Abstract: Universe is made up of God Particles or Basic Building Blocks (Fig -1) or mind and mass . To Understand life (new definition) we have to understand sleeping and arousal phenomenon in living animals , plants and seed , molecules , atoms , particles and in Tachyons which are made up off two God particles . We are set of informations (Code PcPs) and that too changing (fetus , infant , adolescence , adult , old age and finally death) . Death set of informations (code PcPs) are different than life set of informations (CodePcPs) . Life set of Informations could be recreated only by Almighty B.B.B . Hence death is illusion. In all stages of set of informations of particles , atoms, molecules have arousal state of mind (Eyes open) . Hence Idols are alive by virtue of arousal - sleep phenomenon property (property of life) of God particles (Mind and Mass) . Life effects are higher thought expressions of B.B.Bs . When these thought expressions are inhibited death thoughts are triggered , we observe death effects . (autolysis of cells and rigor mortis etc) . Hence concept of soul is myth. Hence Life means sleep and arousal phenomenon (new definition) . Hence statues are alive because they are in arousal state of mind . (Open eyes) till creation exists . After the creation is over, all stages of God particles would come in sleeping state in symmetry phase (close eyes –mind) but alive (new definition) . Universe “I” is always Alive (new definition) whether it is in sleeping state of mind or arousal state of mind.

I. Introduction

2.6 The Cycle of Sleep Arousal

(Sleep Arousal cycle)

The ventrolateral preoptic nucleus (VLPO) is a small cluster of neurons situated in the anterior hypothalamus, sitting just above and to the side of the optic chiasm in the rodent brain. In humans, this hypothalamic group of neurons is called the intermediate nucleus. The VLPO is active during sleep, primarily during non-rapid eye movement sleep (NREM sleep), and releases inhibitory neurotransmitters, mainly GABA and galanin, which inhibit neurons that are involved in wakefulness and arousal. The VLPO is in

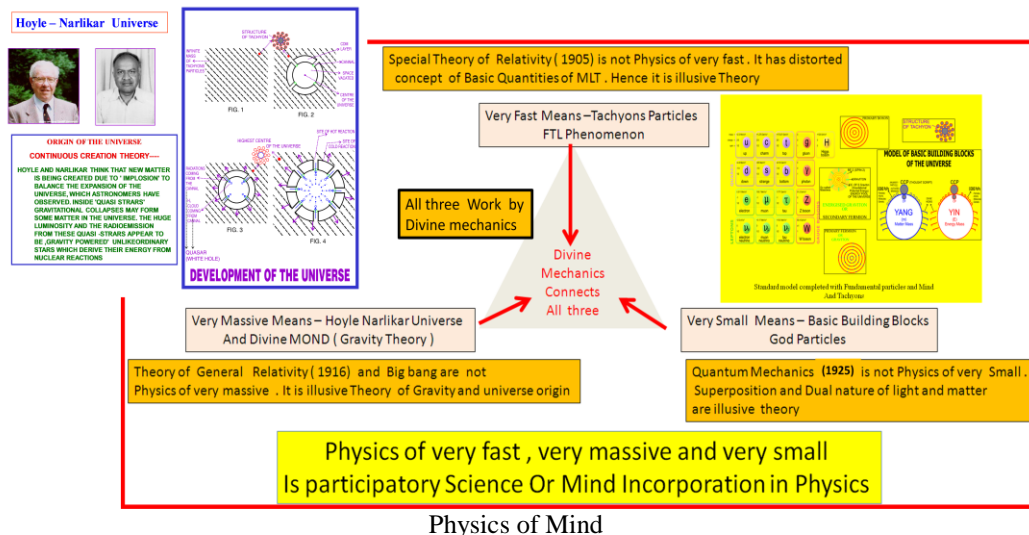

turn innervated by neurons from brain regions involved in the arousal system. The VLPO is activated by the sleep-inducing neurotransmitters serotonin and adenosine.^[1] and endosomnogens; Prostaglandin D2^[2] The VLPO is inhibited during wakefulness by the arousal-inducing neurotransmitters norepinephrine and acetylcholine.^[3] The role of the VLPO in sleep and wakefulness, and its association with sleep disorders - particularly insomnia and narcolepsy - is a growing area of neuroscience research.

Sleep/Wakefulness[edit]

In the mid-19th century *in vivo* studies - first in rats and then in cats - showed that lesions in the VLPO result in insomnia^{[6][7]} suggesting the VLPO has a key role in sleep. VLPO innervates cell bodies and proximal dendrites of brain regions that are part of the arousal system; the tuberomammillary nucleus(TMN), the raphe nucleus, the locus coeruleus(LC), the pedunculo pontine tegmental nuclei(PPT), the laterodorsal tegmental nucleus (LDT), the substantia nigra (SN), the ventral periaqueductal grey (vPAG) and the orexinergic neurons; all of these are monoaminergic nuclei of diffuse modulatory systems (DMS).

The VLPO is activated by serotonin, adenosine and prostaglandin D2 which accumulate during wakefulness. A majority of VLPO neurons are GABAergic and galanergic, primarily secreting the inhibitory neurotransmitters GABA and galanin respectively. The secretion of these inhibitory neurotransmitters suppresses the arousal system and results in sleep. The VLPO also receives afferent projections from the DMS nuclei of the arousal system. These afferent projections secrete the arousal neurotransmitters norepinephrine and acetylcholine which inhibit VLPO and result in wakefulness. VLPO firing is inversely proportionate to the activation of the arousal system (as VLPO firing increases, the arousal system firing decreases, and vice versa). Orexin neurons in the posterior of the hypothalamus excite brain nuclei in the arousal system and help keep you awake. Orexin neurons also extend to the VLPO likely inhibiting its activity.^[8] Thus orexin neurons are thought to play an important role in the stabilisation of the flip-flop switch regulating sleep and wakefulness.

What is New Physics or Physics of Mind ?

Quantum Consciousness – According to Physicists and Biologist

The nature of consciousness remains deeply mysterious and profoundly important, with existential, medical and spiritual implication. We know what it is like to *be* conscious – to have awareness, a conscious ‘mind’, but who, or what, are ‘we’ who know such things? How is the subjective nature of phenomenal experience – our ‘inner life’ - to be explained in scientific terms? What consciousness actually *is*, and how it comes about remain unknown. The general assumption in modern science and philosophy - the ‘standard model’ - is that consciousness emerges from complex computation among brain neurons, computation whose currency is seen as neuronal firings (‘spikes’) and synaptic transmissions, equated with binary ‘bits’ in digital computing. Consciousness is presumed to ‘emerge’ from complex neuronal computation, and to have arisen during biological evolution as an adaptation of living systems, extrinsic to the makeup of the universe. On the other hand, spiritual and contemplative traditions, and some scientists and philosophers consider consciousness to be intrinsic, ‘woven into the fabric of the universe’. In these views, conscious precursors and Platonic forms preceded biology, existing all along in the fine scale structure of reality.

My research involves a theory of consciousness which can bridge these two approaches, a theory developed over the past 20 years with eminent British physicist Sir Roger Penrose. Called ‘orchestrated objective reduction’ (‘Orch OR’), it suggests consciousness arises from quantum vibrations in protein polymers called microtubules inside the brain’s neurons, vibrations which interfere, ‘collapse’ and resonate across scale,

control neuronal firings, generate consciousness, and connect ultimately to ‘deeper order’ ripples in spacetime geometry. Consciousness is more like music than computation.

Colleagues Travis Craddock and Jack Tuszyński and I also study how anesthetics act in microtubules to erase consciousness, and with Jay Sanguinetti, John JB Allen and Sterling Cooley, we are studying how transcranial ultrasound (TUS) can be used noninvasively to resonate brain microtubules and treat mental, cognitive and neurological disorders.

Many thanks to my assistant Abi Behar-Montefiore and Ed Xia for maintaining this website.

