, pigeons, fish carried in water spout

The concept is global warming produced by ozone depletion, secondary to aborted blood pollution, contraceptive menstrual blood pollution, with toxic inflammable explosive gases namely hydrogen sulphide, ammonia, propionic acid, methane by putrefaction of innumerable foetuses, depleting the oxygen envelope, sets up convection currents results in the devastating Tornadoes; alas! Universe meant to support life on earth, with absent calculations of the Author of Life, to answer the unaware promoted, planned, destruction of millions of babes, Lives-global contraception, abortion; rapidly declining fertility rates, triumphantly, achieved by global

contraception, abortion, has resulted in increased incidence of powerful, drastic, dreadful tornadoes, snatching our loved ones.

They are generally classified as non-supercellular tornadoes that develop over bodies of water, but there is disagreement over whether to classify them as true tornadoes. These spiralling columns of air frequently develop in tropical areas close to the equator, and are less common at high latitudes..Other tornado-like phenomena that exist in nature include the gustnado, dust devil, fire whirls,[ant whorls, sheep whorls-beneath soil effect of toxic, explosive, inflammable gases secondary to global contraception, abortion, with associated putrefaction]] and steam devil; downbursts are frequently confused with tornadoes, though their action is dissimilar.

Figure 56 Ants trapped in death circles, Arizona June 2022 Reference 48

Army of ants are blind and use pheromones to follow trails of other ants, but if a trail loops they get locked running in an endless [48] circle.2019 Army ants get trapped in 'death circles', Arizona June 2022 *Figure 56*

Tornadoes have been observed on every continent except Antarctica. However, the vast majority of tornadoes occur in theTornado Alley region of the United States, although they can occur nearly anywhere in north America,They also occasionally occur in south-central and eastern Asia, northern and east-central South America, Southern Africa, northwestern and southeast Europe, western and southeastern Australia, and New Zealand

Figure 57 Sinking Town-land subsidence Uttarakhand -widening cracks in houses, roads, collapse January 2023 Reference 49

January 05/ 2023, news- cracks in the soil, roads, houses leading to collapse of buildings, can bury lives-Land Subsidence, increasing by every hour requiring exodus of people from houses in Uttarakhand is noticed probably secondary to toxic, inflammable, explosive gases namely hydrogen sulphide, ammonia, propionic acid

formed by regional/global putrefaction of global contraceptive, aborted menstrual blood pollution associated necrotic, lifeless tissue, fetuses, bodies collecting beneath [49] soil surface in the globe producing soils bursting cracking, land subsidences, sinking towns. *Figure 57*

Figure 58 Entry of blood feeding animals to foothill townships consequent to blood pollution of global abortions, contraception Reference 50Amaze Lab

20 fold rise in frequency of entry of blood feeding animals like tigers, cheetahs to human habitat of foot hill townships, by aborted blood, [50] contraceptive menstrual blood polluted environment of river, sea waters, air. *Figure 58*

