Abstract: It is being believed that by writing word Ram on stones could make stones floating , it is Myth . Floating of stones while making Adam's Bridge was a lawlessness triggered by unconditioned thought expressions by first order of universe leading to change in programming (Code PcPs floating) of gravity interactions which was previously programmed for sinking (Code PcPs sinking) by M2 . It is the mind of M2 that orders sinking effect when energized gravitons from M1 come and interacts with interacting surfaces of atoms of stones of M2 . It is science of prayer (Atomic genetics engineering) that underpins floating of stones done by Lord Ram . The phenomenon ended with end of the period of stay of Lord Ram in Shri lanka i.e. the reversal of programming . With the result floating stones got sunk . There are many thoughts that design the sinking or floating effects . There is feedback to higher centers before next thought is triggered . During transmutation of phenomenon of sinking to floating or vice versa , sinking thoughts get suppressed , and floating thoughts get triggered and vice versa . It is Almighty B.B.B , The Creator B.B.B Who was designing the phenomenon by request of Lord Ram by quantum entanglement .

I. Introduction

Ram Setu is not God's miracle [1]

Battle between Science & Spirituality is running over a decade. Science relies on logics , facts & proofs whereas Spirituality is largely related to belief. According to Hindu belief Ram Setu was built by Lord Rama to cross the sea. Stones used to make the bridge floated on water because Rama was written on stones. But there is a complete scientific explanation why stones floated on water & why now Ram Setu is under water.

About Pumice stone in Ram Setu

Pumice is one such stone that floats on water. Pumice is the name given to the hardened foam of lava when it comes out of a volcano. The inside of a volcano has very high pressure, and can be as hot as 1600 degree Celsius. When the lava comes out of the volcano, it meets the cool air (and sometimes sea water), which is around 25 degree Celsius.

Dense stones do not float on water

But because pumice is full of air bubbles, it is less dense than water. So in the beginning it will float. But in time, water will enter the bubbles driving out the air. Slowly, the pumice sinks. This also explains why the Ram Setu is under water today. Pumice doesn't float forever. However, this theory is not 100 per cent correct. Read on to know how some scientists dismiss the Pumice stone theory....

Strange floating stones of Rameshwaram

Some floating stones are found on the coastal regions of Rameshwaram. These stones are similar to any other stone and possess the same features, physical and chemical composition like the stone you may find in your locality. Seeing these stones from a far distance, you may feel that this stone is made of corals but on physical examination, it is found that this is not a coral stone...and neither is it a pumice stone!

NASA images of Ram Setu

This bridge made of floating stones can still be seen between India and Sri Lanka from Rameshwaram, the place where Lord Ram prayed to Lord Shiva and started the construction of the bridge. Since this story is very old and unproven, many historians, scientists and archaeologists deny accepting this bridge to be built by Lord Rama but at the same time they are unable to explain the concept of floating stones found in Rameshwaram.

Unknown science behind floating stones (Ram Setu)

Until the scientists come up with a convincing theory maybe we can consider Rama Setu as an engineering masterpiece. The technology once existed to make stones float on water and the architect like Nala and Neela were too advanced in building a bridge from India to Sri Lanka within 5 days with the help of dedicated work force of million Vanaras.

NASA's Image

The famous NASA satellite footage from 2002. The US scientific body, however, chose to distance itself from any religious interpretation. NASA said, "The image may well be ours, but their interpretation is certainly not ours. Remote sensing images or photographs from orbit cannot provide direct information about the origin or age of a chain of islands, and certainly, cannot determine whether humans were involved in producing any of the patterns seen."

Adam's Bridge

A map from later centuries also refers to Ram Setu as Adam's bridge. Also, the Geological Survey of India's report named the Project Rameshwaram and termed this bridge to be used as a means to travel between India and Sri Lanka some about 7,000-10,000 years ago.

Rama's Bridge: Where Modern Science And Ancient Myths Collide [1]

How Just writing Ram , stones could float .

Historians, archeologists and researchers in our distant past insist that civilized life began on the Earth about 5,000 years ago. They point to the fact that there is no hard evidence to support the existence of a preexisting culture prior to the rise of the Sumerians and the Egyptians. When alternative historians such as John Anthony West, Robert Schoch and Graham Hancock, proposed that structures on the Giza plateau in Egypt may be far older than currently accepted, their claims were quickly dismissed. Unfortunately for us, no written record exists which documents the date of their construction so these complex masterpieces are placed in the generally accepted timeline of human development and culture.

But what if there was evidence? What if a structure that was clearly identified in our written and oral traditions were to be found? And what if the stories associated with that site put it unmistakably outside the generally accepted timeline? If an analysis of both the structure and the associated myths were done and they were both supported by modern science, could it change the face of history, a history we held so dearly? This just might be what has happened at a discovered site in India. Located in the Palk Strait off the Southeastern edge of India is a chain of limestone shoals. A shoal or sandbar is characterized by a long and narrow strip of land typically composed of sand, silt and small pebbles that have been deposited over time. This strip of land was once believed to be a natural formation, however, images taken by a NASA satellite has shown this land formation to be a long broken bridge under the ocean's surface. Now called "Adam's Bridge", it extends 18 miles from mainland India to modern day Sri Lanka.

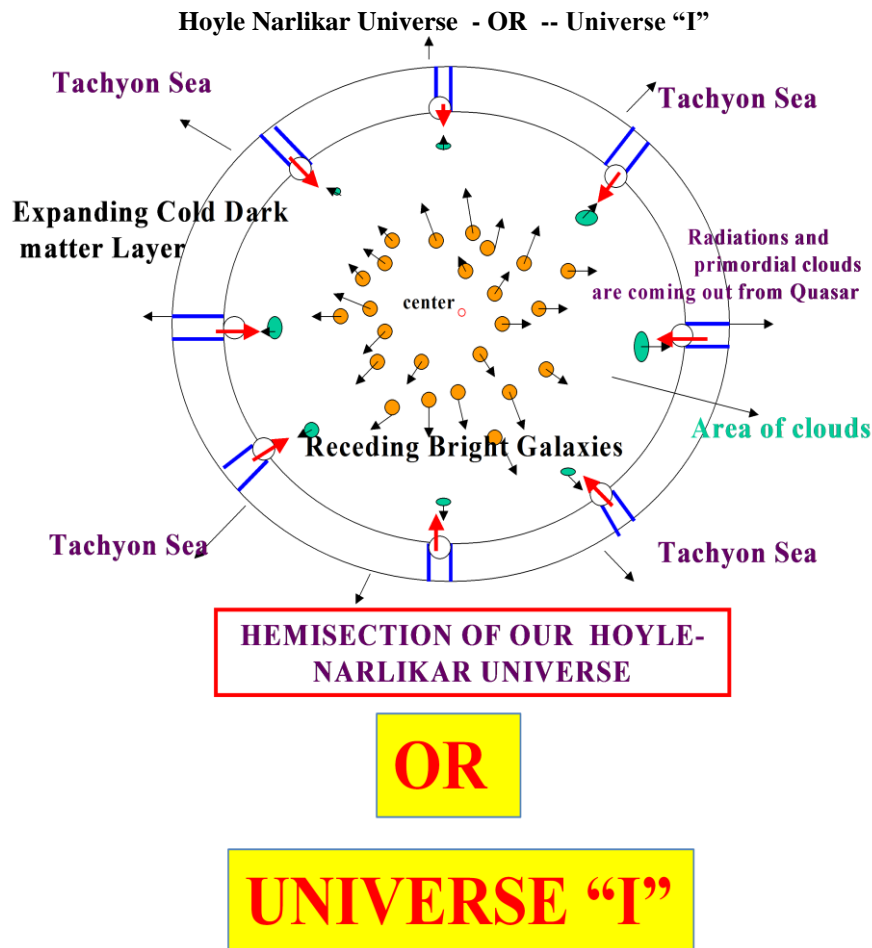

The location of Adam's Bridge between India and Sri Lanka

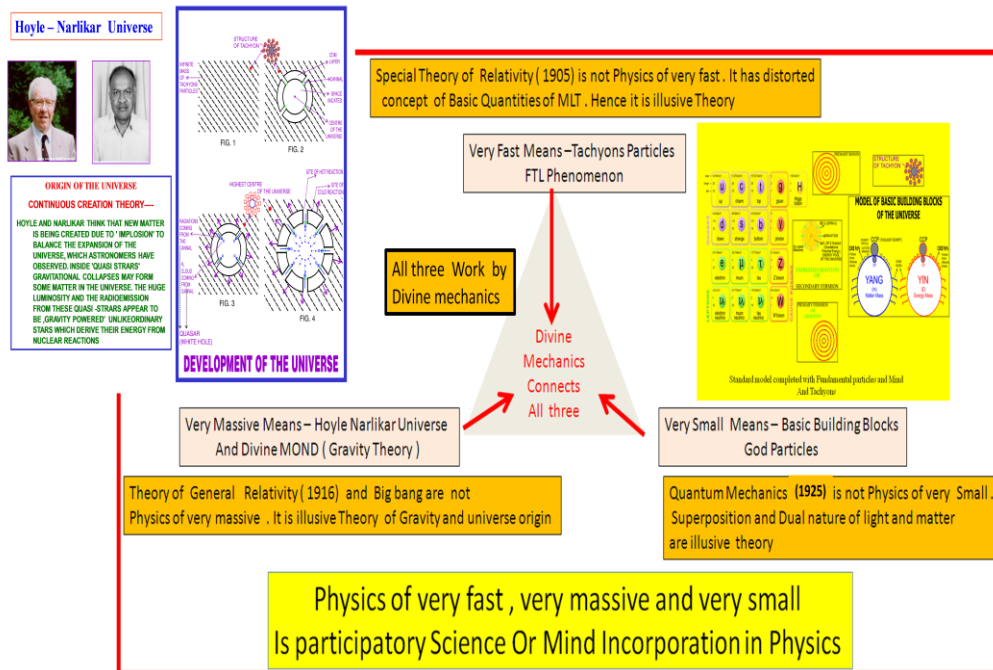

Hindu tradition has long held the belief that this strip of land was a bridge built by their beloved deity Rama as described in the Hindu epic the *Ramayana*. It has been referred to since antiquity as "Rama's Bridge" or Rama Setu. Rama is a popular figure in Hindu mythology. The book that chronicles his life, the *Ramayana*, is a time honored classic. It tells of a time when the gods flew on ships through the air and of giants and monsters that walked the earth. Researchers who have analyzed the *Ramayana* state that it is an overambitious work of fiction. Is that true? Or is it possible that Adam's Bridge is actually the structure described in this Indian classic?

A number of pieces of evidence support the claim that Adam's Bridge is the same one described in literature.

Rama, according to the *Ramayana*, was sent into exile because of a promise his father had made many years before. Rama was joined by his brother Lakshmana and his wife Sita. Through the course of a number of unfolding events, Sita is kidnapped by the 10-headed demon-king Ravana. Rama, in an attempt to rescue Seta, assembles an army which includes a large group of ape men, the Vanara. It is discovered that Sita is being held captive on the island of Lanka. Rama, unable to move his massive forces of ape men across the ocean, is advised by the sea god to build a bridge across the water. Rama enlists the help of the Vanara for its construction. The Vanara build a causeway between the mainland to Lanka, constructing it of rocks and boulders, which are described as resembling mountains. The building project is said to have lasted for five days and to have been 100 leagues in length. The bridge, once completed, allowed Rama to transport his army of Vanara across the ocean to Lanka. Once there, Ravana is killed and Sita, Rama's wife, is returned. According to Hindu tradition, Rama lived during the Treta Yuga, a period of time that began 2,165,000 years ago and extended until about 869,000 years ago. On the surface, this claim seems absurd. One assumption that is often made is that Rama and the many characters that fill the *Ramayana* are men and women as we currently know them. This however does not explain individuals like the 10-headed demon-king Ravana and other strange individuals who inhabit the *Ramayana's* pages. If you let go of the belief, just for one moment, that the figures described in this epic tale were human as we currently know them to exist, you will see how only in this light will all of this make sense.

What is New Physics or Physics of Mind ?