1.2 Mind and Mass Realities [2]

Fig. 1 Divine Mechanics Unit – CCP, CP and information s – Code PcPs with B-Bit – Mass

Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations . New words have been coined to understand hidden science of mind part of reality. Mind reality has been recognized as different faces by “T” about 5000 years back to Arjuna in Mahabharata.as shown in Fig 1. It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different faces represent different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties consciousness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation . In all, it is automatic system of the universe . The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind realities which are of bad properties have demons face identity (last four faces on both side) . These are named as code PCPs or messenger atomic genes . The central face is CCP or Thought script where all thoughts of the universe are banked . It is bank of data of all information s of the universe It is face identity of Anti mind particles as data of all information’s of the universe are stored as anti mind particles . It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP) . There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes) . That translates the messages and realizes it and reacts accordingly.[2]

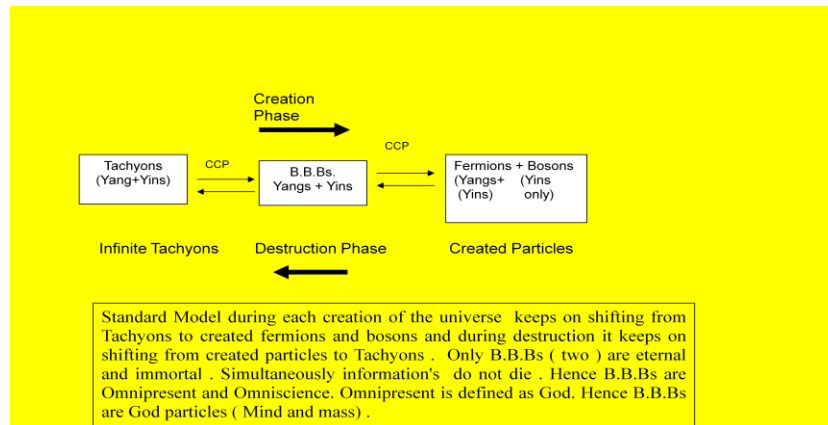

Fig .3.1 one creation and destruction cycle [4]

Participatory science has coined [5] some new words and there are some words which already exist in physics. Both these words are defined here and the definitions are according to participatory science. It has no relation with the definitions given in modern physics.

1. Mass - The part which gives shape to the smallest mass unit i.e. basic building blocks (B. B. Bs.) is called mass.
2. Matter :- Mixture of fermions and bosons or only bosons which are made up of mass (B.B.Bs) and that is why we realize their shape is called matter.
3. Inertial mass :- Mass (smallest mass units i.e. B. B. Bs) having inertial properties (classical inertia) either absolute rest or uniform motion in straight line is called inertial mass. Or Number of B. B. Bs. Per unit space present in bigger units is called inertial mass. Or Total matter contained by the bigger units or total number of fermions and bosons contained by the bigger units is called inertial mass. Therefore it never changes from place to place.
4. Gravitational mass :- The mass (interacting surfaces) which takes part in gravity (divine energized gravitons theory) interaction (which is due to mind) is called gravitational mass. When gravity interaction increases (number of divine energized gravitons increases) the interacting mass (interacting surface) also increases or when interacting mass (interacting surfaces) increases, gravity interaction (number of divine energized gravitons) also increases. Therefore gravitational mass (interacting mass or surfaces) changes from place to place. It is the fed mind that decides gravity interaction. We shall discuss it in gravity chapter and in atomic genetics.
5. Pure m (matter) mass :- matter mass (smallest mass unit or B.B.B) which have got inertial property of absolute rest.
6. Energy mass:- Energy mass (smallest energy mass unit B.B.B) which have got inertial property of uniform motion in straight line and which also gives shape to the bigger energy mass (Higgs Bosons etc) units.
7. m (impure matter) of $E=mc^2$:- Matter particles (fermions) which have got spin property are called impure matter particles.

1.4 Prayer message formation in brain.

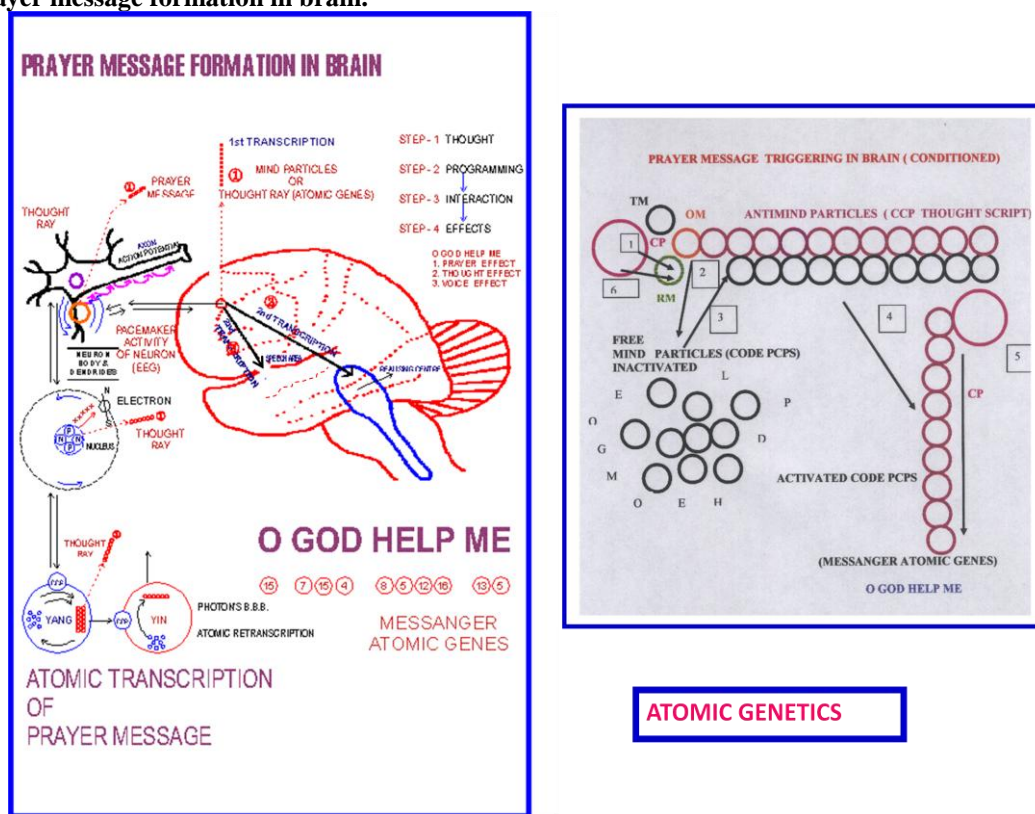

Fig 4 Divine Mechanics - Prayer message formation in brain

In atomic transcription and translation of prayer [5], following steps take place on Yang B.B.B – B-Bit as shown in Figure 4.

- 1.CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of atomic transcription triggers.
- 2.OM triggers activation of free mind particles (black -inactivated code PCPs) of that thought script (magenta) of “o god help me ”.
- 3.Free mind particles (black -inactivated code PCPs) get attached to anti mind particles script (magenta one) to form messenger thought script of “o god help me ”.
- 4.Messenger atomic genes (black) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (magenta) of “ o god help me ”
- 5.CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PcPs) and finally there is activated message of “ o god help me” is formed .
- 6.CP represses atomic transcription by adding RM (green) to OM (orange) . Thus atomic transcription gets halt.

Having formed the message it comes out in three forms .

In atomic genetic engineering (prayer) we use our basic power i.e. power of B.B.Bs. Our B.B.B. (higher center) talks with highest center of the universe by sending the message by first transcription. Till today nobody knows how does the brain generate thoughts. I am going to tell you that mystery too. In the frontal lobe the neurons are responsible for thought generation. In the neuron there is electrical activity called pacemaker activity which is occurring between dendrites and the body of the neuron. The membrane of the cell is made up of atoms and atom is made up of B.B.Bs. At the level of B.B.B. say thought of 'O GOD HELP ME' is expressed. As a result programmed messages of O GOD HELP ME (code PCPs) are formed. Out of three programmed messages, one is carried by atomic genes to highest center of the universe. It is called **THOUGHT RAY (Quantum entanglement)** which is made up of pure atomic genes and then the message goes through phenomenon called first transcription. They come out from brain directly. The other two messages are carried by photons from nucleus of atom to electrons. Here they are modulated on electrical activity of the cell called pacemaker activity. Further they are modulated on actions potentials going towards **REALIZING CENTER** situated in brain stem (RAS) and from RAS to speech area situated in the frontal area. Target B.B.Bs. of the

realizing center finally realizes thought effect of O GOD HELP ME. While from speech area message goes to motor cortex again via RAS and from there to vocal cords and finally it comes out as a speech effect of O GOD HELP ME. In layman's terminology formation of the thought ray means PRAYER as shown in Fig 4

Where Does Prayer Message go ?

