

**Contents :**

Design, Fabrication and Performance Analysis of a Mixed Mode Solar Dryer for Black Soldier Fly Larvae	01-08
Study Of Optimum Parameters In Enhancing The Performance Of VCR Engine Using Taguchi Method	09-14
The Green Infrastructure Model Based On Waterlogging Mitigation In The Street Landscape Of Sungai Penuh City, Jambi Province	15-23
Smart Materials And Their Applications In Aerospace Engineering	24-26
Addressing Infrastructure Design Challenges In Constructing At-Grade Rail Crossings Near Road Intersections	27-33
Advancements In UAV Wing Design: Aerodynamic Performance, Structural Integrity And Optimization Techniques	34-37
Effects Of Seawater On The Compressive, Flexural And Split Tensile Strength Properties Of Reinforced Concrete	38-43
A Review Of Effective Energy Utilization And Optimization In Hospital Buildings – Environmental And Economic Benefits	44-52
Experimental Analysis Of Two Unreinforced Masonry Walls Under Cyclic Loads, And Its Retrofitting Through CFRP	53-60