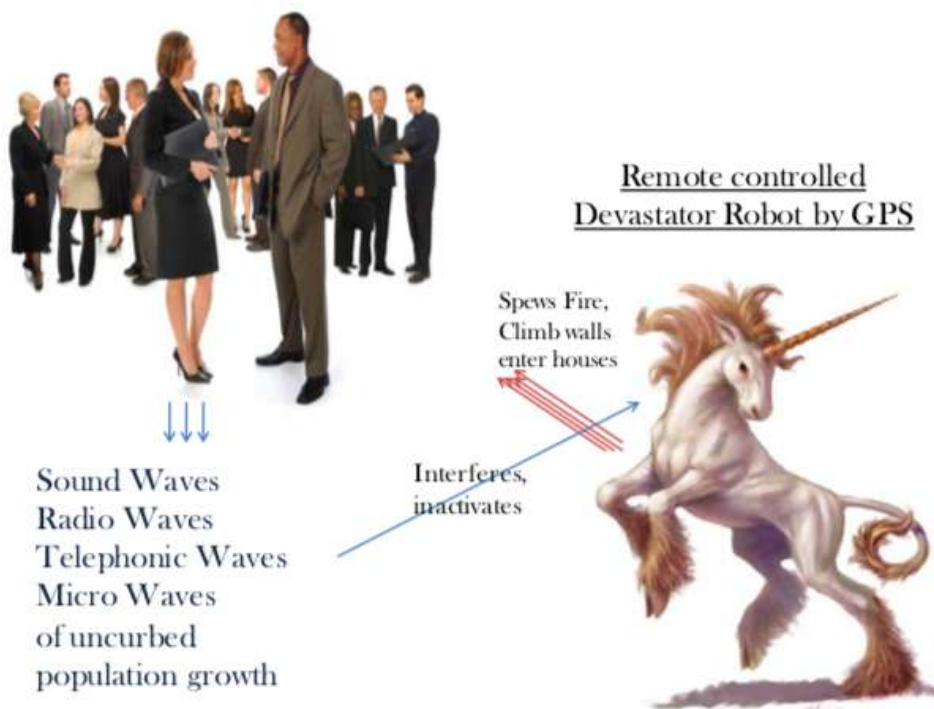

Figure 59 Devastator Robot [remote controlled] deactivated by many peoples micro frequency waves, sound waves Reference 50

Non nuclear robotic war made possible with absent human beings by global contraception, abortion, with their sound waves, radio waves and phone waves, micro-frequency waves being absent, otherwise capable of interfering with remote controlled devastator robots *Figure 59*

Figure 60 Patriotic Robot nullifying devastator Robot by millions of micro frequency waves to interfere with remote control operations, to reroute devastator Robot by alternate GPS to seas Reference 50 Patriotic robots able to generate million sound waves, microwaves, radio waves, mobile phone waves, will interfere and inactivate devastators to be rerouted to seas, by alternate Global positioning systems. *Figure 60*

Figure 61 Consequent to global aborted, contraceptive menstrual blood pollution, sparse people-frequent entry of tigers to foothills, remote controlled devastator robot entry made possible Reference 50
 Ultimate answer to global threats is emergency Baby Boom, mandatory implementation of Earth Bus Fare norms [many child birth per family] eradication of global contraception, abortion, coupled with mandatory contraception reversal, including free tubal recanalisation for the entire globe. With global abortion, contraception, sparse people, reduced human density, with drastically declining fertility rates, demography quoting in another decade <5 years will become <5%, [ie todays 5 years are tomorrows world, so 95% of human race stealthily eradicated by global contraception, abortions, planned parenthood, one child policy, small family norms] frequent entry of blood feeding animals entry to foothills, remote controlled devastator robot are made possible *Figure 61*

Figure 62 urgent solution on approach of devastator robot-people to flee to mountains without GPS, patriotic robot producing millions of micro frequency waves with interference, alternate GPS to reroute to seas Reference 50

Urgent solution/caution for people during devastator operation [if it succeeds], is not to enter houses, but to flee to mountains, lacking the global positioning system. *Figure 62*

Remote controlled Intercontinental Ballistic missiles, Unmanned Air Vehicles -UAV-drones mediated artillery, drones mediated robbery {on many track roads [eg. Queen Elizabeth Ways] with few people walking,} achieved by reduced human density with their reduced interferences - by guillotine protocol -non therapeutic -global abortions, contraception

Peoples needs for daily living, shelter, comfort, transport, education ... are the means for business ; if all the millions of innumerable, darling babes, unborn children, who had gone down the drain as abortions, contraception, had been born, there would be no recession today, it would be flourishing business of all sectors, because the growing needs of growing people of nations would match or undermine the supply leading to signs

of innovations, growth, flourishing economy; November 7th 1997 United Nations experts opined that 5 countries namely Thailand, Bahamas, Italy, Mongolia, Singapore, had negative birth rate, whereas India had replacement rate i.e. 0.5% difference from Italy; experts had warned India, China, not to reduce the population, if reduced there would be no personnel for army, there would be economy crisis, as example Italy.