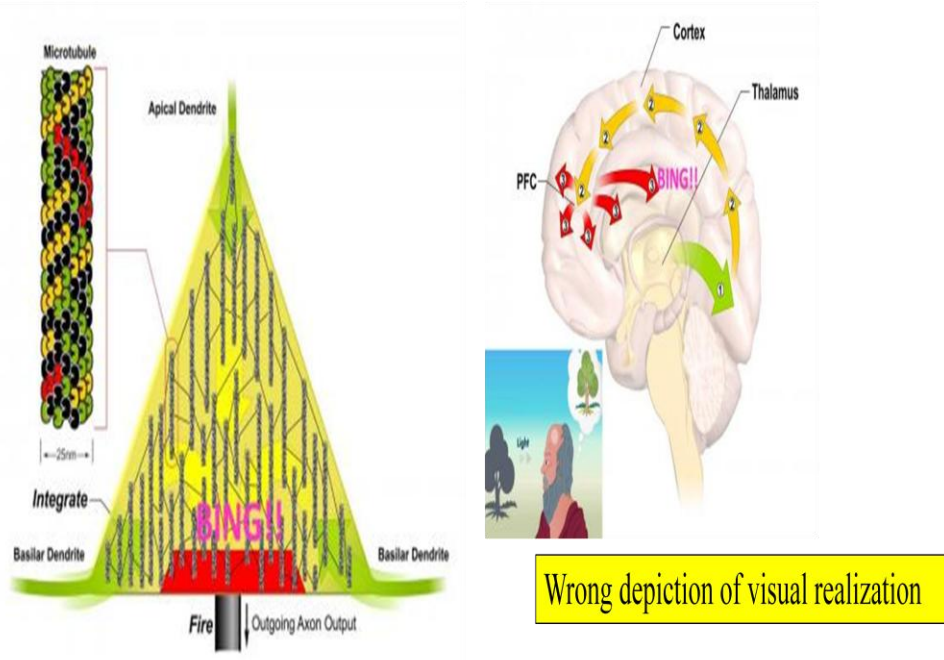

Physics of Mind

Quantum Consciousness – According to Physicists and Biologist

The nature of consciousness remains deeply mysterious and profoundly important, with existential, medical and spiritual implication. We know what it is like to *be* conscious – to have awareness, a conscious ‘mind’, but who, or what, are ‘we’ who know such things? How is the subjective nature of phenomenal experience – our ‘inner life’ - to be explained in scientific terms? What consciousness actually *is*, and how it comes about remain unknown. The general assumption in modern science and philosophy - the ‘standard model’ - is that consciousness emerges from complex computation among brain neurons, computation whose currency is seen as neuronal firings (‘spikes’) and synaptic transmissions, equated with binary ‘bits’ in digital computing. Consciousness is presumed to ‘emerge’ from complex neuronal computation, and to have arisen during biological evolution as an adaptation of living systems, extrinsic to the makeup of the universe. On the other hand, spiritual and contemplative traditions, and some scientists and philosophers consider consciousness to be intrinsic, ‘woven into the fabric of the universe’. In these views, conscious precursors and Platonic forms preceded biology, existing all along in the fine scale structure of reality.

My research involves a theory of consciousness which can bridge these two approaches, a theory developed over the past 20 years with eminent British physicist Sir Roger Penrose. Called ‘orchestrated objective reduction’ (‘Orch OR’), it suggests consciousness arises from quantum vibrations in protein polymers called microtubules inside the brain’s neurons, vibrations which interfere, ‘collapse’ and resonate across scale, control neuronal firings, generate consciousness, and connect ultimately to ‘deeper order’ ripples in spacetime geometry. Consciousness is more like music than computation. Colleagues Travis Craddock and Jack Tuszynski and I also study how anesthetics act in microtubules to erase consciousness, and with Jay Sanguinetti, John JB Allen and Sterling Cooley, we are studying how transcranial ultrasound (TUS) can be used noninvasively to resonate brain microtubules and treat mental, cognitive and neurological disorders. Many thanks to my assistant Abi Behar-Montefiore and Ed Xia for maintaining this website.

1.2 Mind and Mass Realities [2]

Fig. 1 Divine Mechanics Unit – CCP, CP and information s – Code PcPs with B-Bit – Mass

Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations . New words have been coined to understand hidden science of mind part of reality. Mind reality has been recognized as different faces by “I” about 5000 years back to Arjuna in Mahabharata.as shown in Fig 1. It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different faces represent different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties conscious ness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation .

In all, it is automatic system of the universe . The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind realities which are of bad properties have demons face identity (last four faces on both side) . These are named as code PCPs or messenger atomic genes . The central face is CCP or Thought script where all thoughts of the universe are banked . It is bank of data of all information s of the universe It is face identity of Anti mind particles as data of all information’s of the universe are stored as anti mind particles . It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP) . There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes) . That translates the messages and realizes it and reacts accordingly.[2]

1.3. Messages From Biological world to understand B.B.B world as shown in Fig 2 [2]

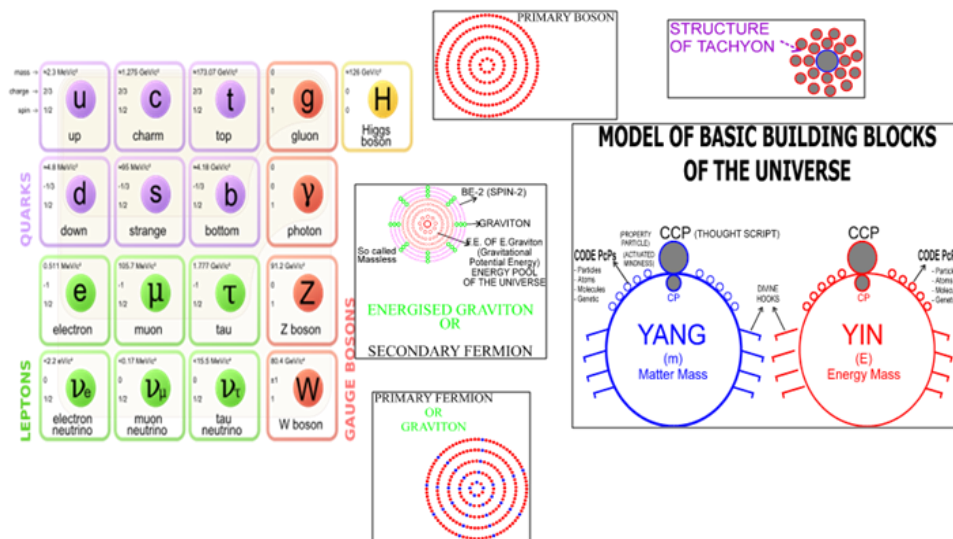

Fig. 2 Parallel teaching by participatory science

The standard model not only modified rather it has been completed [3] with introduction of energized gravitons , primary fermions, primary bosons , Basic Building Blocks , Mind and Tachyons as shown in Fig 3

Standard model completed with Fundamental particles and Mind And Tachyons

Fig. 3 standard Model chart [3]

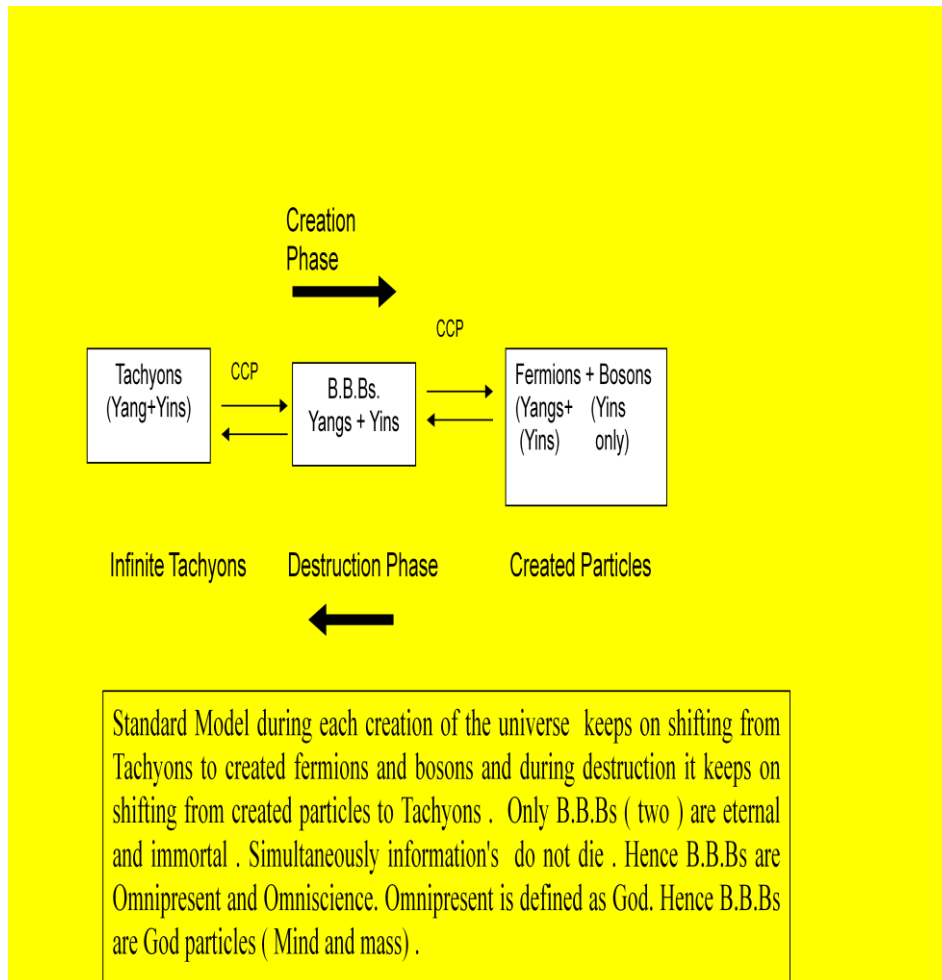

Fig .3.1 one creation and destruction cycle [4]

Participatory science has coined [5] some new words and there are some words which already exist in physics. Both these words are defined here and the definitions are according to participatory science. It has no relation with the definitions given in modern physics.

1.Mass -The part which gives shape to the smallest mass unit i.e. basics building blocks (B. B. Bs.) is called mass.

2.Matter :-Mixture of fermions and bosons or only bosons which are made up of mass (B.B.Bs) and that is why we realize their shape is called matter.

3.Inertial mass :-Mass (smallest mass units i.e. B. B. Bs) having inertial properties (classical inertia) either absolute rest or uniform motion in straight line is called inertial mass. Or Number of B. B. Bs. Per unit space present in bigger units is called inertial mass. Or Total matter contained by the bigger units or total number of fermions and bosons contained by the bigger units is called inertial mass. Therefore it never changes from place to place.

4. Gravitational mass :- The mass (interacting surfaces) which takes part in gravity (divine energized gravitons theory) interaction (which is due to mind) is called gravitational mass. When gravity interaction increases (number of divine energized gravitons increases) the interacting mass (interacting surface) also increases or when interacting mass (interacting surfaces) increases, gravity interaction (number of divine energized gravitons) also increases. Therefore gravitational mass (interacting mass or surfaces) changes from place to place. It is the fed mind that decides gravity interaction. We shall discuss it in gravity chapter and in atomic genetics.

5. Pure m (matter) mass :-matter mass (smallest mass unit or B.B.B) which have got inertial property of absolute rest.

6. Energy mass:-Energy mass (smallest energy mass unit B.B.B) which have got inertial property of uniform motion in straight line and which also gives shape to the bigger energy mass (Higgs Bosons etc) units.

7.m (impure matter) of $E=mc^2$:-Matter particles (fermions) which have got spin property are called impure matter particles.