Prayer message goes as shown in Figure 5 to highest center of the universe via first transcription where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5 and 6) to normal (2 and 3). This shifting of thought expression is called **ATOMIC GENETIC ENGINEERING** as shown in Figure 4.1

The changed messages reach to target B.B.Bs. through same route. Having received the changed messages, target B.B.Bs. stop expressing the previous programming and they start expressing the normal programming. As a result the cancer cells transmutate into normal cells. **Or diseased cell gets cured [6]** as shown in Fig 4.1

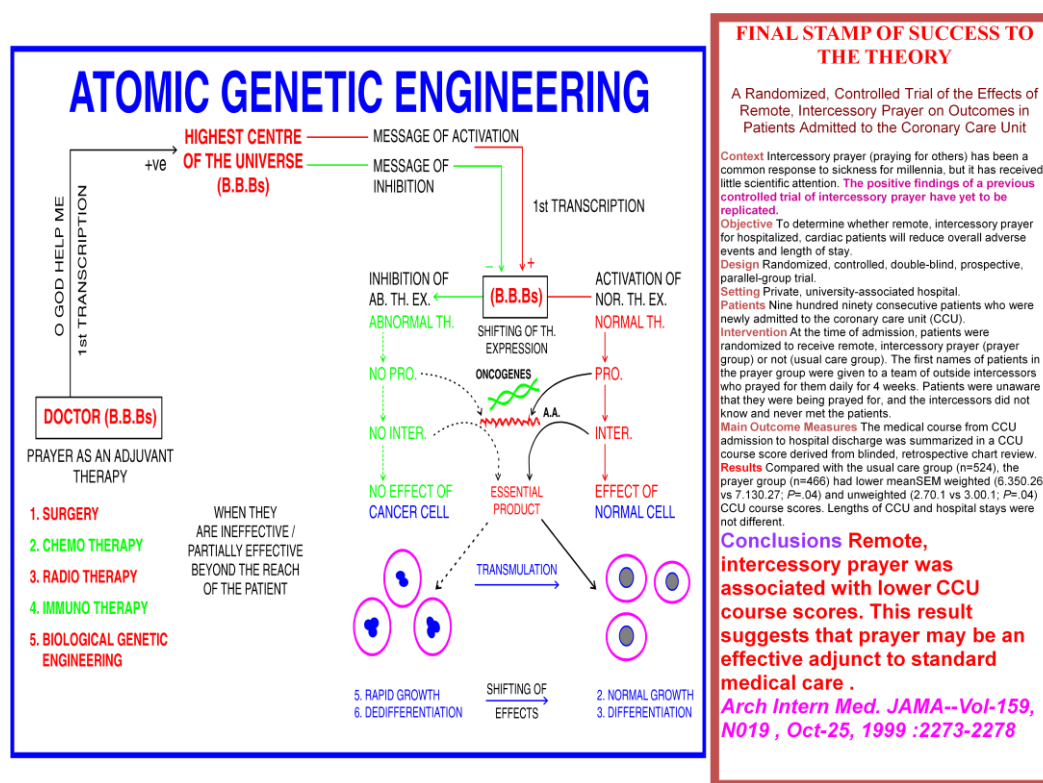

Fig . 4.1 A.G.E and Final stamp of success to New Theory[6]

1.5 Message system of the Universe

Before the origin of the universe [2] nature had only one type of message systems which is called FIRST TRANSCRIPTION. Messages (Code PcPs) used to go from one B.B.B. to another B.B.B. by atomic transcription. Messages were carried by atomic genes (Code PcPs) with very very high velocity. It is the fundamental message system.

After the origin of the universe, nature created atoms. It also created one more message system called SECOND TRANSCRIPTION. Here the message (code PcPs) are carried by photons from one atom to another atom with velocity of light. Thus atoms ,molecules, cells, and even individuals talk with one another

After the formation of the cell , nature created one more system called THIRD TRANSCRIPTION .Here there is a message storage system formed by DNA. There are messenger molecules called mRNA that carry message from DNA script to cytoplasm where the message (code PCPs) is read or translated by ribosome and they work accordingly. Thus the messages reach to enzymes and hormones and finally messages reach to target units. Having received the messages, target units work accordingly. Finally life effects (metabolic) are observed.

These three types of message systems are working in the nature. These message system are being used by the nature according to nature's need. as shown in Fig 5

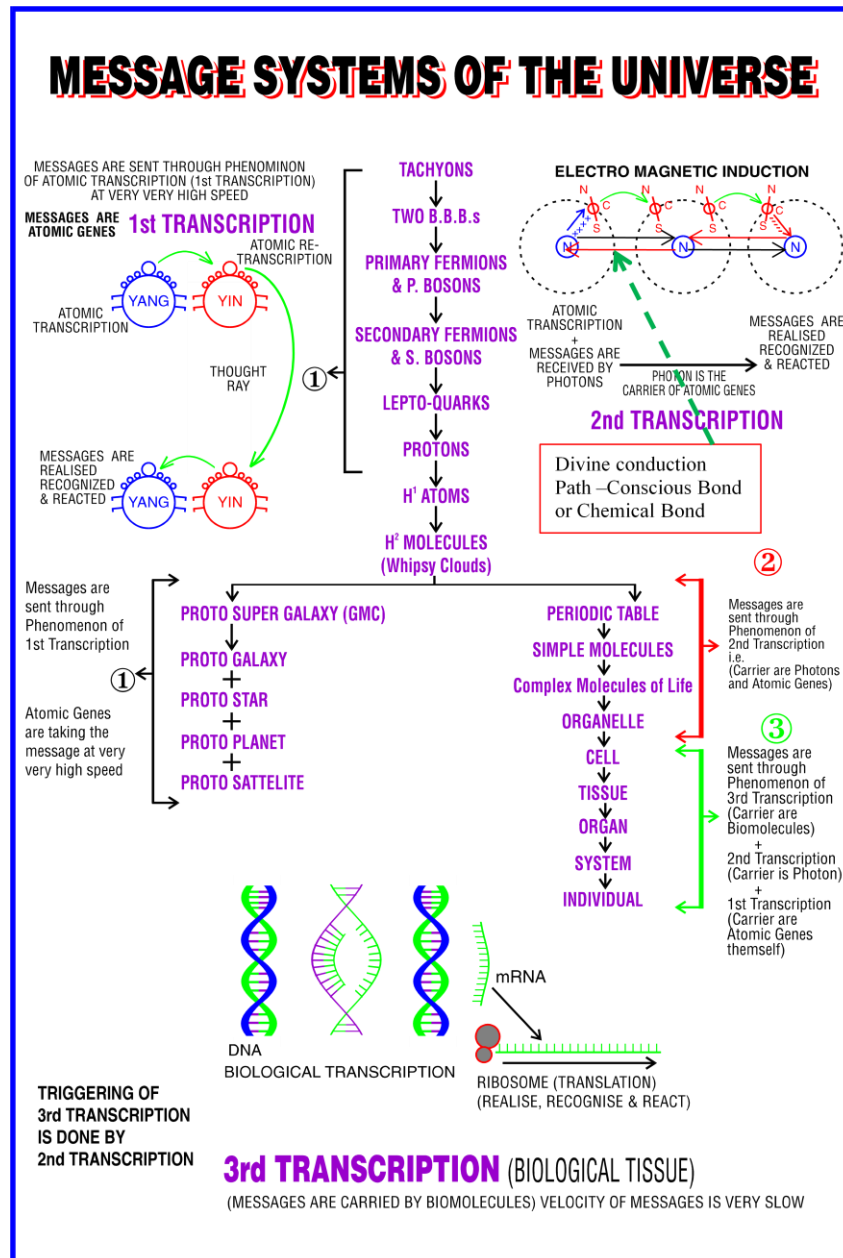

Fig. 5 Messages system of the universe

1.6 How does nature work & triggering of normal & abnormal effects

To understand creation physics as shown in Fig 6 and Fig 7. . There are two types of thought stimulation [2] . One is **CONDITIONED THOUGHT STIMULATION** and other one is **UNCONDITIONED THOUGHT STIMULATION**. **STIMULATION OF THOUGHT EXPRESSION** --- There are two types of thought expressions one is **CONDITIONED STIMULATION** of thought expression, and other one is self stimulation of thoughts i.e. **UNCONDITIONED STIMULATION** of thought expression .