Today we are observing, luxurious transports without passengers, big bazaars without customers –closing shops; hospitals with modern technology with advanced therapeutics but reduced recovering, healed patients; schools, colleges with less students, banks with few customers; growth, production as initiated, by population with needs, in 20th century(1950s), when achieved gloriously, did not see the customers by mid 20th, 21st century, who were robbed off, guillotined by abortions, contraception, resulting in agonising recession, including cost per head escalation; *population is the potential in which we invest to see returns,hence the global recession, secondary to global abortion, contraception*

Conclusion:

Comprehending ‘Concept of Displacement’ [existing in creation] consequent to rotation, revolution of Celestial objects-Planets in our Solar system, the atmosphere in which their orbit exists, gets displaced, with resultant air circulation, to come back on their surface to effect Gravity; for e.g earth displaces 6 times more quantum of atmosphere to return on its surface as 6 times more gravity than lunar surface

By the Concept of Displacement -comprehension-when all the nine planets are rotating, revolving in their elliptical orbits as the Author of the Universe has ordained them, *the displacement of their atmospheres with their constituent gases, converging towards the centre -resultant Sun-collection of displaced and converging gases by the planets’ revolution in their orbits, to the centre of Solar system with other constituting gases-*

ignition, lighting the earth, with associated solar radiation, layer of ozone [oxygen] stratosphere instituted, by Author of Life to shield the earth.

(Before the era of contraception, abortion) *Earths atmosphere* was an ocean of gases constituted by Nitrogen - 78%, Oxygen 21%, Other gases and water vapour 1%- Author of Life had instituted to sustain Life on Earth. After the Era of contraception, abortion, when lives on earth were terminated, prevented, destroyed, with spilt blood resulted in

Environmental blood [maternal, foetal, placental blood] pollution- evidenced by documented rising environmental (air, water) Oestrogen, alpha foeto Protein, Beta human Chorionic gonadotropin;

Environmental Blood (pollution) binds avidly with oxygen, depletes Ozone-, leading to global hypoxia, increased solar radiation;

global contraception, abortion, with associated putrefaction of necrotic tissue, emanates Toxic, explosive, inflammable gases namely Hydrogen Sulphide, Ammonia, propionic acid to atmosphere, environment [air, water, soil, beneath soil] -evidenced by documented *Lethal brine pool of Hydrogen Sulphide in red sea, Oceans, Seas;*

Environmental toxic, explosive, inflammable gases eg. hydrogen sulphide, consequent to global abortion, contraception with associated putrefaction, extends upto Sun by Displacement Concept (existing in the Universe by rotation, revolution of Celestial Objects) leading to inevitable Ecological disasters e.g.. geomagnetic storms, coronal mass ejections, resultant black spots in sun...

Photosynthesis by leaves of plants requires Carbon dioxide from lives on earth to generate, replenish Oxygen (usurped by lives, fossil fuels-transport for lives) -Ozone-Self Sustaining Ecology; everything required by Lives on Earth-Author of Universe reacts in different stratospheres

so 'Carbon Dioxide can never deplete Ozone' but carbon dioxide will generate ozone, by leaves

rather carbon dioxide of lives alone[breath in nostrils, lives' emissions by utility, fuel] is mandatory for generation, replenishment of ozone -Self Sustained Ecology as comprehended by Physics, Physiology, Botany, Pathology, forgotten Lower Kindergarten Sciences

Mandatory global implementation of Earth Bus Fare norms -Many Child Birth per Family-which is a Royal Diadem for Womanhood/Motherhood-alone can restore Self Sustaining Ecology, Economy, Life on Earth, ordained by Author of Life.

The Global Environmental Blood Pollution-consequent to Global Contraception Abortion, [Planned Parenthood, One Child Policy, Small Family Norms] depletes Ozoneavidly [cannot be replaced by plants as with live People, Cattle, Lives on Earth with Carbon Dioxide emissions, regenerating Oxygen envelope-Ozone]- Environmental Blood Pollution is evidenced, documented by rising Environmental [Air, Water] Oestrogen, Alpha Foeto Protein, Human Chorionic Gonadotropin.

Before the era of contraception/ abortion, blood from culling of birds, cattle, animals-blood pollution to environment-did cause infrequent ecological disasters, mild infections-as tuberculosis, streptococcal infection , staphylococcal infection...life time immunity with vaccines for diseases...