1.4 Prayer message formation in brain.

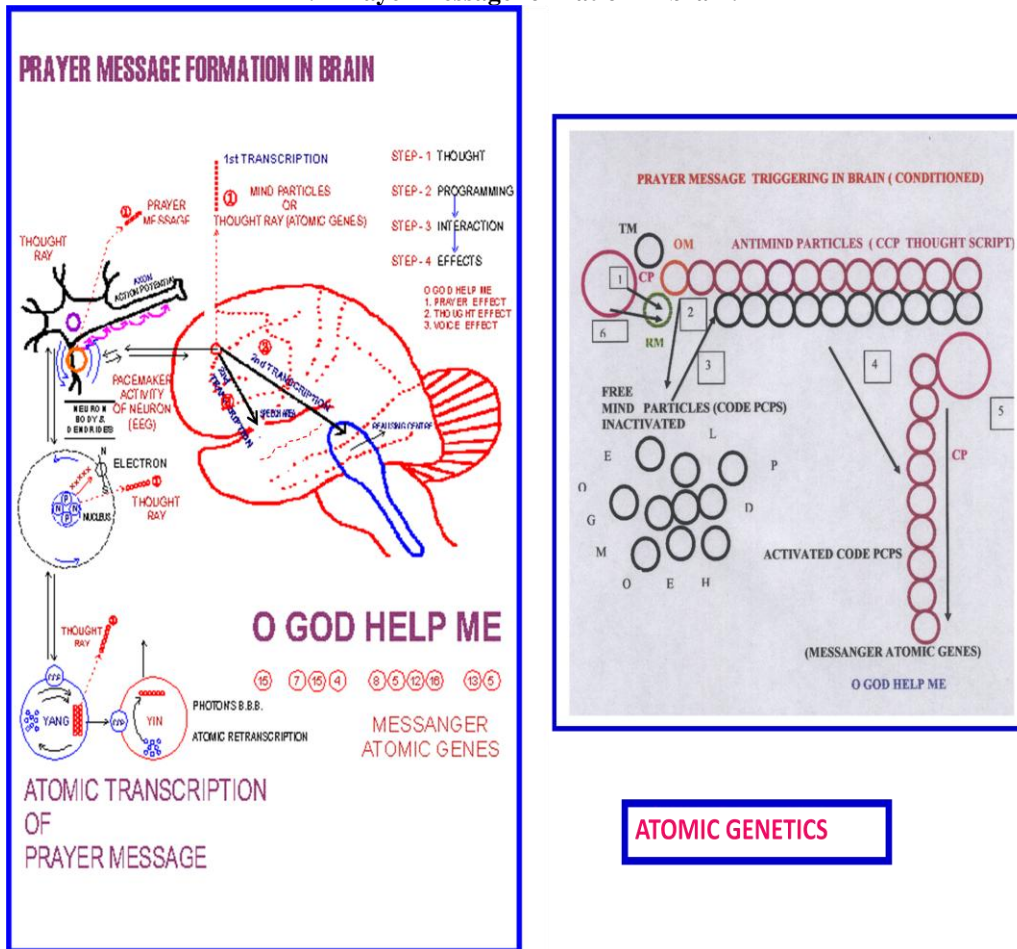

Fig 4 Divine Mechanics - Prayer message formation in brain

In atomic transcription and translation of prayer [5], following steps take place on Yang B.B.B – B-Bit as shown in Figure 4.

- 1.CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of atomic transcription triggers.
- 2.OM triggers activation of free mind particles (black -inactivated code PCPs) of that thought script (magenta) of “o god help me ”.
- 3.Free mind particles (black -inactivated code PCPs) get attached to anti mind particles script (magenta one) to form messenger thought script of “o god help me ”.
- 4.Messenger atomic genes (black) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (magenta) of “ o god help me ”
- 5.CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PcPs) and finally there is activated message of “ o god help me” is formed .
- 6.CP represses atomic transcription by adding RM (green) to OM (orange) . Thus atomic transcription gets halt.

Having formed the message it comes out in three forms .

In atomic genetic engineering (prayer) we use our basic power i.e. power of B.B.Bs. Our B.B.B. (higher center) talks with highest center of the universe by sending the message by first transcription. Till today nobody knows how does the brain generate thoughts. I am going to tell you that mystery too. In the frontal lobe the neurons are responsible for thought generation. In the neuron there is electrical activity called pacemaker activity which is occurring between dendrites and the body of the neuron. The membrane of the cell is made up of atoms and atom is made up of B.B.Bs. At the level of B.B.B. say thought of 'O GOD HELP ME' is expressed. As a result programmed messages of O GOD HELP ME (code PCPs) are formed. Out of three programmed messages, one is carried by atomic genes to highest center of the universe. It is called **THOUGHT**

RAY (Quantum entanglement) which is made up of pure atomic genes and then the message goes through phenomenon called first transcription. They come out from brain directly. The other two messages are carried by photons from nucleus of atom to electrons. Here they are modulated on electrical activity of the cell called pacemaker activity. Further they are modulated on actions potentials going towards **REALIZING CENTER** situated in brain stem (RAS) and from RAS to speech area situated in the frontal area. Target B.B.Bs. of the realizing center finally realizes thought effect of O GOD HELP ME. While from speech area message goes to motor cortex again via RAS and from there to vocal cords and finally it comes out as a speech effect of O GOD HELP ME. In layman's terminology formation of the thought ray means PRAYER as shown in Fig 4

Where Does Prayer Message go ?

Prayer message goes as shown in Figure 5 to highest center of the universe via first transcription where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5 and 6) to normal (2 and 3). This shifting of thought expression is called **ATOMIC GENETIC ENGINEERING** as shown in **Figure 4.1**

The changed messages reach to target B.B.Bs. through same route. Having received the changed messages, target B.B.Bs. stop expressing the previous programming and they start expressing the normal programming. As a result the cancer cells transmutate into normal cells. **Or diseased cell gets cured [6]** as shown in **Fig 4.1**

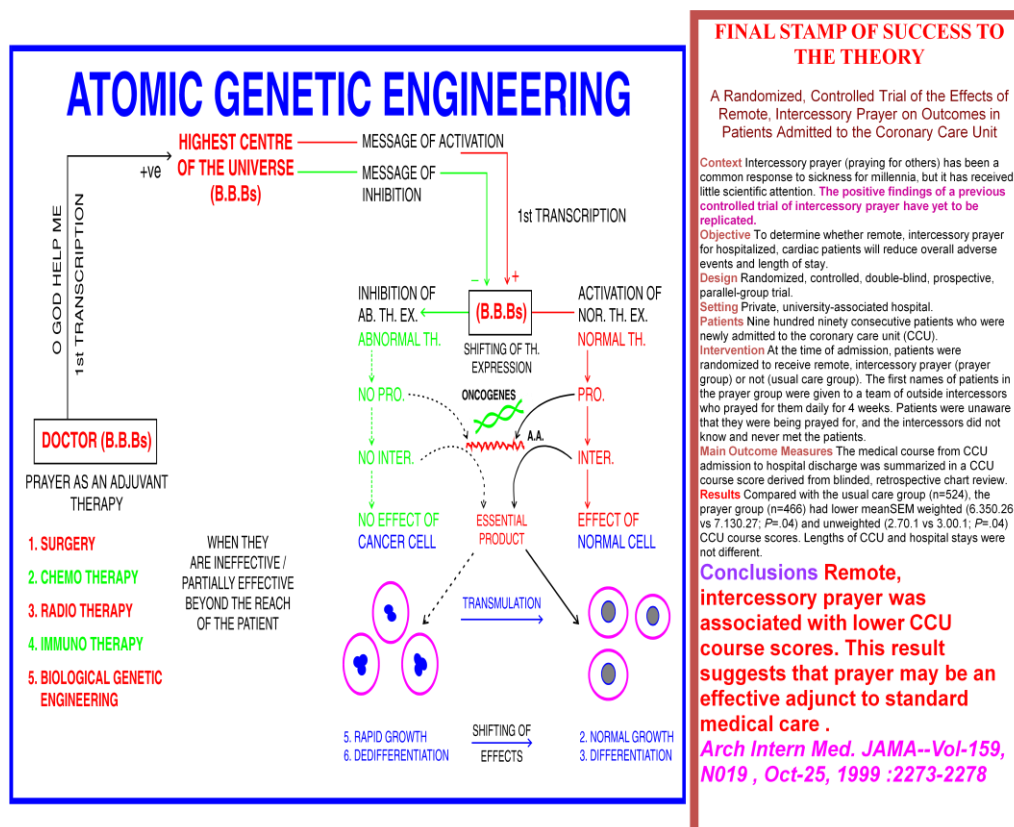

Fig . 4.1 A.G.E and Final stamp of success to New Theory[6]

1.5 Message system of the Universe

Before the origin of the universe [2] nature had only one type of message systems which is called FIRST TRANSCRIPTION. Messages (Code PcPs) used to go from one B.B.B. to another B.B.B. by atomic transcription. Messages were carried by atomic genes (Code PcPs) with very very high velocity. It is the fundamental message system.

After the origin of the universe, nature created atoms. It also created one more message system called SECOND TRANSCRIPTION. Here the message (code PcPs) are carried by photons from one atom to another atom with velocity of light. Thus atoms ,molecules, cells, and even individuals talk with one another After the formation of the cell , nature created one more system called THIRD TRANSCRIPTION .Here there is a message storage system formed by DNA. There are messenger molecules called mRNA that carry message from DNA script to cytoplasm where the message (code PCPs) is read or translated by ribosome and they work accordingly. Thus the messages reach to enzymes and hormones and finally messages reach to target units. Having received the messages, target units work accordingly. Finally life effects (metabolic) are observed. These three types of message systems are working in the nature. These message system are being used by the nature according to nature's need. as shown in Fig 5

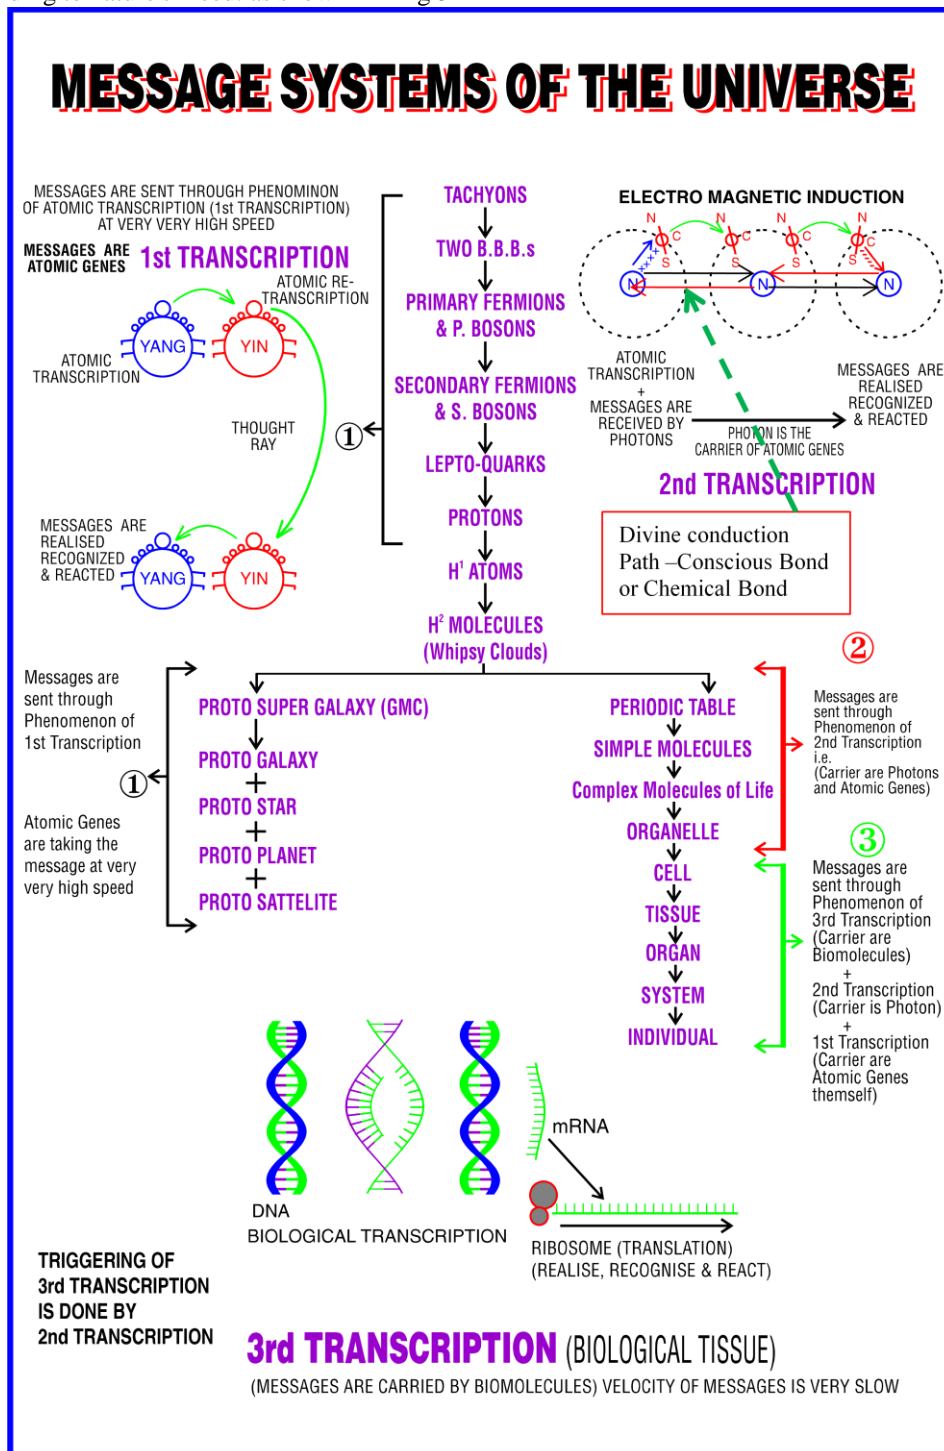

Fig. 5 Messages system of the universe

1.6 How does nature work & triggering of normal & abnormal effects

To understand creation physics as shown in Fig 6 and Fig 7. There are two types of thought stimulation [2]. One is Conditioned Thought Stimulation And Other One Is Unconditioned Thought Stimulation.