At the time of the origin of the universe, all effects got created. The cause of all effects of the universe is **THOUGHT** expression. These thought expressions were triggered by **UNCONDITIONED OR SELF STIMULATED WAY** . It is the first step and it is followed by **PROGRAMMING** or formation of programmed messages by code **PCPs**. This programmed message moves from higher centers to target **B.B.Bs**. it is called **INTERACTION**. Having received the messages, the mind and mass of the target **B.B.Bs**. work in a synchronized way so as to produced the effects as thought by a the higher center. If the thought expression by

higher center is normal, the shapes, properties and laws produced by target B.B.Bs. would be normal and if the thought expressions are abnormal, the shapes, properties and laws would be abnormal. This is the basic concept of transmutation phenomenon. Finally what we observe is called EFFECT. Appearance of new shapes, properties and laws is called TRANSMUTATION. The first three steps are collectively called CCP. During transmutation process if CCP is written, it does mean that unless the thought, programming and interaction take place, nature cannot transmute. Transmutation phenomenon is seen in particles, atoms, molecules and even in cells. The basic steps of any transmutation remain the same except that the thought expressions differ.

The subatomic particle are made up of more fundamental particles called Basic Building Blocks (B.B.Bs) which are made up of mind and mass. These B.B.Bs are divine in nature with the result they talk with each other by phenomenon called atomic transcription and translation (thought expressions). The triggering of broken symmetry is caused by atomic transcriptions. Unless the atomic transcriptions occur, subatomic particles could never exhibit phenomenon of broken symmetry . So the broken symmetry is never spontaneous. It is being mis understood that sub atomic particles do have spontaneous activities as far as broken symmetry is concerned. Hence the Nobel prize physics 2008 awarded to this work is too early to give prize.

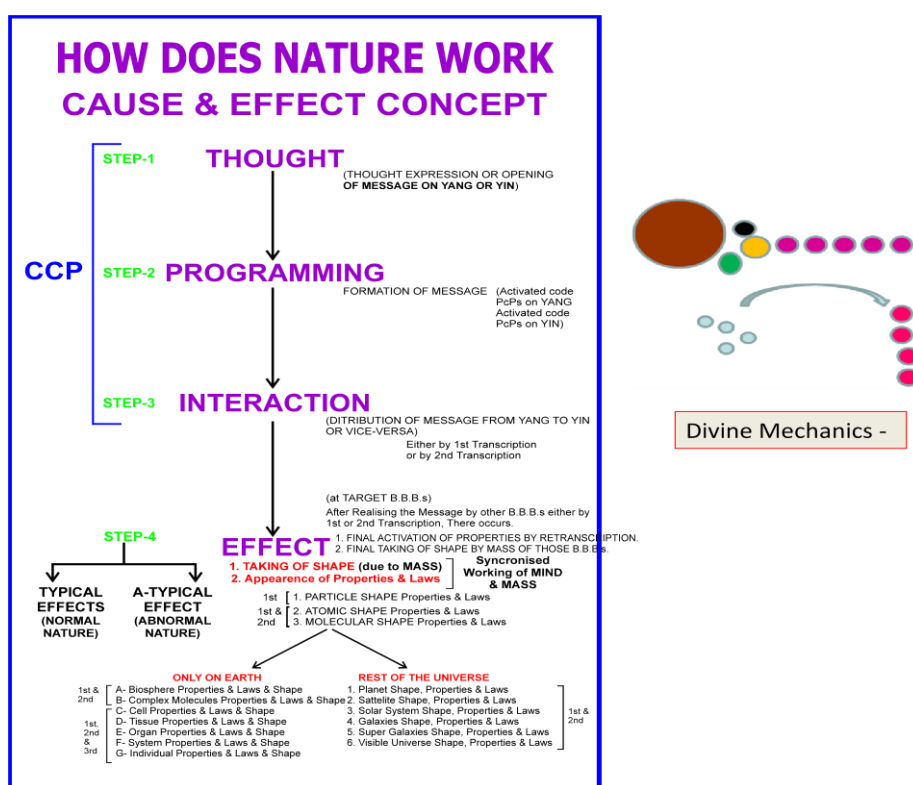

Fig. 6 Divine Mechanics – How Does Nature work ?

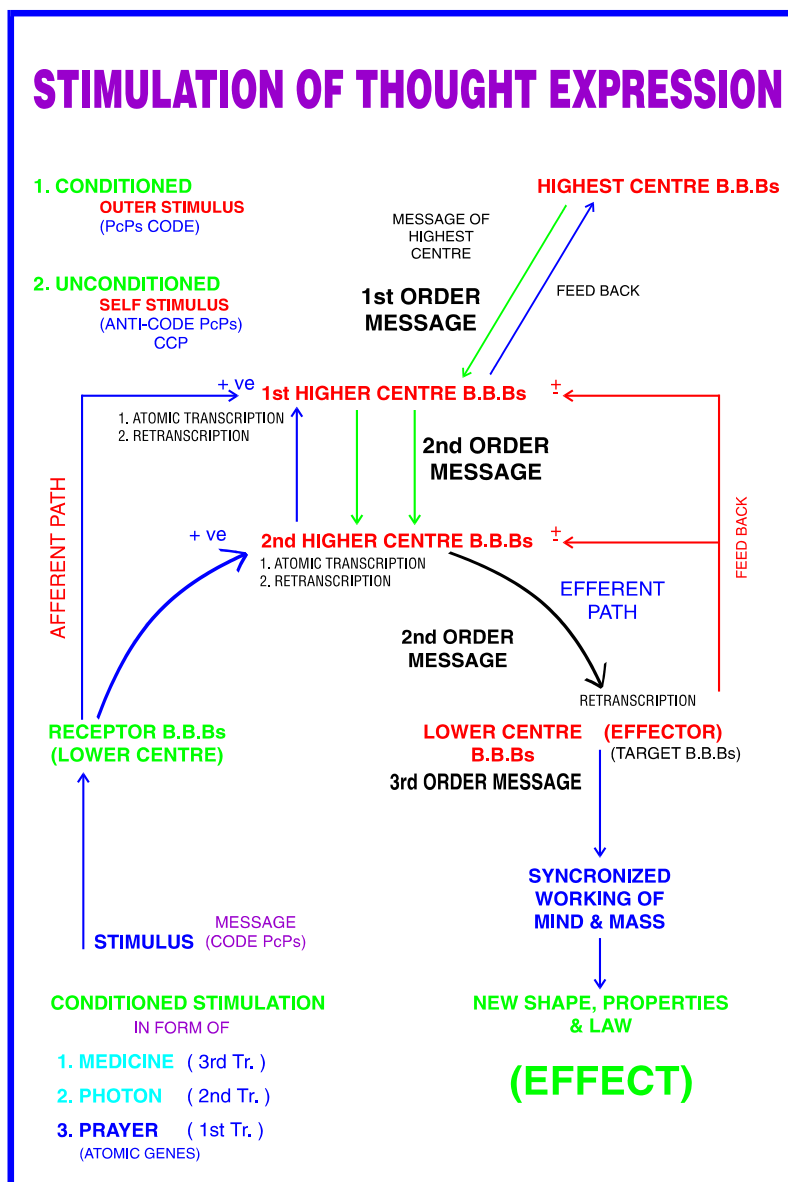

Fig. 7 Conditioned and Unconditioned thought expressions

1.7 Message network of the Universe (Feed Back Mechanism and different centers of the Universe)

With the origin of universe, nature first created primary units i.e. primary fermions (gravitation) and primary boson, these primary units are equipped with one higher center (one B.B.B.) and rest of the B.B.Bs. are working as lower centers or target B.B.Bs.[2] After primary units ,nature created secondary units i.e. secondary fermions and secondary bosons. similarly nature created tertiary units (lepto-quarks) and then quaternary units (protons& neutrons). Each unit is equipped with higher centers, lower centers and target B.B.Bs. After quaternary units nature created atomic units, molecular units, complex molecules of life units, organelle units, cell units, tissue units, organ units, system units and individual units. Each unit is equipped with higher centers, lower centers, and target B.B.Bs. Similarly nature created satellite units, planet units, solar system units, galaxy units, super galaxy units, dark matter layer unit. These units are also equipped with higher centers, lower centers and target B.B.Bs. Thus our universe is divided into different units and each unit is equipped with higher and lower centers. All higher centers are under control of highest center of the universe by efferent paths. This efferent path is made up of first transcription. Higher centers can send messages to highest center of the universe by afferent path or feed back path. Thus highest center of the universe is well informed about all effects of the universe. Messages can come from lower centers to higher centers and from higher centers to highest center of the universe via afferent path. The highest center of the universe can send messages to higher centers and from higher center to lower centers. There is an inter unit message network also which is made up of first, second and third transcription depending upon the nature's need. Thus the entire universe is under control of highest center