Now with Era of Contraception Abortion-Putrefaction of innumerable aborted fetuses, putrefaction of enormous necrotic shed endometrial tissue with menstrual blood pollution consequent to one child policy, small family norms, planned parenthood, putrefaction of bodies of millions of parents practising contraception, abortion, embracing early demise, release to the environment [air, water, soil, beneath soil] toxic, explosive inflammable gases namely hydrogen sulphide, ammonia, propionic acid, Lactic acid, methane, evidenced by Hydrogen Sulphide Lethal Brine Pools in Red sea, Atlantic Ocean, Seas, Oceans, resulting in global Ecological disasters

Documented environmental [Air, Water,Soil] Blood Pollution depleting Ozone, combined with documented Toxic, Explosive, Inflammable Gases including Hydrogen Sulphide, Ammonia, release to environment /air/water/soil/beneath soil/atmosphere reaching the sun by displacement concept by revolving, rotating celestial object -Earth, has resulted in inevitable -Coronal Mass Ejections, geomagnetic storms, Solar tsunami, Solar storm, resultant black spots in Sun, [destroying space stations/satellites] blood Moon, anticipated black outs, weakened Earths magnet, Earth slackening from its orbit, land subsidence, [widening cracks in soil, roads, houses, leading to collapse of buildings, can bury lives/sinking towns;] Aborted contracepted menstrual blood polluted Red River ways; stunned dead Ravens, Ants trapped in death circles, Pigeons, Birds dropping dead, Sheep going in circles, Fish rain or Fish spout [resemblance to a funnel shaped storm/current effect by toxic, explosive, inflammable gases] in the land, waters, air, beneath ground; Cracks in soil, Land slides, avalanches, mountain splits, mountain slides, earthquakes, Volcanoes, eruption of Ring of Fire, land fire, Forest fire, oil Fire, Oil Tanker vessel Fire, spontaneous combustion in skies, Tsunamis;Increasing, emerging drug resistant microbes-including corona virus, Nipah Virus, Ebola virus, making polyvalent vaccines -40% effective; locusts, wasps, bees, insects; earth bursting/ruptures coasts-tsunamis, increasing lightning strikes, hail storms, tornadoes, cyclones, storms, snow storms, sand storms, flash floods instead of monsoon rains normally occurring by earths rotation -before era of contraception, abortion; blizzards, global warming, global hypoxia, ozone depletion,

famine, drought, glaciers of ice melting, sea levels increasing; disappearance of birds, animals, water-living, islands; toxic fumes inhalation resulting in death of well diggers, septic tank cleaners, miners; blood polluted obnoxious air inhalation resulting in increase in Lung Cancer, Chronic obstructive lung diseases, endo-bronchial tuberculosis; blood polluted water ingestion, water turns bitter unless its uncontaminated by aborted blood- bore water from within a rock; blood feeding animals like Tigers frequent visiting to foothill townships, animals like elephants, bears due to pronounced hypoxia in altitudes during summer come down to foothills, die thereafter; absent/lacking interferences by trillions of human micro frequency waves, mobile communications, voices, existence-enables remote controlled Intercontinental ballistic missiles, unmanned air vehicles-drones mediated robbery, artillery, Non nuclear Robotic war; less human density -less social security, inflation, global recession 275% increase in diseases [degenerative, neoplastic, autoimmune, infectious diseases] to parents practising contraception, abortions; resulting in 5 fold increase in mortality;500% increase in diseases -status post operative hysterectomy -for both parents.

Global hard hit Recession follows inevitably, consequent to global abortion, contraception, by which Demography depicts-a crisis-95% of human race is eradicated [depicted by demography assessment - <5 years age group will be reduced to <5% in a decade, by drastically declining fertility rates] people of nations [population] are the potential in which we invest to see returns; business exists to meet human needs of varied categories; resulting in presence of providers, investors but no buyers, utilisers, passengers, customers,- inevitable hard hit global recession ensues/invested money returns cannot be seen; self sustaining Economy for, by, Lives on earth collapses agonisingly.