Stimulation Of Thought Expression --- There are two types of thought expressions one is Conditioned Stimulation of thought expression, and other one is self stimulation of thoughts i.e. Unconditioned Stimulation of thought expression .

At the time of the origin of the universe, all effects got created. The cause of all effects of the universe is THOUGHT expression. These thought expressions were triggered by UNCONDITIONED OR SELF Stimulated Way . It is the first step and it is followed by PROGRAMMING or formation of programmed messages by code PCPs. This programmed message moves from higher centers to target B.B.Bs. it is called INTERACTION. Having received the messages, the mind and mass of the target B.B.Bs. work in a synchronized way so as to produced the effects as thought by a the higher center. If the thought expression by higher center is normal, the shapes, properties and laws produced by target B.B.Bs. would be normal and if the thought expressions are abnormal, the shapes, properties and laws would be abnormal. This is the basic concept of transmutation phenomenon. Finally what we observe is called EFFECT. Appearance of new shapes, properties and laws is called TRANSMUTATION. The first three steps are collectively called CCP. During transmutation process if CCP is written, it does mean that unless the thought, programming and interaction take place, nature cannot transmutate. Transmutation phenomenon is seen in particles, atoms, molecules and even in cells. The basic steps of any transmutation remain the same except that the thought expressions differ.

The subatomic particle are made up of more fundamental particles called Basic Building Blocks (B.B.Bs) which are made up of mind and mass. These B.B.Bs are divine in nature with the result they talk with each other by phenomenon called atomic transcription and translation (thought expressions). The triggering of broken symmetry is caused by atomic transcriptions. Unless the atomic transcriptions occur, subatomic particles could never exhibit phenomenon of broken symmetry . So the broken symmetry is never spontaneous. It is being mis understood that sub atomic particles do have spontaneous activities as far as broken symmetry is concerned. Hence the Nobel prize physics 2008 awarded to this work is too early to give prize.

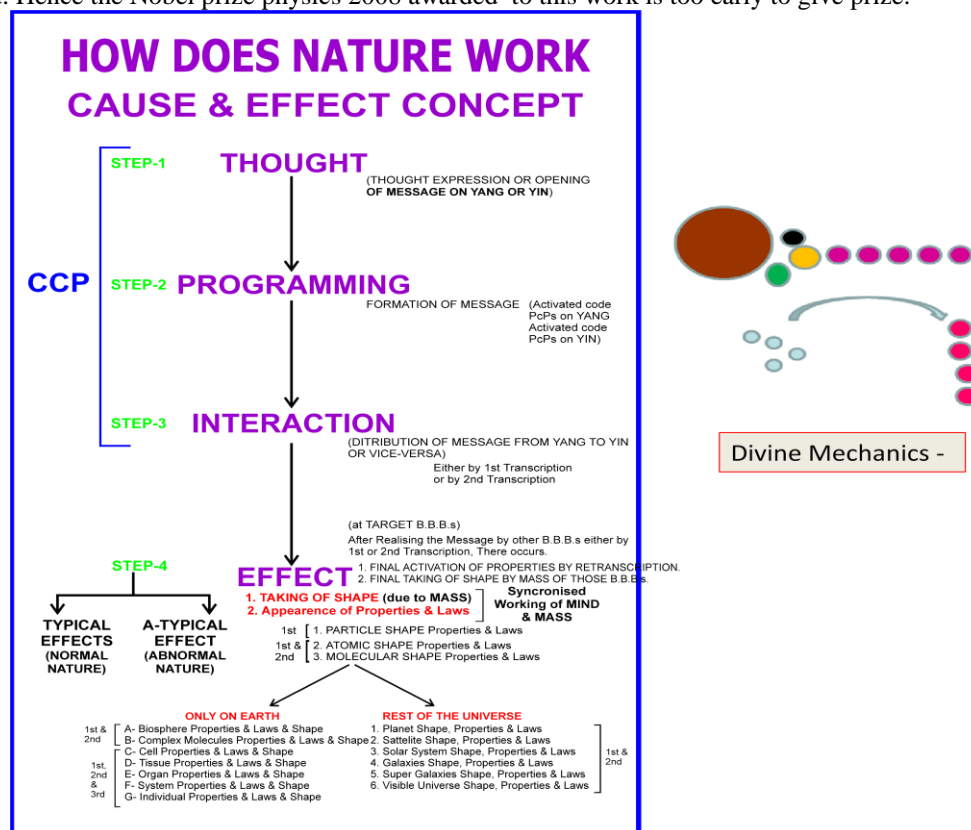

Fig. 6 Divine Mechanics – How Does Nature work ?

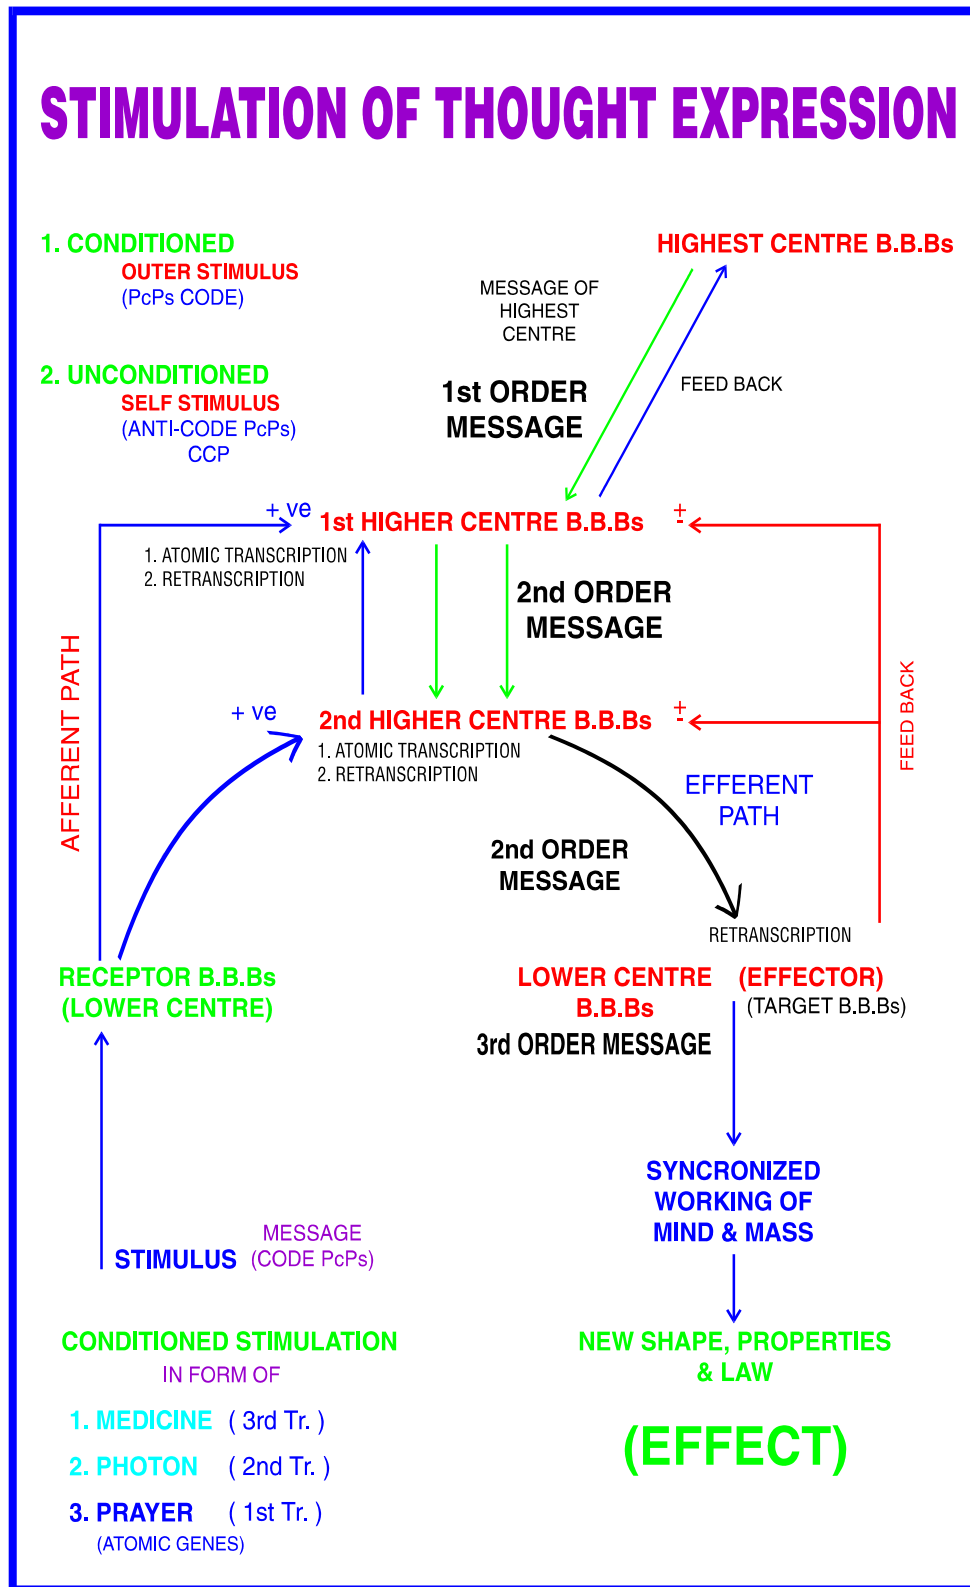

Fig. 7 Conditioned and Unconditioned thought expressions

1.7 Message network of the Universe (Feed Back Mechanism and different centers of the Universe)

With the origin of universe, nature first created primary units i.e. primary fermions (gravitation) and primary boson, these primary units are equipped with one higher center (one B.B.B.) and rest of the B.B.Bs. are working as lower centers or target B.B.Bs.[2] After primary units ,nature created secondary units i.e. secondary

fermions and secondary bosons. similarly nature created tertiary units (lepto-quarks) and then quaternary units (protons& neutrons).

Each unit is equipped with higher centers, lower centers and target B.B.Bs. After quaternary units nature created atomic units, molecular units, complex molecules of life units, organelle units, cell units, tissue units, organ units, system units and individual units. Each unit is equipped with higher centers, lower centers, and target B.B.Bs. Similarly nature created satellite units, planet units, solar system units, galaxy units, super galaxy units, dark matter layer unit. These units are also equipped with higher centers, lower centers and target B.B.Bs. Thus our universe is divided into different units and each unit is equipped with higher and lower centers.