of the universe. Highest center can change any programming programmed by it during pre creation era as shown in Fig 8

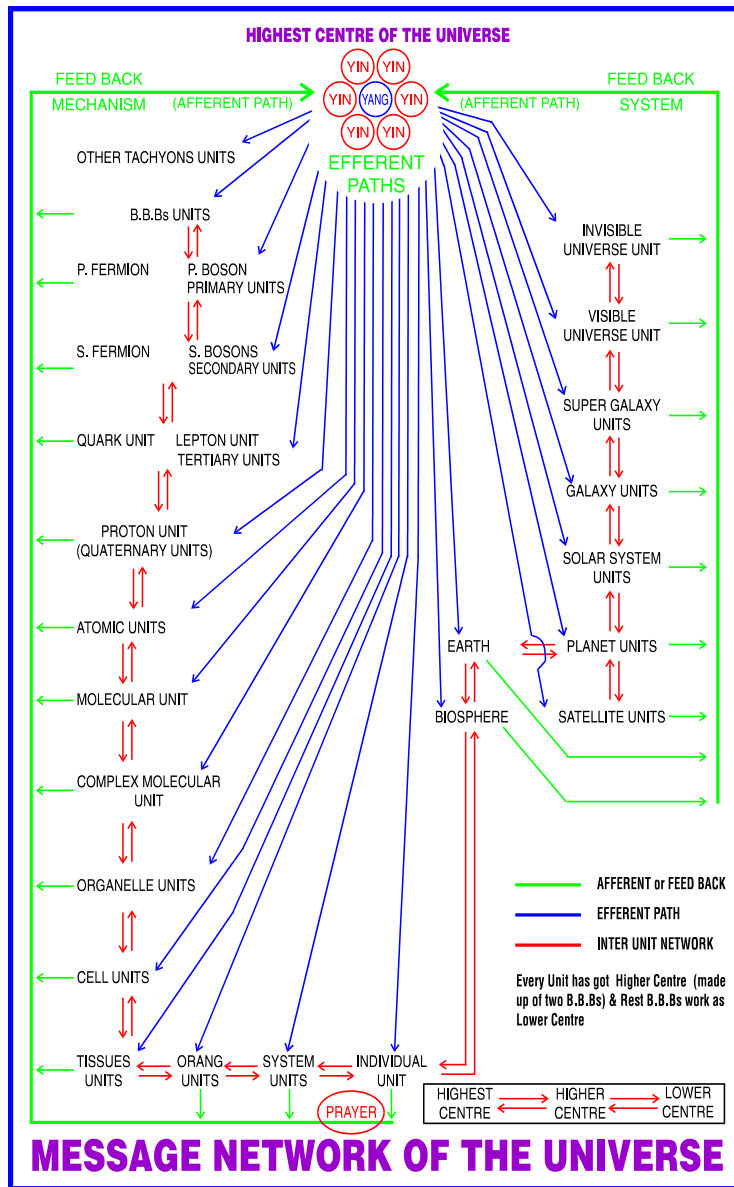

Fig. 8 Messages Net work of the Universe

1.8 Origin of the universe [7]

Hoyle – Narlikar Universe

ORIGIN OF THE UNIVERSE CONTINUOUS CREATION THEORY----

HOYLE AND NARLIKAR THINK THAT NEW MATTER IS BEING CREATED DUE TO 'IMPLOSION' TO BALANCE THE EXPANSION OF THE UNIVERSE, WHICH ASTRONOMERS HAVE OBSERVED. INSIDE 'QUASI STARS' GRAVITATIONAL COLLAPSES MAY FORM SOME MATTER IN THE UNIVERSE. THE HUGE LUMINOSITY AND THE RADIOEMISSION FROM THESE QUASI -STARS APPEAR TO BE 'GRAVITY POWERED' UNLIKE ORDINARY STARS WHICH DERIVE THEIR ENERGY FROM NUCLEAR REACTIONS

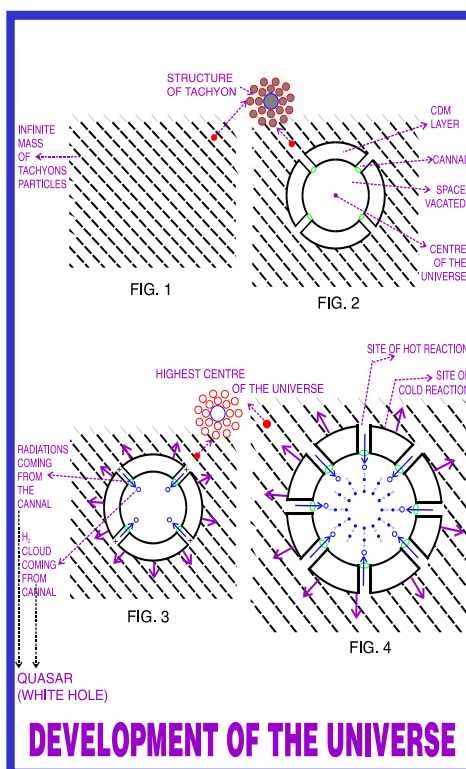

Fig. 9 Development of the Universe

Before the origin of the universe, these Basic Building Blocks (B.B.Bs) as shown in **Fig-3** were in the form of tachyons as shown in **Fig-9** [7]. It means that at that time the tachyons were everywhere in the universe. Let us look at the structure of tachyons; it is made up of one matter B.B.B. (YANG) and many energy (YINs) B.B.Bs. Initially out of the infinite tachyons, one became the **highest center** of the universe. Messages used to go from highest center to rest of the universe and messages could come from rest of the universe to highest center of the universe by atomic transcription. Thus highest center had fed its thought to rest of the B.B.Bs. that would take part in creation - that they would express only those thoughts to give desired effect as wished by the highest center of the universe. So all B.B.Bs were informed about their role before creation of the universe. In pre-creation era programming of the future universe was done by highest center of the universe. Our universe is oscillating and it is a divine universe. It means that it has a creation phase and a destruction phase. During creation phase tachyons break into their B.B.Bs. and from these B.B.Bs, formation of fermions and bosons take place as shown in **Fig 3.1**. After the creation phase, destruction would start and in this phase all created particles would again break into their B.B.Bs and finally tachyons would form. At the time of origin of the universe, all the effects got created. These effects are taking of different shapes and appearance of properties and laws. All these effects are studied in various branches of science.

With the origin of the universe, nature first created a sphere of **COLD DARK MATTER (C.D.M)** and canals in it. With the result space got created. At the other end of the canals, hot reaction started (**the relics are back ground radiations 2.7 degree K of our hydrogen clouds**). As a result hydrogen clouds and lot of radiations were created. The empty canals were filled by these hydrogen clouds and radiations and thus **QUASARS** appeared in the universe. Simultaneously C.D.M. layer started expanding and clouds and radiations kept on coming in this closed universe as shown in **Fig 9**. With the passage of time more and more C.D.M. layer formed, more and more quasars formed. The hydrogen cloud came in this closed universe. They started running towards C.D.M. layer as they were attracted by the gravity of C.D.M. layer. Those clouds, which were nearer, moved faster than those, which were away from CDM Layer. The **HUBBLE LAW**, can thus be explained. With some more passage of time, clouds were joined to form **GMC** (giant molecular clouds). Later by self-gravitation different proto stars, proto planets, proto satellites were formed. Finally stars became bright and thus bright galaxies appeared in this universe. Our universe is still in expansion phase and creation is still going inside quasars. It is to be remembered that highest center of the universe does not come in the visible universe. It keeps on receiving the messages by atomic transcription and it has power to change any programming programmed by it during pre-creation era.