A miniature solar system with nine planets, dwarf planets [globe simulating with without magnet, mini objects] battery initiated to operate/ rotate and revolve in their elliptical circuits-as scaled down proportionate to actual solar system's orbital data in mini/tiny units, representing solar system, can result in displaced gases accumulating/ converging in the centre of miniature solar system, with ignitable energy -could have been siphoned/ routed with control to propel locomotion/ flying/lighting could have been considered [nth distant probability-before the era of contraception, abortion]

Guaranteed elimination of Global Ecological disasters, Global Recession, escalating global mortality, morbidity by

mandatory eradication/abolition/extinguish of Global Abortions, contraception, [extinguish planned parenthood, one child policy, small family norms, (premarital, extramarital affairs, adultery,)] coupled with Contraception Reversal-reversal of permanent sterilisation-Fallopian Tubal re-canalisation, Vas Deferens re-canalisation, removal of implants, copper Ts, Intra uterine devices, diaphragms [as cause and effect phenomenon] and

urgent promotion, implementation of Earth Bus Fare Norms -many Child birth per family only after Holy Matrimony-Royal Diadem for parents -as ordained by the Author of Universe to restore with absolute guarantee Self Sustaining Ecology, Economy, Life on Earth -as it was prior to the era of contraception, abortion.

Key Points:

—CARBON DIOXIDE EMISSIONS by LIVES on EARTH (by their breath, fossil fuel emissions)—>utilised for PHOTOSYNTHESIS by leaves of plants—>RESULT in OXYGEN /OZONE GENERATION ie *SELF SUSTAINING ECOLOGY* ordained by Author of the Universe to sustain Lives on Earth

—so CARBON DIOXIDE of Lives can never DEplete OZONE, rather REPLENISHES OZONE/OXYGEN

—LIVES TERMINATED, PREVENTED, DESTROYED(global contraception, abortions, one child policy, small family norms)—>results in ENVIRONMENTAL MENSTRUAL, ABORTED BLOOD POLLUTION, combined with ENVIRONMENTAL TOXIC, EXPLOSIVE, INFLAMMABLE GASES—> leading to INNUMERABLE INEVITABLE ECOLOGICAL DISASTERS

ENVIRONMENTAL BLOOD (POLLUTION) BINDS AVIDLY WITH ENVIRONMENTAL OXYGEN DEPLETING OZONE—>GLOBAL HYPOXIA, GLOBAL WARMING...

—GROWING DEMOGRAPHY/PEOPLE of NATIONS—>INCREASE in VARIOUS NEEDS/DEMANDS/BUSINESS —>eg. INCREASE in CUSTOMERS, BUYERS, PASSENGERS..——>SPLENDID GROWTH in ECONOMY/GUARANTEED INVESTED MONEY RETURNS—>Flourishing *SELF SUSTAINING ECONOMY* ordained by the AUTHOR of LIFE (before the era of global contraception, abortion)

—Dwindling DEMOGRAPHY/DRASTICALLY DECLINING FERTILITY RATES(global abortion, contraception, one child policy, small family norms)—>DISAPPEARED CUSTOMERS, BUYERS....—>NO RETURNS of INVESTED MONEY—> HARD HIT GLOBAL RECESSION

— INCREASE in PARENTS LIFE by ~10 years by One Boy childbirth, ~20 years by one Girl Child Birth (mediated byPlacental Oestrogen of >30,000 p g/ml); so EARTHS BUS FARE NORMS/MANY CHILDBIRTH per FAMILY only after HOLY MATRIMONY—>blesses both parents with LONG LIFE/*SELF SUSTAINING LIFE*, as ordained by the Author of Life

—secondary to destruction of Germ Cells, placental/foetal/maternal tissue (by Global abortion, contraception, small family norms, abortion) with associated agonisingly reduced endogenous oestrogen, androgen, impaired cell metabolism —>275%INCREASE in DEGENERATIVE, NEOPLASTIC, AUTOIMMUNE, INFECTIOUS MORBIDITY, with ASSOCIATED 5 FOLD INCREASE IN MORTALITY in BOTH PARENTS PRACTISING CONTRACEPTION, ABORTION