All higher centers are under control of highest center of the universe by efferent paths. This efferent path is made up of first transcription. Higher centers can send messages to highest center of the universe by afferent path or feed back path. Thus highest center of the universe is well informed about all effects of the universe. Messages can come from lower centers to higher centers and from higher centers to highest center of the universe via afferent path. The highest center of the universe can send messages to higher centers and from higher center to lower centers. There is an inter unit message network also which is made up of first, second and third transcription depending upon the nature's need. Thus the entire universe is under control of highest center of the universe. Highest center can change any programming programmed by it during pre creation era as shown in Fig 8

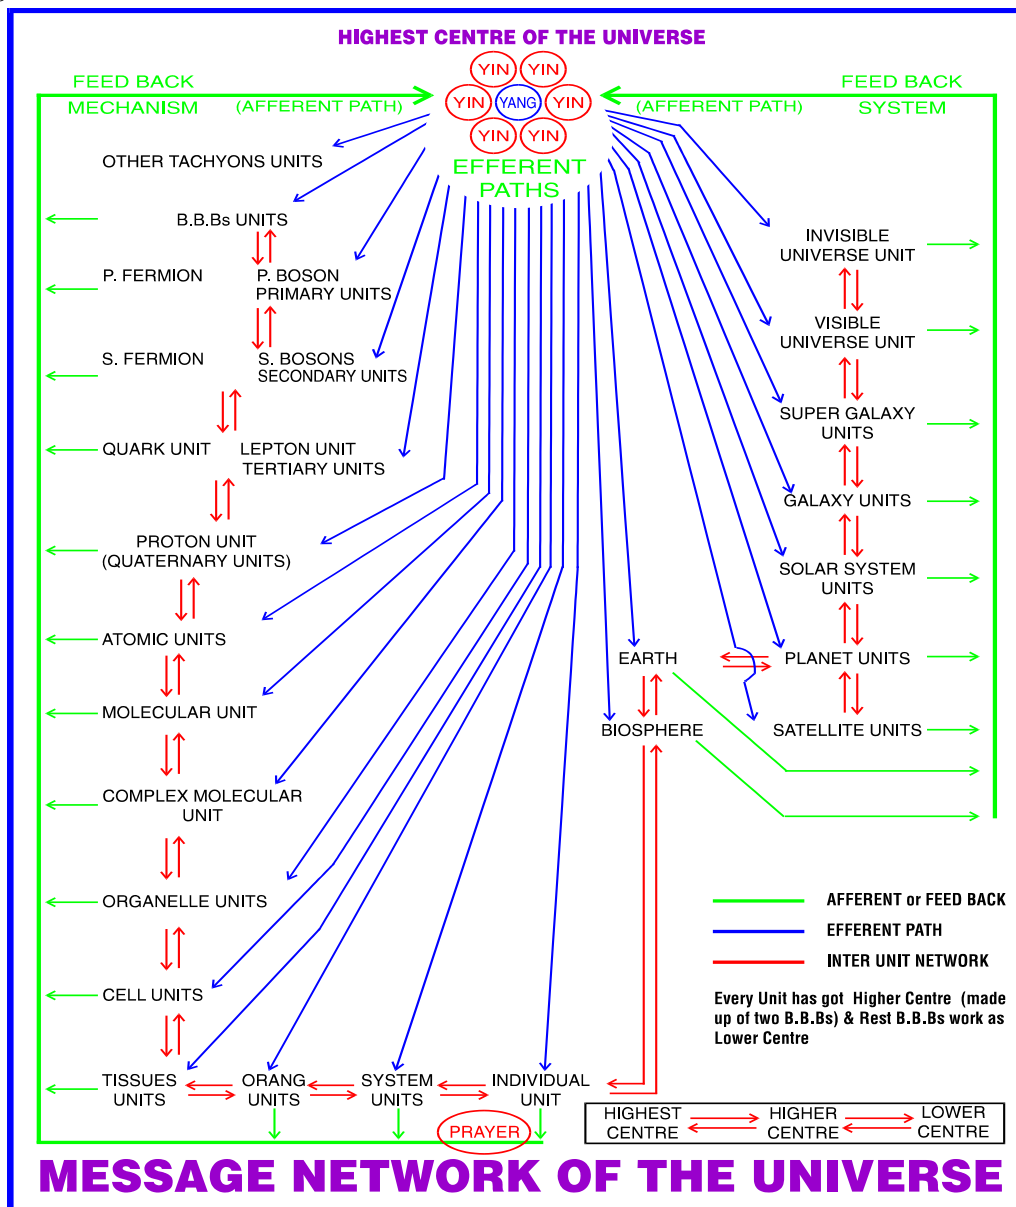

Fig. 8 Messages Net work of the Universe

1.8 Origin of the universe [7]

Hoyle – Narlikar Universe

ORIGIN OF THE UNIVERSE
CONTINUOUS CREATION THEORY---
 HOYLE AND NARLIKAR THINK THAT NEW MATTER IS BEING CREATED DUE TO 'IMPLOSION' TO BALANCE THE EXPANSION OF THE UNIVERSE, WHICH ASTRONOMERS HAVE OBSERVED. INSIDE 'QUASI STARS' GRAVITATIONAL COLLAPSES MAY FORM SOME MATTER IN THE UNIVERSE. THE HUGE LUMINOSITY AND THE RADIOEMISSION FROM THESE QUASI- STARS APPEAR TO BE 'GRAVITY POWERED' UNLIKEORDINARY STARS WHICH DERIVE THEIR ENERGY FROM NUCLEAR REACTIONS

UNIVERSE "I"

Fig. 9 Development of the Universe

Before the origin of the universe, these Basic Building Blocks (B.B.Bs) as shown in **Fig-3** were in the form of tachyons as shown in **Fig- 9** [7]. It means that at that time the tachyons were everywhere in the universe. Let us look at the structure of tachyons; it is made up of one matter B.B.B. (YANG) and many energy (YINs) B.B.Bs. Initially out of the infinite tachyons, one became the **highest center** of the universe. Messages used to go from highest center to rest of the universe and messages could come from rest of the universe to highest center of the universe by atomic transcription. Thus highest center had fed its thought to rest of the B.B.Bs. that would take part in creation - that they would express only those thoughts to give desired effect as wished by the highest center of the universe. So all B.B.Bs were informed about their role before creation of the universe. In pre-creation era programming of the future universe was done by highest center of the universe. Our universe is oscillating and it is a divine universe. It means that it has a creation phase and a destruction phase. During creation phase tachyons break into their B.B.Bs. and from these B.B.Bs, formation of fermions and bosons take place as shown in **Fig 3.1**. After the creation phase, destruction would start and in this phase all created particles would again break into their B.B.Bs and finally tachyons would form. At the time of origin of the universe, all the effects got created. These effects are taking of different shapes and appearance of properties and laws. All these effects are studied in various branches of science.

With the origin of the universe, nature first created a sphere of **COLD DARK MATTER (C.D.M)** and canals in it. With the result space got created. At the other end of the canals, hot reaction started (**the relics are back ground radiations 2.7 degree K of our hydrogen clouds**). As a result hydrogen clouds and lot of radiations were created. The empty canals were filled by these hydrogen clouds and radiations and thus

QUASARS appeared in the universe. Simultaneously C.D.M. layer started expanding and clouds and radiations kept on coming in this closed universe as shown in **Fig 9** . With the passage of time more and more C.D.M. layer formed, more and more quasars formed. The hydrogen cloud came in this closed universe. They started running towards C.D.M. layer as they were attracted by the gravity of C.D.M. layer. Those clouds, which were nearer, moved faster than those, which were away from CDM Layer. The **HUBBLE LAW**, can thus be explained. With some more passage of time, clouds were joined to form **GMC** (giant molecular clouds). Later by self-gravitation different proto stars, proto planets, proto satellites were formed. Finally stars became bright and thus bright galaxies appeared in this universe. Our universe is still in expansion phase and creation is still going inside quasars. It is to be remembered that highest center of the universe does not come in the visible universe. It keeps on receiving the messages by atomic transcription and it has power to change any programming programmed by it during pre-creation era.

It is the atomic genes which constitutes mind part of reality. Mind incorporation in physics is awaited as theory of every thing is not yet investigated . I have investigated theory of every thing (ToE) and I found that while studying unified theory at the time of origin of the universe by Hoyle Narlikar universe , it was mind reality that triggered symmetry breaking phase . It is mind reality that triggers oscillation phenomenon of the universe. It is the mind reality which is behind perfect cosmological principle . There is nothing like artificial intelligence in the universe . These mind particles constitute intelligence of the universe that controls the deterministic order of the universe. It is the mind reality behind all effects of the universe. But this is not our mind rather it is mind of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe) . His mind could be manipulated by prayer only . as shown in figure 9.1 and 9.2

1.10 Divine Mechanics and Brain Computation

Learning and Memory and information s (Code PcPs) Net work in Brain [10]

Divine Mechanics and Brain Computation

Fig 12 Divine Mechanics of Brain Computing System – Learning and memory

At all steps , these are B.B.Bs (B-Bit) that are responsible for information's control and triggering . If CCP is written it means unless atomic transcription and translation occur , brain cannot have learning and memory triggering and control and it is called Divine mechanics of Biology and it is life . These are higher thought expressions of B.B.Bs . In Bits of classical computers and qubits of QC , the thought expressions are lower and different but the mechanics (DIVINE) remains the same. as shown in Fig 12

Physics dictates the lowest limit of size of chip **but DIVINE mechanics does not**
Moore's Law Modified and Completed

Fig 13- The Theory of Computers and Brain are same – DIVINE MECHANICS (Structural and Functional smallest Bit (mass) is B-Bit of the universe and the Divine Mechanical Unit is CCP , Code PcPs and CP.)

Divine Mechanics The Theory of Computers and Brain is SAME as shown in Fig 13

Physics dictates the lowest limits of the size of chips [11]. But divine mechanics does not. Hence the bit is a typical unit of information. ((Classical and Quantum Bit) is wrong and to describe informations by adding qubit is also illusion as in complicate system, it is the different thoughts expressions that describe informations. Informations are separate (Code PcPs) and bits (Electron of transistor) qubits (electron of diamond crystal) are separate. At DNA level the bit is nucleotide (A,T,C,G) and at Atomic level the bit is photon and electron, at particle level (secondary fermions and secondary bosons) the bit is primary fermions and primary bosons and informations are still code PcPs and at B.B.B level the bit is B.B.B (Yang mass and Yin mass - B-bit) it self and the information is carried by Code PcPs but at all level of all bit units the information storage system is CCP (Physiological arrow of Time) it never dies even after destruction of the universe. Hence informations are eternal. In computers, Bit is a structural configuration that describes informations of the system and informations are in form of Code PcPs. The working of the bit is triggered and controlled by thoughts of higher centers that form that bit. If the bit is classical (transistors of chips) the effect is different. But if the bit is qubit with entanglement the working is triggered and controlled by thoughts of higher center that form that crystal. In both the effect of describing informations would be different.

One is classical (thought expressions are fixed and limited) and other one is quantum (thought expressions are changing and more wide to describe the more wide complicated system to have fast results). In life sciences in Brain the bit is again Photon and the informations are Code PcPs and they are triggered and controlled by CCP of higher centers that is triggered by DIVINE MECHANICS. In life sciences the CCP (cryptography) of B-bit expresses informations (Code PcPs) which were not fed like speaking Lie and unlike Bit of classical computer and qubit of QC it shows phenomenon of forgetfulness and IQ phenomenon (mental age/real age). It is Higher functions of B.B.B or B Bit and it is life. Hence there is difference in some aspect of DIVINE MECHANICS \of Computers computation and Brain computation

Structure

2.1 Modified theory of atomic structure as Niels Bohr's theory has limitations in explaining different series of hydrogen spectra.

New assumptions of structure of hydrogen atom. – Divine Modified Niels Bohr's Theory (**Divine MONB**) as shown in Fig 14.3

1. Hydrogen atom is like a miniature solar system with the negatively charged electron moving in circular orbit around positively charged nucleus having positively charged particle proton. In this circular orbit or stationary orbits, electron is being held by single string of energized gravitons. This energy level is called ground state.
2. When Hydrogen atom is excited, the electron moves from ground state to excited state energy levels making a bigger circular orbit and having reached in this new energy levels, it also emits radiations. Hence absorption and emission of energy quanta occur simultaneously. Shifting is understood in inter orbital shift phenomenon.
3. When excitation is over, the electron once again come back to ground state energy level. All above mentioned events are triggered by different thoughts or atomic transcriptions from the nucleus or proton in case of hydrogen atom.
4. These atomic transcriptions are being triggered by conditioned stimulation of CCP by the message system made up of photons (second transcription or -ve charged photons or afferent path) coming from electron to proton and further they are transmitted by photons (second transcription made up of +ve charged photons, or efferent path) to electron. Having received the messages, electron works accordingly. Unless the thought is expressed, nature cannot work. as shown in Fig 14
5. When electron is in ground state, its interaction with energized graviton and electromagnetic photon is more hence IP -13.59eV (n=1) is required to remove electron from this energy level. During excited stage the interaction is different hence I.P. to remove electron from this state is -3.4eV (n=2), -1.511eV (n=3), -0.850eV (n=4), -0.544eV (n=5) respectively. It the changing thought of interaction with energized graviton and electromagnetic photons that gives changing effect.
6. Electronic configuration of higher atoms could be known by studying I.P. curve. Working of hydrogen atom as shown in Fig 14.