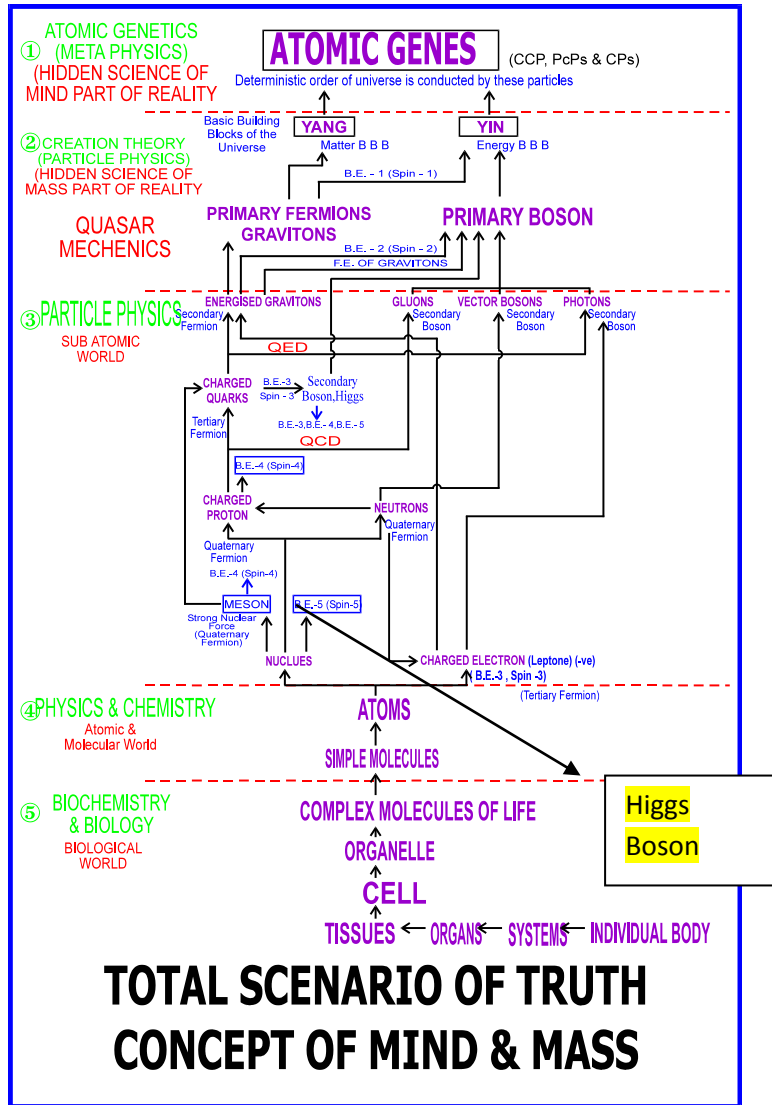

Fig 9.2 Total scenario of Truth Mind and Mass

1.9 DM and DE i.e. energized gravitons and energy pool of the universe as shown in Fig 10 and Fig 11 [8]

Fig. 10 Structural configuration of Leptons and Quarks as regard DM and structural configuration of DM and DE at micro level

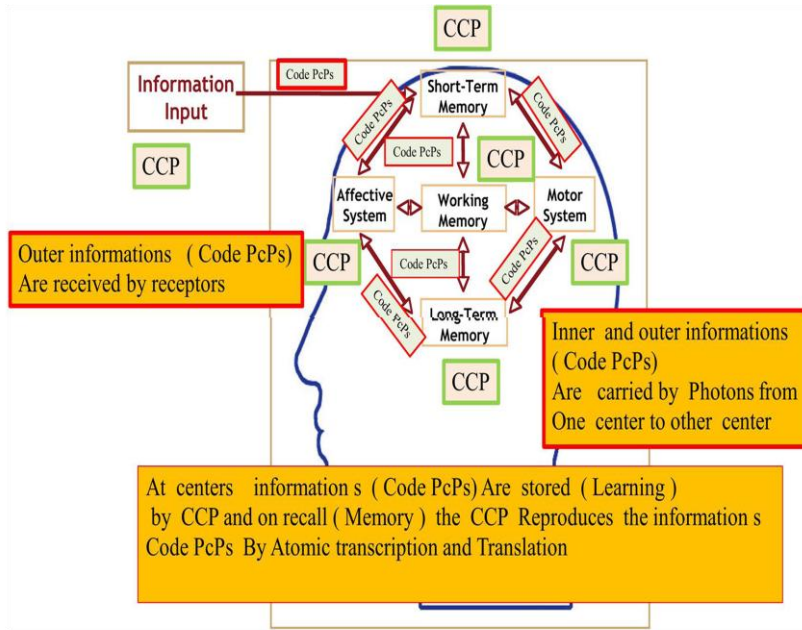

Fig 11 structural configuration of DM and DE at macro level [9]

1.10 Divine Mechanics and Brain Computation

Learning and Memory and information s (Code PcPs) Net work in Brain [10]

Divine Mechanics and Brain Computation

Fig 12 Divine Mechanics of Brain Computing System – Learning and memory

At all steps , these are B.B.Bs (B-Bit) that are responsible for information’s control and triggering . If CCP is written it means unless atomic transcription and translation occur , brain cannot have learning and memory triggering and control and it is called Divine mechanics of Biology and it is life . These are higher thought expressions of B.B.Bs . In Bits of classical computers and qubits of QC , the thought expressions are lower and different but the mechanics (DIVINE) remains the same. as shown in Fig 12

Physics dictates the lowest limit of size of chip **but DIVINE mechanics does not Moore’s Law Modified and Completed**

Fig 13.1- The Theory of Computers and Brain are same – DIVINE MECHANICS

(Structural and Functional smallest Bit (mass) is B-Bit of the universe and the Divine Mechanical Unit is CCP , Code PcPs and CP.)

DIVINE MECHANICS The Theory of Computers and Brain is SAME as shown in Fig 13.1

Physics dictates the lowest limits of the size of chips [11]. But divine mechanics does not . Hence the bit is a typical unit of information. ((Classical and Quantum Bit) is wrong and to describe informations by adding qubit is also illusion as in complicate system ,it is the different thoughts expressions that describe informations . Informations are separate (Code PcPs) and bits (Electron of transistor) qubits (electron of diamond crystal) are separate. At DNA level the bit is nucleotide (A,T,C,G) and at Atomic level the bit is photon and electron , at particle level (secondary fermions and secondary bosons) the bit is primary fermions and primary bosons and informations are still code PcPs and at B.B.B level the bit is B.B.B (Yang mass and Yin mass - B- bit) it self and the information is carried by Code PcPs but at all level of all bit units the information storage system is CCP (Physiological arrow of Time) it never dies even after destruction of the universe. Hence information s are eternal . In computers, Bit is a structural configuration that describes information s of the system and information s are in form of Code PcPs. The working of the bit is triggered and controlled by thoughts of higher centers that form that bit. If the bit is classical (transistors of chips) the effect is different . But if the bit is qubit with entanglement the working is triggered and controlled by thoughts of higher center that form that crystal . In both the effect of describing informations would be different.

One is classical (thought expressions are fixed and limited)and other one is quantum (thought expressions are changing and more wide to describe the more wide complicated system to have fast results .) . In life sciences in Brain the bit is again Photon and the information s are Code PcPs and they are triggered and controlled by CCP of higher centers that is triggered by DIVINE MECHANICS .