—Putrefaction of (a) innumerable aborted foetuses, (b) putrefaction of enormous necrotic endometrial, maternal, foetal, placental tissue, (c) putrefaction of millions of bodies of parents embracing 5 fold increased mortality secondary to global contraception, abortion —>RESULTS IN RELEASE OF TOXIC, EXPLOSIVE, INFLAMMABLE GASES FOR E.G.. HYDROGEN SULPHIDE, AMMONIA TO THE ENVIRONMENT-EVIDENCED BY LETHAL BRINE POOL CONTAINING HYDROGEN SULPHIDE IN RED SEA DEPTHS, OCEANS, SEAS

GLOBAL CONTRACEPTION, ABORTION —>ENVIRONMENTAL BLOOD POLLUTION— EVIDENCED BY RISING ENVIRONMENTAL OESTROGEN, ALPHA FOETO PROTEIN, BETA HUMAN CHORIONIC GONADOTROPIN

Before the era of contraception, abortion -CONCEPT OF DISPLACEMENT INITIATED BY ROTATION, REVOLUTION OF CELESTIAL OBJECTS-EARTH, AS ORDAINED BY THE AUTHOR OF UNIVERSE-enables comprehension -DISPLACED ATMOSPHERIC OCEAN OF GASES CONVERGE TOWARDS CENTRE-AUTHOR OF THE UNIVERSE UTTERED SUN TO EXISTENCE

—CONCEPT OF DISPLACEMENT EXISTING IN THE UNIVERSE, AS ORDAINED BY THE AUTHOR OF UNIVERSE, INITIATED BY ROTATION, REVOLUTION OF CELESTIAL OBJECTS-EARTH - ENABLES COMPREHENSION-(AFTER THE ERA OF CONTRACEPTION ABORTION)DISPLACED BLOOD POLLUTION DEPLETING OZONE, COMBINED WITH DISPLACED TOXIC, EXPLOSIVE INFLAMMABLE GASES, CONVERGE TOWARDS THE CENTRE OF SOLAR SYSTEM —> LEADING TO GEOMAGNETIC STORMS, BLACK SPOTS IN THE SUN, SOLAR TSUNAMI...INNUMERABLE INEVITABLE ECOLOGICAL DISASTERS

—miniature Solar system with battery operated objects revolving in elliptical circuits with converging displaced gases -ignitable energy (nth distant probability could have been considered before the era of contraception, abortion)

—Displaced atmosphere by rotation revolution of celestial objects, sets up air circulation/air currents to return on their surface, effecting Centre of Gravitational Force; proportionate to their surface/mass displacing the atmosphere.

—ABOLITION of GLOBAL CONTRACEPTION, ABORTION coupled with INSTITUTION OF CONTRACEPTION REVERSAL, IMPLEMENTATION of EARTH BUS FARE NORMS-MANY CHILDBIRTH PER FAMILY [only after Holy Matrimony] GUARANTEES RESTORATION of SELF SUSTAINING -ECOLOGY, ECONOMY, LIFE on EARTH