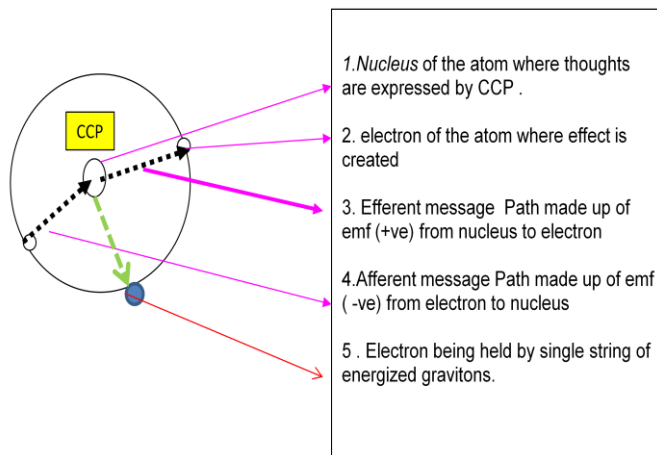

Fig 14 working of hydrogen atom – Divine MONB Theory

2.2 Energized Gravitons and merging of galaxies (corrected version –instead of massive black hole , massive black body (or quiescent galaxy) word is used rest is same as black holes are not the phenomenon of expanding universe as shown in figure 15 .

Fig 15 Two Bright Galaxies: Merging Galaxies

A sequence of optical images of merging spiral galaxies arranged in an approximate order from top left to bottom right: approaching, interacting and finally merging into a single elliptical galaxy. We have studied the way in which hot gas is produced by supernova explosions triggered during this process - Artist's rendition of an active mass – accreting black hole in a luminous gas –rich merging galaxy - as shown in figure 16

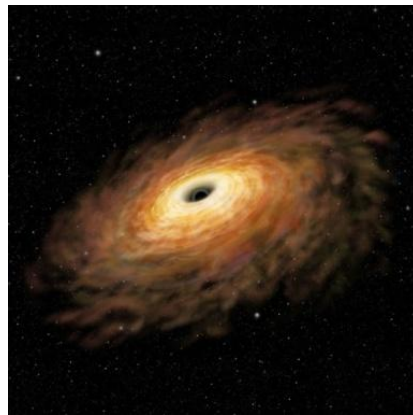

Fig 16 Quiescent Galaxies: Merging Galaxies

2.3 Triggering of phenomenon of Merging of two bright galaxies (micro and macro level)

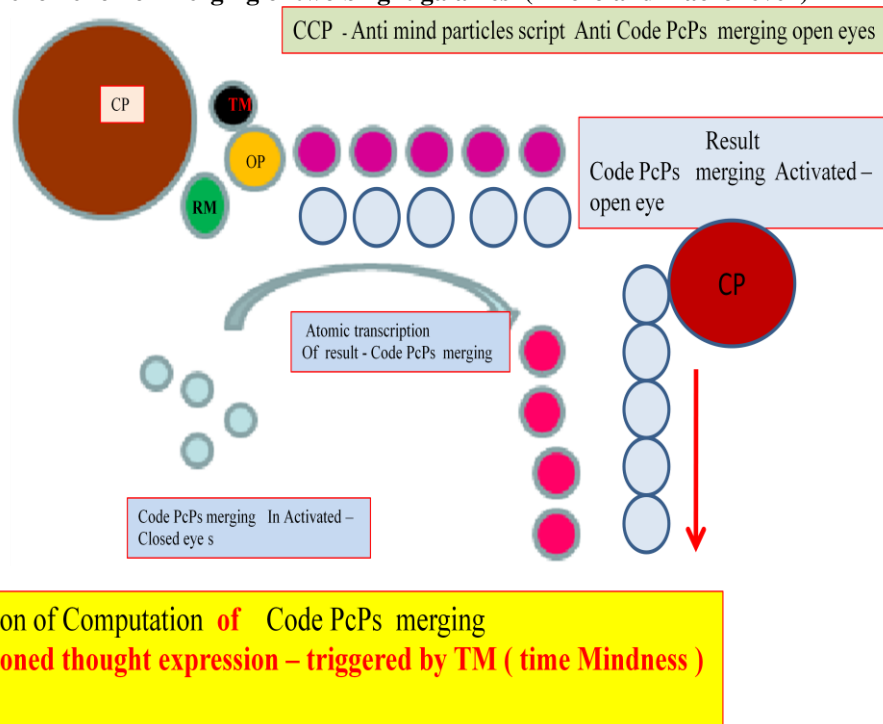

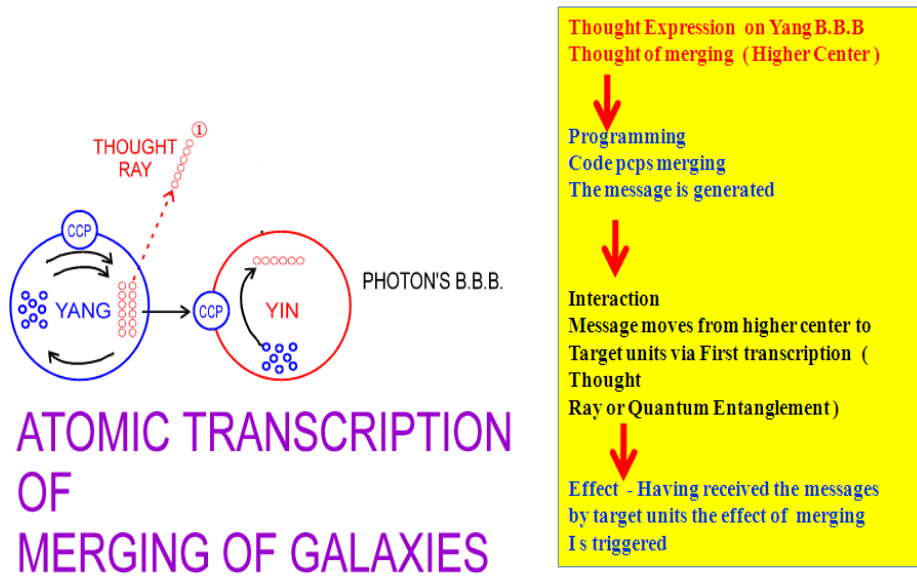

Fig 17 Phenomenon of computation of thought expression of phenomenon of merging (micro level)

In atomic transcription and translation of merging of galaxy , following steps take place on Yang B.B.B – B-Bit (higher center) (Fig 17) TM triggers the merging of galaxy (unconditioned thought expression)

- 1. There is phenomenon of **Memory search** (of the result as it is there in memory after learning) by CP . Having searched the result , there is phenomenon of **memory expression** of the result by CP .
- 2. CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of atomic transcription of result is triggered .
- 2. OM triggers activation of free mind particles (blue -inactivated code PCPs) of that thought script (magenta) of “**Code PcPs merging of galaxy** ”.
- 3. Free mind particles (blue -inactivated Code PcPs merging of galaxy) get attached to anti mind particles script (magenta one) to form messenger thought script of “**Code PcPs merging of galaxy** ”.
- 4. Messenger atomic genes (blue) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (sky blue – open eye) of “**Code PcPs merging of galaxy** ”

5.CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PcPs) and finally there is activated message of “Code PcPs merging of galaxy ” is formed .
 6.CP represses atomic transcription by adding RM (green) to OM (orange) . Thus atomic transcription gets halt.

Atomic Transcription of Merging of Galaxies

Fig 18 Phenomenon of computation of thought expression of phenomenon of merging (micro level)

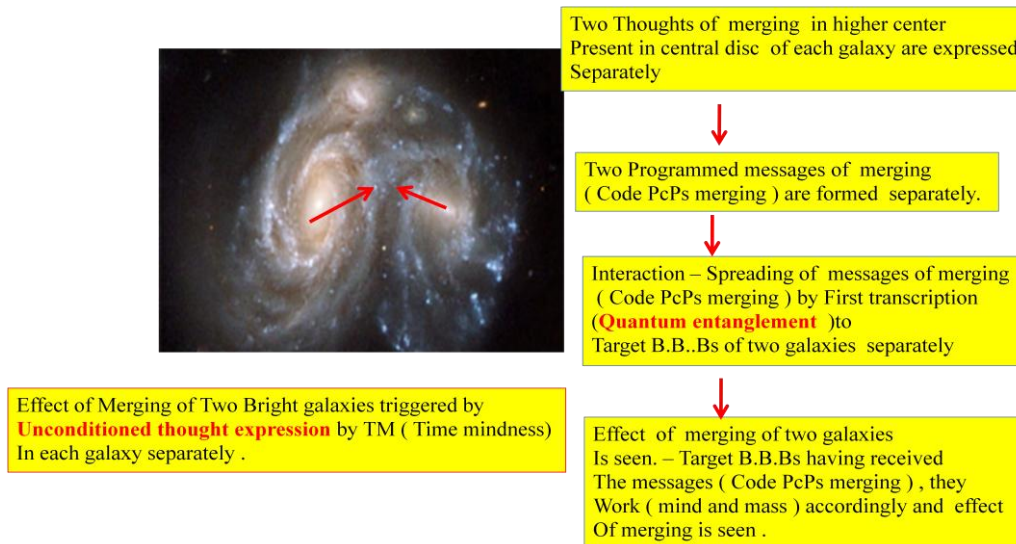

Fig 19 Triggering of phenomenon of merging of two bright galaxies which were going apart (macro level)

The reason is, thought of receding is conditioned (pulled by CDM layer gravity in new Hoyle-Narlikar universe Model) but thought of merging is unconditioned . Both thoughts are separate and their simultaneous expression is independent of each other . Hence in expanding universe galaxies could collide only when thought of merging is triggered . It is fed thought and feeding was done in precreation era by the Highest center of the universe . **It is lawlessness and it is due to wish of Almighty B.B.B and wish is triggered by Time mindness (TM) .** Hence instead of going away ,they would start merging with each other with still being receding (shown by red shift means receding) as shown in figure 19 . During this phenomenon for work done , the energy is supplied by energized gravitons of merging galaxies. After Collision , lot of gravitational waves (not waves rather energized gravitons) are released and they are detected by LIGO (11 Feb

2016 and 15 June 2016) . This phenomenon (release of energized gravitons) is also triggered by separate Mind .

2.4 Mechanics of Ascending curve and Flat rotational curve of galaxies (Divine MOND- Modified Newtonian Dynamics)

It is the mind that designs the curve . The curve has two parts . One is ascending curve (inner)and the second is flat curve (outer) . Both show different interactions and both are designed by different thoughts . In gravity interactions , it is the M2 that decides

1. How many EG s (M1) would interact with M2 .
2. How much energy would be taken for work done .
3. What effect (magnitude) plus the type of effect would be triggered is also decided by M2 .

EGs (M1) only move with velocity of light and they give energy to the system and become low energized gravitons (EGs) The directional effects are decided by M1 . The density (Number of EGs /unit area) of EGs of galaxies first increases (first part of curve) and then decreases (second part of curve) as the distance increases . But in first part (inner) the interactions are different with stars (M2) and center mass (M1) than in outer part of stars (M2) of galaxy and center mass (M1) . In first part the more EGs are interacting with stars (M2) with increase in distance and more energy is taken by stars (M2) . Hence increasing rotational velocity is shown by ascending curve . It is not like moving wheel where $V \propto R$ as shown in Fig 20.

Fig 20 $V \propto R$,But it is not like solid disc Mechanics as stars are spinning And rotating . It is modified Newtonian gravity interactions or *Modified Newtonian Dynamics* which are trigged by mind

In second part (outer) of curve , despite of decreasing number of EG s / unit area (shown by green curve) but number of interacting EGs with M2 are fixed or constant with distance , energy for work done taken by M2 is also fixed or constant . Hence rotational velocity of stars or M2 are same with distance . Thus the curve is flat in outer part . It is unconditioned working of thought expressions in outer curve and it is triggered by time mindness as shown in Fig 21.1 and Fig 21.2 . This curve (outer curve yellow – flat curve) is nothing to do with Dark Matter in galaxy. . Galaxies are divine units and arms shape may not get distorted rapidly with time , law of lawlessness comes into play to prevent distortion of spiral arms rapidly despite of decrease in EGs /unit area with distance (decline green curve) .