In life sciences the CCP (cryptography) of B-bit expresses informations (Code PcPs) which were not fed like speaking Lie and unlike Bit of classical computer and qubit of QC it shows phenomenon of forgetfulness and IQ phenomenon (mental age /real age) . It is Higher functions of B.B.B or B Bit and it is life . Hence there is difference in some aspect of DIVINE MECHANICS \of Computers computation and Brain computation

1.11 A word about Religion “I” (In Photo Depiction) Secularization of God [12] (Fig 13.1 and Fig 13.2) “ Religion is lame without science and science is blind without religion “ Einstein

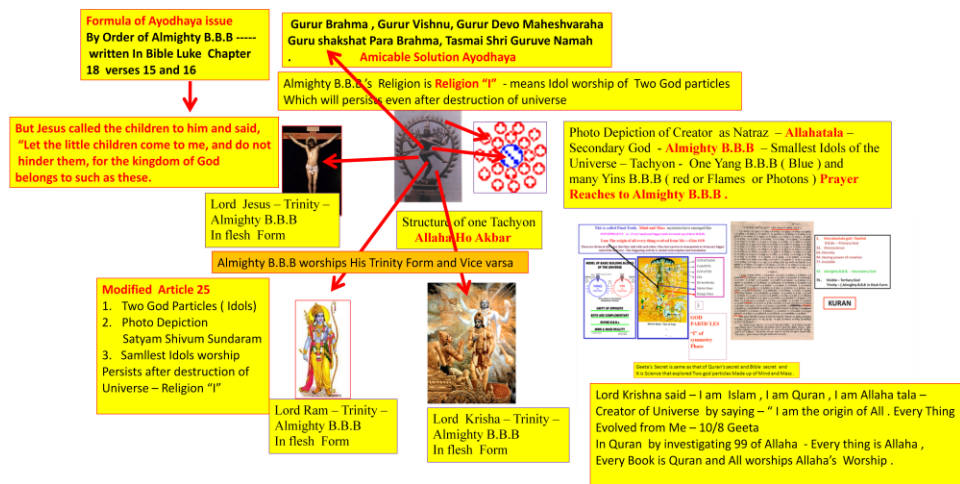

Fig 13.1 Religion “I” Almighty B.B.B and Trinity “ Religion is lame without Science “ – Einstein

We all belong to One Spirituality or one Religion i.e. "I" but with different Rituals and worships calling it Unification of Spirituality or Religions . Hence teaching regarding God in different religions (Hindu , Islam and Christianity etc realizations) are illusion. They donot teach about Two God Particles – The Real eternal God Particles . Religion "I" means Worship of IDOL of Two God Particles . It Persists Even After Destruction Of Universe . I am the origin of All . Every thing evolved from Me – 10/8 . Say With Proud "I" am Idol of TWO God Particles or Satyam Shivum Sundarum. All religions do IDOL worship of Two God particles in different

ways. Unless brain sees idol of two God particles during worship , worship is incomplete . The third aspect of amicable solution is secularization of God which would appear in the end of Kalyug i.e. God is out of religion . It is the science of Prayer that would redefine God’s name and thus no religious names would be popular among scientists and thus God would be secularized . These names are – Primary God, Secondary God , tertiary God , trinity , and Tawhid. For example

Religious names of God	Secularized names of God or Scientific names	photo depiction
1 •Christian God – Jesus	Trinity (Almighty B.B.B in flesh form)	
2 •Islam – Allahatala	Secondary God (Almighty B.B.B - Yang) Creator (smallest Idol)	
3 •Hindu God – Ram	Trinity (Almighty B.B.B in flesh form)	
4 •Jainism God --- Nirakar - postulate an eternal universe	Taw hid .(one absolute God or I made up of two B.B.Bs)	
5 •Vedas – worship -Creation Sun , moon , plants , rain etc	Tertiary God (Visible units – made up of Two B.B.Bs)	
6 Hindu Goddess Durga and Her Nine Avatar	Trinity (Yin B.B.B In flesh form)	

Fig 13.2 Scientific names of God – secularization of God “ Science is blind without Religion “ Einstein Structure

2.1 What is life Conditioned stimulation of CCP phenomenon of Germination

The first step in germination is IMBIBITION. Imbibition of water causes resumption of metabolic activities. Initially metabolism may be anaerobic (due to energy provided by the glycol sis) but it soon becomes aerobic as oxygen stats entering the seed.

What are life activities?

DNA Activities

- Transcription – that leads to first anaerobic metabolism later aerobic metabolism. It is very very low in seed .
- Replication – it is nil in seed. Replication is the sign of life. If seed does not show replication phenomenon, it means for practical purpose it is dead.

During germination anaerobic metabolism is triggered and later it is shifted to aerobic metabolism . Replication is also triggered

After few weeks

Seed 1% life effects

Germination phenomenon 60%-70% life effects

At the end of maturity the cycle is repeated.

BIOLOGICAL FUNCTIONS ARE HIGHER THOUGHT EXPRESSIONS OF B.B.Bs

HIGHEST CENTRE OF THE UNIVERSE

- 1st TRIGGERING & REGULATOR
- 1st TRANSCRIPTION (Firsting of Thoughts)
- 1st of Body Functions or Body Effects (During Pre-creation Era)
- FEW (B.B.Bs of the Brain)
- PRAYER BY 1st TRANSCRIPTION
- FEED BACK

BODY B.B.Bs (HIGHER)

FEED THOUGHT EXPRESSION

2nd TRANSCRIPTION (RETRANSCRIPTION)

(LOWER CENTRE)

REGULATORY GENE & OPERON GENE OF DNA

Both are Triggered or Activated

2nd Further they Trigger & Regulate (LOWER CENTRE)

PRODUCTION OF HORMONES & ENZYMES

They Trigger & Control

- GROWTH
- METABOLISM
- REPRODUCTION
- CELLULAR RESPIRATION (Aerobic)

3rd TRANSCRIPTION IS TRIGGERED

ENDOCRINE REGULATION

HORMONES ENZYMES (It includes those effects which are controlled by BIOLOGICAL GENE both Physiological & Pathological)

H₂O

TRIGGERING & REGULATION OF BODY FUNCTION

For knowing : 1. Life & Death Physiology
2. Mysterious Behaviour of the Brain
3. Triggering of Cardiac Rhythmicity
4. Prayer & its healing effect

1. ENDOCRINE SYSTEM
2. NERVOUS SYSTEM

NERVOUS REGULATION

BRAIN, HEART (S.A. NODE)

Hest Physiological & Pathological Events are Triggered Directly

For Example :

- Electrical Activities of Brain & Heart (Both Normal & Abnormal)
- Process of Replication of DNA (Self Replicating Molecule of Life)

Figure 14 Stimulation of thought expression by conditioned

Few functions are triggered by conditioned stimulation of thoughts like life and death physiology i.e. if you add water, you would see life effect and if you remove water, you would see death effect. (Fig 14)

MICHANICS OF LIFE AND DEATH (Figure 14)

Seed is alive (say having 1% of life activity) but hardly show any sign of life. It has low water content and exhibits virtually no metabolic activity. Such quiescent seeds can live for many years but germinate when soaked in water under suitable temperature and in presence of oxygen. Metabolic activity (anaerobic) are very low in seeds. Metabolic activities come to visually standstill as the seed coat becomes increasingly impermeable to oxygen and moisture.

The first step in germination is **IMBIBITION**. Imbibition of water causes resumption of metabolic activities. Initially metabolism may be anaerobic (due to energy provided by the glycolysis) but it soon becomes aerobic as oxygen starts entering the seed.

What are life activities?

DNA Activities

- a. Transcription – that leads to first anaerobic metabolism later aerobic metabolism. It is very very low in seed.
- b. Replication – it is nil in seed. Replication is the sign of life. If seed does not show replication phenomenon, it means for practical purpose it is dead.