26. Elizabeth JS: Increased Prevalence of Severe Rheumatic Heart Disease Requiring Early Valve Replacement Surgery and Fragmented Germ Cells; International Journal of Clinical Medicine, 2014, 5, 1392-1399
27. Elizabeth JS: Increased Prevalence of Neuroleptic Malignant Syndrome, Dementia and Fragmented Germ cells with Reduced Endogenous Oestrogen; International Journal of Science and Research (IJSR), Volume 3 Issue 8, August 2014, pages 1694-1702.
28. Elizabeth JS: Auto immunity and fragmented Germ Cells; IOSR Journal of Dental and Medical Sciences (IOSR-JDMS) Volume 13, Issue 9 Ver. VI (Sep. 2014), PP 99-105
29. Elizabeth JS: Increasing Prevalence of Osteoporosis, Hypothyroidism and Endogenous Oestrogen with Germ Cells; Open Journal of Rheumatology and Autoimmune Diseases, 2014, 4, 131-137
30. Elizabeth JS: Cancer and Germ Cells; Open Journal of Preventive Medicine, 2014, 4, 606-615
31. Elizabeth JS: Increased prevalence of liver diseases and fragmented germ cells with reduced endogenous oestrogen; Increasing prevalence of Hepatitis B Virus and rising environmental oestrogen; International Journal of Scientific & Engineering Research, Volume 5, Issue 8, August-2014, pages 770-779
32. Robert W. Mahley and Thomas P Bersot: Drug Therapy of Hyper-cholesterolemia and Dys-lipidemia, Goodman and Gilman's The Pharmacological Basis of Therapeutics-10th edition, page-983.
33. Elizabeth JS: Increased Prevalence of Acute Coronary Syndrome and Fragmented Germ Cells with Reduced Endogenous Oestrogen; International Journal of Medical and Applied Sciences; Volume 3, Issue 3, 2014 pages 104-111
34. Elizabeth JS: Increased Prevalence Of Hernia, Uterine Descent, Fibrous Adhesions, Retroperitoneal Fibrosis And Germ Cells With Endogenous Oestrogen, International Journal of Innovative Research and Studies; Volume 3, Issue 8, August 2014, pages 187-194
35. Elizabeth JS: Increased Prevalence Of Dermographism, Filariasis, Mosquito Borne Diseases And Rising Environmental Oestrogen Equating With Aborted Blood, Contraceptive Menstrual Blood Pollution; International Journal of Scientific Research and Engineering Studies (IJSRES) Volume 1 Issue 3, September 2014, pages 5-10
36. Elizabeth JS: Increased Prevalence Of Renal Diseases -Metabolic Syndrome And Fragmented Germ Cells With Reduced Endogenous Oestrogen: Androgen; International Journal of Innovative Research and Studies, Volume 3, Issue 9, September 2014, pages 71-85
37. Elizabeth JS: Increased prevalence of Solar Keratoses, Infectious diseases and rising Environmental Oestrogen equating with aborted blood, contraceptive menstrual blood pollution with consequent ozone depletion. IOSR Journal of Environmental Science, Toxicology and Food Technology (IOSR-JESTFT) e-ISSN: 2319-2402, p-ISSN: 2319-2399. Volume 8, Issue 9 Ver. I (Sep. 2014), PP 74-80
38. Elizabeth JS: Autoimmune Thrombotic Thrombocytopenic Purpura, Disseminated Intravascular Coagulation, Haemo-phagocytic Lympho Histiocytosis—(Following Corona Virus Infection), Secondary to Fragmented Germ Cells {Liberal Global Abortions, Contraception—(Red River-ways, Blood Moon, Weakened Earth's Magnet)} and Absence of Abstinence, Open Journal of Rheumatology and Autoimmune Diseases, 2020, 10, 132-145
39. Monster Magnet Meets Blood-Brainiac 75 You Tube, October 27, 2017.
40. Elizabeth JS: Abortion, Contraception Reversal- Medical Miracle- Autologous Germ cells replant- Decline in global degenerative, autoimmune, neoplastic, infectious diseases; decline in rising environmental oestrogen [equating with aborted blood pollution] and decline in depletion of ozone; IOSR Journal of Dental and Medical Sciences (IOSR-JDMS) e-ISSN: 2279-0853, p-ISSN: 2279-0861. Volume 13, Issue 9 Ver. I (Sep. 2014), PP 93-102
41. Elizabeth JS "Withered Tree" Concept Host, Achieved by Global Contraception and Abortion, Secondary to Fragmented Germ Cells, Agonisingly Reduced Endogenous Oestrogen/Androgen, Defaulted Genomic Repertoire, Deranged Cell Metabolism, Metabolic Syndrome,

Result in Failure of Pharmacological Therapeutics with Advanced Technologies Open Journal of Preventive Medicine, 2015, 5, 186-195; Published Online April 2015

42. Elizabeth JS: Osetamevir Helps Cure COVID 19, Corona Pandemic Carried by Global Abortion/Contraception, Global Blood/Necrotic Tissue Environmental Pollution; Guaranteed Elimination of Corona/Recession/Ecological Disasters [Including Coronal Mass Ejections, with Resultant Black Spots in Sun] by Implementing Many Childbirth per Family [Earth Bus Fare Norms] Contraception Reversal; Abolition of Global Contraception, One Child Policy, Small Family Norms, Abortion [Jumping off Cliff to Fly]; Open Journal of Preventive Medicine, 2021, 11, 347-367