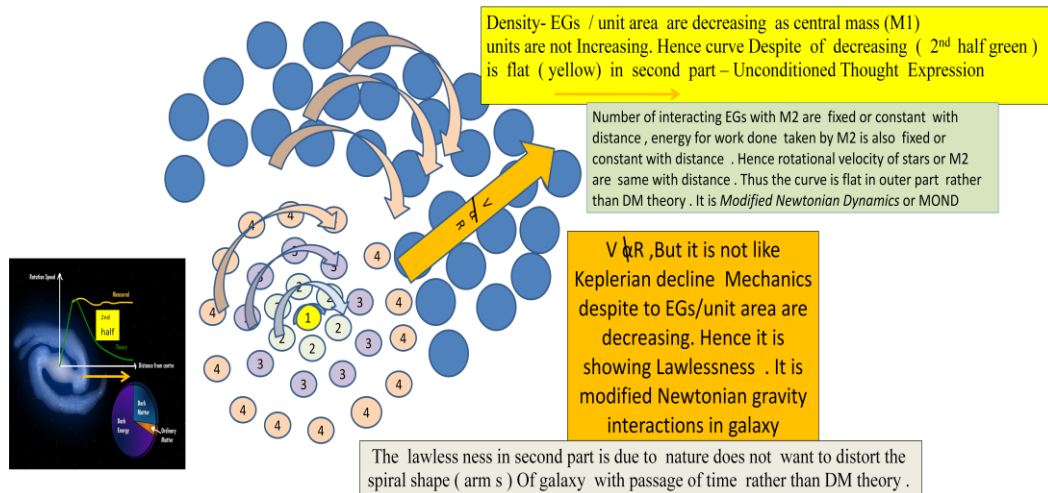

Fig 21 .1 The lawless ness in second part is due to nature does not want to distort the spiral shape (arm s) Of galaxy rapidly with passage of time , hence number of interacting EGs with M2 are fixed or constant with distance , energy for work done taken by M2 is also fixed or constant . Hence rotational velocity of stars or M2 are same with distance . Thus the curve is flat in outer part . rather than DM theory . It is Divine Modified Newtonian Dynamics or Divine MOND

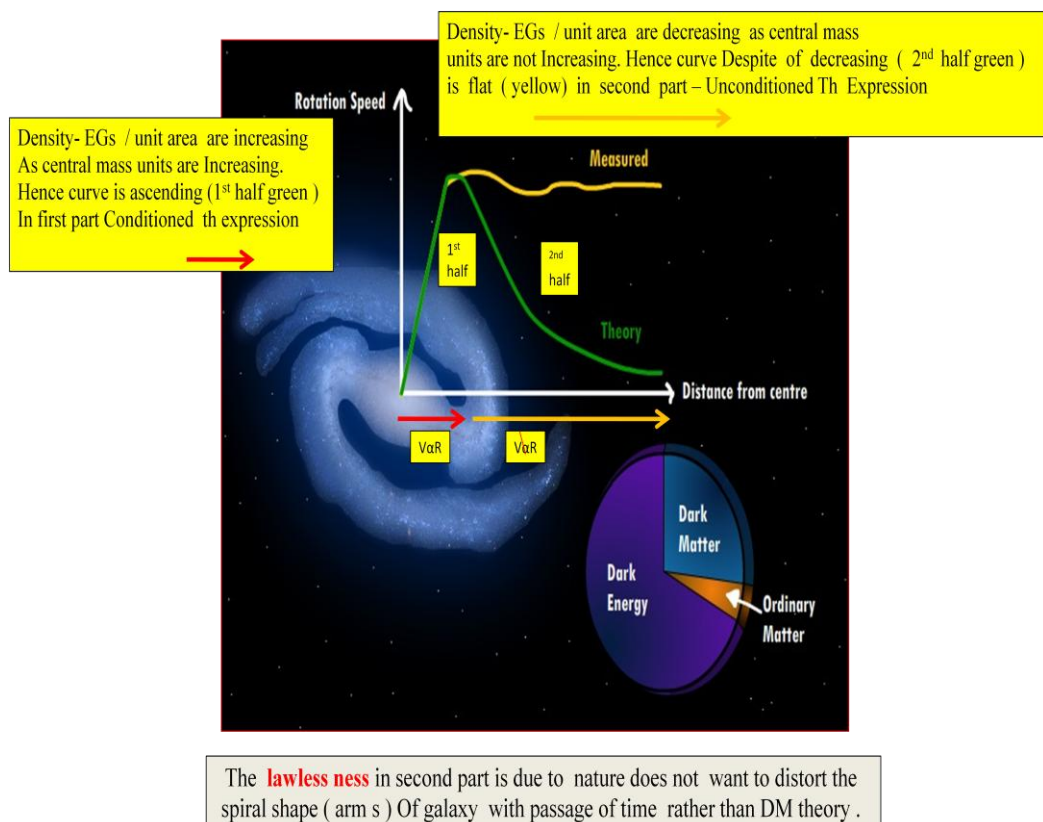

Fig 21 .2 Inner curve (first part –green) is designed by conditioned thought stimulation and the outer curve (second part - yellow) is designed by unconditioned thought expression of CCP or *Divine Modified Newtonian Dynamics* (Divine MOND)

In Kepler's decline curve, there is conditioned working of thoughts , hence rotational velocities is shown by decline curve .

In solid body the $V \propto R$. it means the CCP of solid body designs the curve by distributing the energy such that it makes straight ascending curve as atoms are connected with conscious bonds of emf making solid . It is conditioned stimulation of thoughts in solid body .

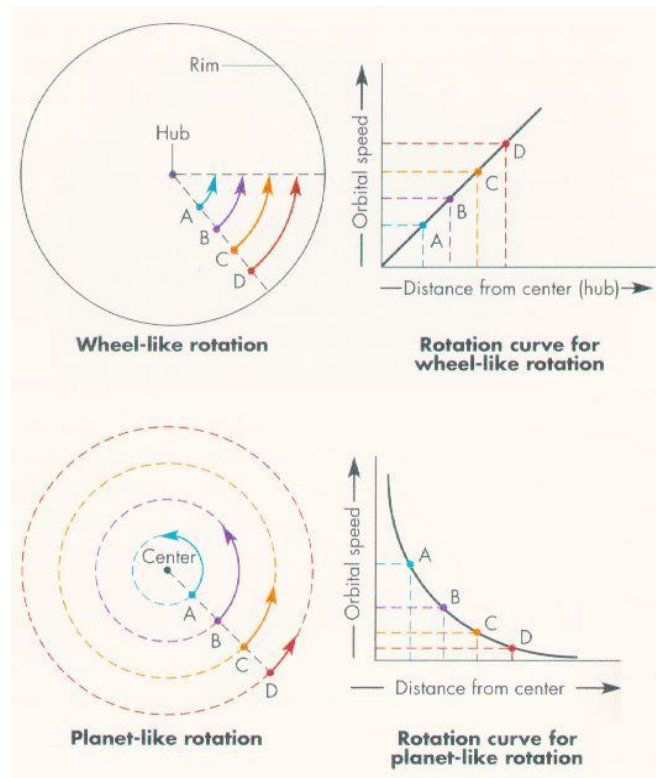

Fig 22 both are conditioned phenomenon but the thought expressions are different and reverse

Now in solar system we have Divine Modified Newton's law of gravitation and it is Mind that designs this modified law.

It is represented as

$$F \propto \frac{\text{Amount of concentration of energized gravitons per unit area} \times \text{Number of interacting surfaces of the M2 (or Inertial mass of M2)}}{\text{critical value of distance}^2}$$

No doubt , modified Newton's law of gravitation do work in galaxy stars but it is not like solar system modified Newton's law of gravitation . It is because expression of mind is different in both . If one is (solar system modified Newton's law of gravitation) a law of nature , then the other one (modified Newton's law of gravitation in galaxy stars) is lawlessness of nature i.e. number of interacting EGs with M2 are fixed or constant with distance , energy for work done taken by M2 is also fixed or constant with distance . Hence rotational velocity of stars or M2 are same with distance . Thus the curve is flat in outer part .These are fed thoughts and feeding was done in precreation era by Almighty B.B.B to B.B.Bs of higher centers who are involved in solar system rotational law formation as well as in galaxy rotational law formation . It is Called Divine MOND.

Gravity interactions are no more physical interactions rather they are triggered and controlled by mind of M2 or Divine *Modified Newtonian Dynamics* (Divine MOND) . In galaxy , in rotational velocity curve, there are two types of mind expression , one is conditioned (inner curve) thought expression that designs inner ascending curve and the another one is unconditioned thought expression that designs outer flat curve and that is due to not to distort shape of arms of galaxy rapidly with passage of time . Hence most of galaxies obey these laws (inner curve) and lawlessness (outer curve) of gravitation simultaneously or number of interacting EGs with M2 are fixed or constant with distance , energy for work done taken by M2 is also fixed or constant with distance . Hence rotational velocity of stars or M2 are same with distance . Thus the curve is flat in outer part. These are fed thoughts and feeding was done in precreation era by the Highest center of the universe . It is nothing to do with dark matter theory.. Nature of DM and DE could only be revealed by creation physics that Big Bang cosmology is unable to visualize. Hence Big Bang model is discarded . Last but not the least A word appealing in outer Galaxy Rotation Curves i.e slowly rising or even slightly increasing and it has sense i.e

there is error in observation . The theory Divine MOND predicts that outer curve is not flat rather it should be slowly rising which is more correct observation.

2.5 Phenomenon of sinking of stones (Law and conditioned thought Ex) and Floating of same stones (Lawlessness or Unconditioned Th Expression)

Science of sinking and floating does depend upon many factors like density of object and interaction with gravity by mind . In light density object interaction is different while in more density object interaction is different . It is the mind that designs the effect . Stone sinks despite of high density , as interaction with gravity is such , it sinks in water. It is by virtue of programmed message (CodePcPs sink) is triggered in M2 during gravity interactions. But in some stones which are porous (less density) keeps on floating because programmed messages (Code PcPs floating) is triggered during gravity interactions and they keep on floating . It is called quantum gravity . Means there is no fixed thought that is triggered in fixed frame of reference . These are fed thoughts and feeding was done in pre creation era by the Highest center of the universe. . It is about solids . Now in liquids the same principle is applicable . Oil floats on water being light in density and hence programmed thoughts (code PcPs floating) are triggered during gravity interactions . While mercury heavy in density sinks in water as programmed thoughts of (CodePcPs sink) are triggered during gravity interaction . These are fed thoughts and feeding was done in pre creation era by the Highest center of the universe.

If some how , programmed sinking thoughts (Code PcPs sink) get changed in to programmed floating thoughts (Code PcPs floating) , the same high density object would float . It is called lawlessness and unconditioning working of the nature. This lawlessness and unconditioned thought expressions are seen in Galaxies collisions and the cause of Flat rotational curve in Galaxies . It is TM that triggers these two phenomena . High density is triggered by Thought of high density and sinking is triggered by thought of sinking . Both thoughts are separate and their simultaneous expression is independent of each other . (Mendel's law of independent assortment) . Hence for sinking of stone , high density property is not essential .

2.6 . Strange floating stones of Rameshwaram computation

Some floating stones are found on the coastal regions of Rameshwaram. These stones are similar to any other stone and possess the same features, physical and chemical composition like the stone you may find in your locality. Seeing these stones from a far distance, you may feel that this stone is made of corals but on physical examination, it is found that this is not a coral stone...and neither is it a pumice stone! (Fig 23)

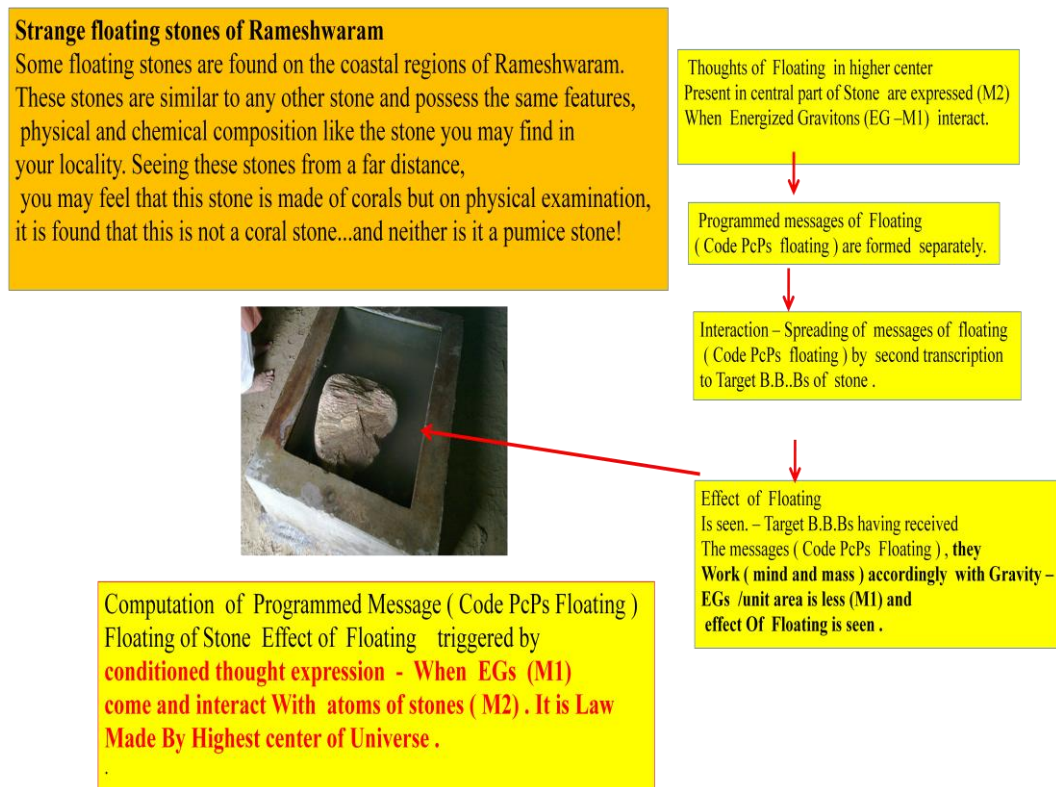

Fig 23 Strange floating stones of Rameshwaram

2.7 Normal sinking stone computation .

Why now Ram Setu is under water because Lawlessness and unconditioned thought expressions that led to floating on water worked only for few days and when work was over , the unconditioned triggering ended and normal triggering of programmed thought expressions (Code PcPs sink) of sinking get triggered .

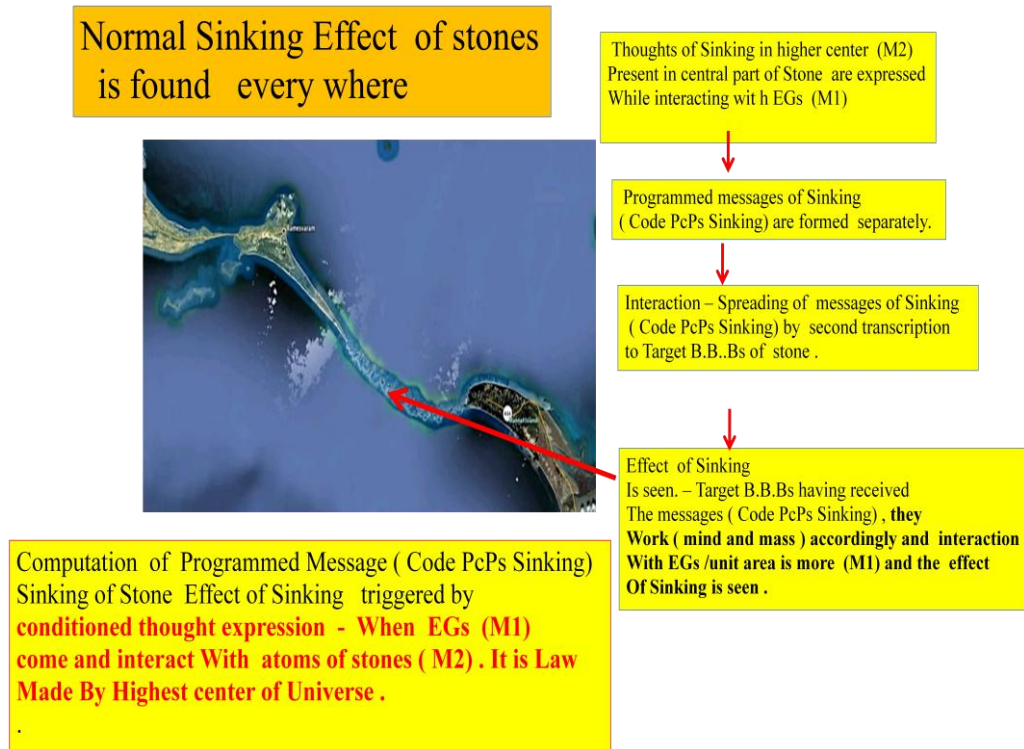

Fig 24 - Normal sinking effect of normal stones found every were

2.8 How normal sinking programming transformed into floating programming and further it reversed into normal sinking programming .

Lord Ram did Prayer (Quantum entanglement) . The Prayer was accepted by Almighty B.B.B . At first sinking programming (Code PcPs Sink) was changed to floating programming (Code PcPs Floating) and later it was again shifted to sinking programming (Code PcPs sink) after few days . It is lawlessness and it is unconditioned Working of nature and it is done by First order of universe (Quantum Entanglement) It is called Atomic genetic Engineering) . (Fig 25)

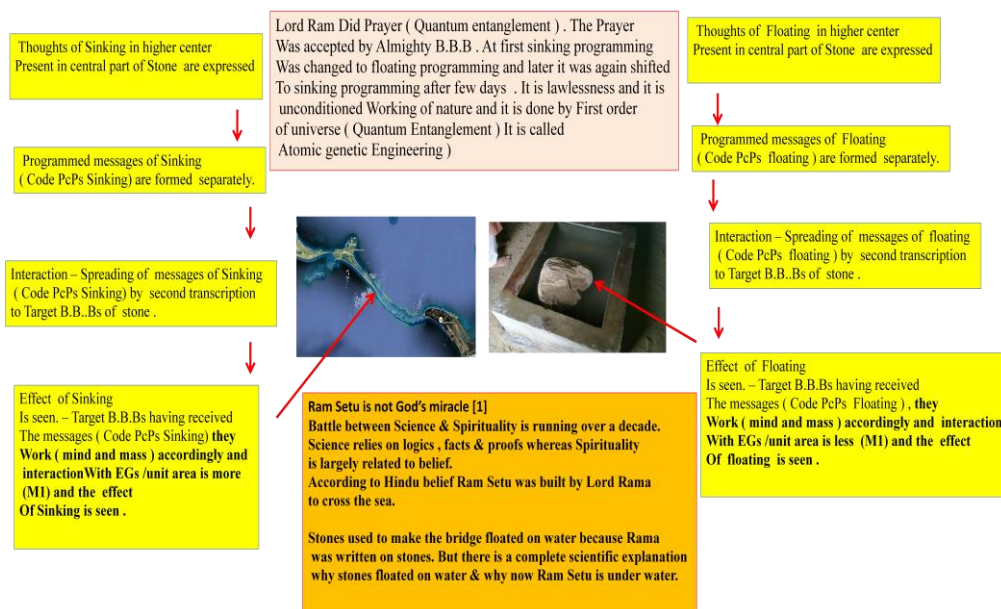

Fig 25 Ram Setu is not God's miracle . It is by virtue of Prayer Done by Lord Ram .

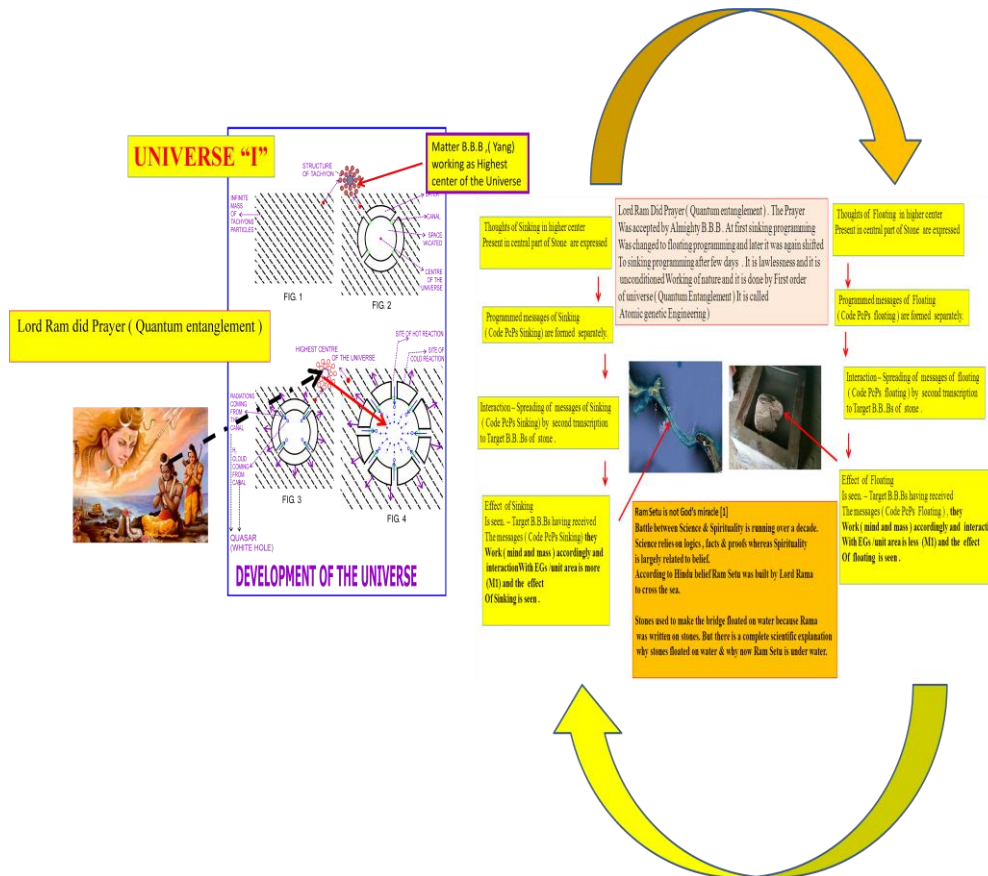

Fig 26 Lord Rama worshipping Almighty B.B.B before making Adam's bridge . There is shifting of Programming of Sinking to Floating and vice versa . It is lawlessness and unconditioned thought expression by order of Almighty B.B.B . (Quantum Entanglement)

II. Conclusions

This bridge made of floating stones can still be seen between India and Sri Lanka from Rameshwaram, the place where Lord ram prayed to lord Shiva (Almighty B.B.B) and started the construction of the bridge. Since this story is very old and unproven, many historians, scientists and archaeologists deny accepting this bridge to be built by lord Rama but at the same time they are unable to explain the concept of floating stones found in Rameshwaram. Until the scientists come up with a convincible theory may be we can consider Rama Setu as an engineering masterpiece. The technology once existed to make stones float on water and the architect like Nala and Neela were too advanced in building a bridge from India to Sri Lanka within 5 days with the help of dedicated work force of million Vanaras. The famous NASA satellite footage from 2002. The US scientific body, however, chose to distance itself from any religious interpretation. NASA said, "The image may well be ours, but their interpretation is certainly not ours. Remote sensing images or photographs from orbit cannot provide direct information about the origin or age of a chain of islands, and certainly, cannot determine whether humans were involved in producing any of the patterns seen." A map from later centuries also refers to Ram Setu as Adam's bridge. Also, the Geological Survey of India's report named the Project Rameshwaram and termed this bridge to be used as a means to travel between India and Sri Lanka some about 7,000-10,000 years ago.

If some how , programmed sinking thoughts (Code PcPs sink) get changed to programmed floating thoughts (Code PcPs floating) , the same high density object would float . It is called lawlessness and unconditioning working of the nature. This lawlessness and unconditioned thought expressions are seen in Galaxies collisions and the cause of Flat rotational curve in Galaxies . It is TM that triggers these two phenomena .

Lord Ram did Prayer (Quantum entanglement) . The Prayer was accepted by Almighty B.B.B . At first sinking programming (Code PcPs Sink) was changed to floating programming (Code PcPs Floating) and later it was again shifted to sinking programming (Code PcPs sink) after few days . It is lawlessness and it is unconditioned Working of nature and it is done by First order of universe (Quantum Entanglement) It is called Atomic genetic Engineering) . (Fig 26) . . High density is triggered by Thought of high density and sinking is triggered by thought of sinking . Both thoughts are separate and their simultaneous expression is

independent of each other . (Mendel's law of independent assortment). Hence for sinking of stone , high density property is not essential .