During germination anaerobic metabolism is triggered and later it is shifted to aerobic metabolism. Replication is also triggered. The triggering of both the activities is onset of atomic transcriptions of replication as well as onset of transcriptions of aerobic metabolism. With the result messages come on the surfaces of DNAs and during 3rd transcriptions they are shifted to different mRNAs and finally they reach to different enzymes and hormones. These enzymes and hormones carry messages to target units. With the result we observe phenomenon of germination. The entire working has been depicted by line diagram (**Fig –14**). These atomic transcriptions are stimulated by water that is why it is **CONDITIONED STIMULATION of CCP**. The percentage of thought expressions increase with the time and we observe increase in the number of effects. At present we can say that plant is showing from 1% to 20% or 40% of its effect till it reaches its maturity. At maturity the plant exhibits all effects and at that time we can say it is expressing 100% life atomic transcriptions. With the formation of new seed life atomic transcriptions once again reduced to 1% only. This cycle i.e. going from 1% life effects or atomic transcription to 100% life effects and coming back to 1% again is being visible to us at present. When water is withdrawn, it leads to suppression of life thought expressions and death thought expressions are triggered with the result we observe death effects of plant.

CONCLUSION OF THE EXPERIMENT- The phenomenon of life effect is triggered by atomic transcription of life. Unless life atomic transcriptions are triggered, life effects are not visible. So life effects are nothing but higher thought expressions of basic building blocks. Phenomenon of death is triggered by death atomic transcription. At the time of death life thought expressions are inhibited and death thought expressions are triggered with the result we observe death effects. Water only stimulates life thought expressions that leads to triggering of different life activities (metabolic, replication and other electrical activities) inside the cell. Being a scientist, one must know how do life effects come about. Life effects are higher thought expressions of B.B.Bs. Formation of particles, atoms and molecules are due to lower thought expressions of B.B.Bs. But their higher thought expression lead to appearance of all life effects. One who knows properties of B.B.Bs. and atomic genetics, can understand how life effects are triggered. There is nothing like **SOUL**. **It is a myth** that when soul goes inside we get life and when it moves out we are dead. When thought expressions of life are suppressed and thought expressions, of death are triggered, we observe death effects. So life effects are basically triggered by atomic transcription occurring on B.B.Bs.

2.2 Concept of SOUL is myth. unconditioned and conditioned stimulation of CCP in life phenomenon

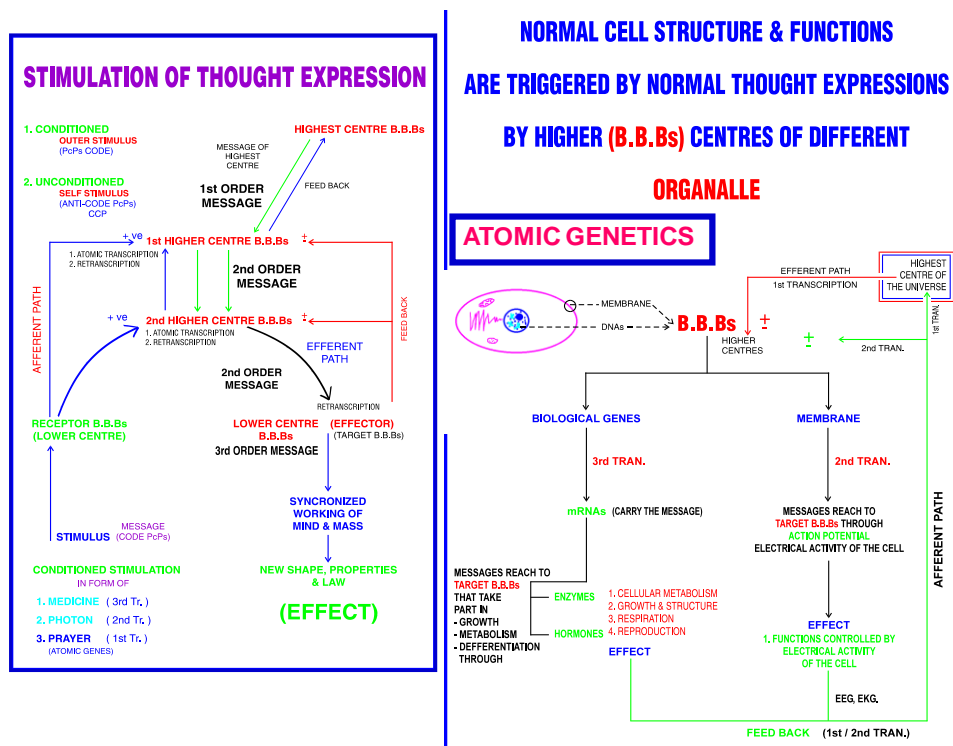

Figure 15 Stimulation of thought expression by unconditioned or conditioned in our body

Triggering and regulation of cell functions or cell physiology

Normal cell structure and function are triggered by atomic transcriptions or thought expressions by higher centers (B.B.Bs.) present inside the cell. These higher centers are found in **DNAs** and in the membrane. Higher centers in **DNA** express thoughts. The programmed messages (code PCP) are carried by photons from nucleus of the atom to electrons. Thus messages come on the surface of **DNA** molecule. These messages shift to mRNA during third transcription. **mRNAs** carry the messages (code PCPs) from nucleus to cytoplasm where messages are translated by ribosome. Simultaneously, messages shift to peptide chains (enzymes & hormones) These enzymes and hormones carry the messages to target units (B.B.Bs.). Having received the messages, target units work accordingly and life effects like metabolism, cellular respiration, growth and structure formation, and other metabolic effects are observed. There is feedback of the effects to the higher centers. Thus triggering and regulation of metabolic functions are carried out.

Similarly, the higher centers of membrane express thoughts. These thoughts are carried by photons from nucleus to the electron of the atom. Thus messages (code PCPs) come on the surface of the membrane. Here they are modulated on pace maker electrical activity and further on action potential and thus action potential (second transcription) carries the messages from one part of the cell to the other part of the cell. This is called electrical effects (EEG and ECG) of the cell. There is feed back of these effects to higher center and thus these effects are triggered and regulated.

Both the effects (metabolic and electrical) have their feedback not only to higher centers but also to highest centers via first transcription. So highest centers are well informed about all effects of the cell. Higher centers are not autonomous centers rather they are also under control of highest centers of the universe.

2.3 Body functions and their regulation by different centers

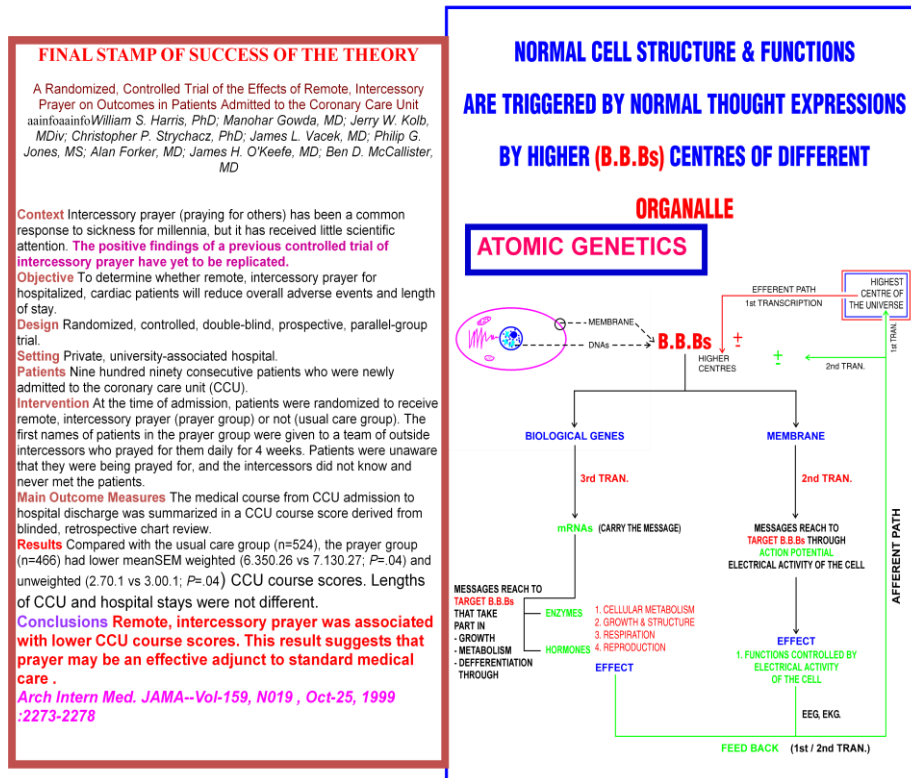

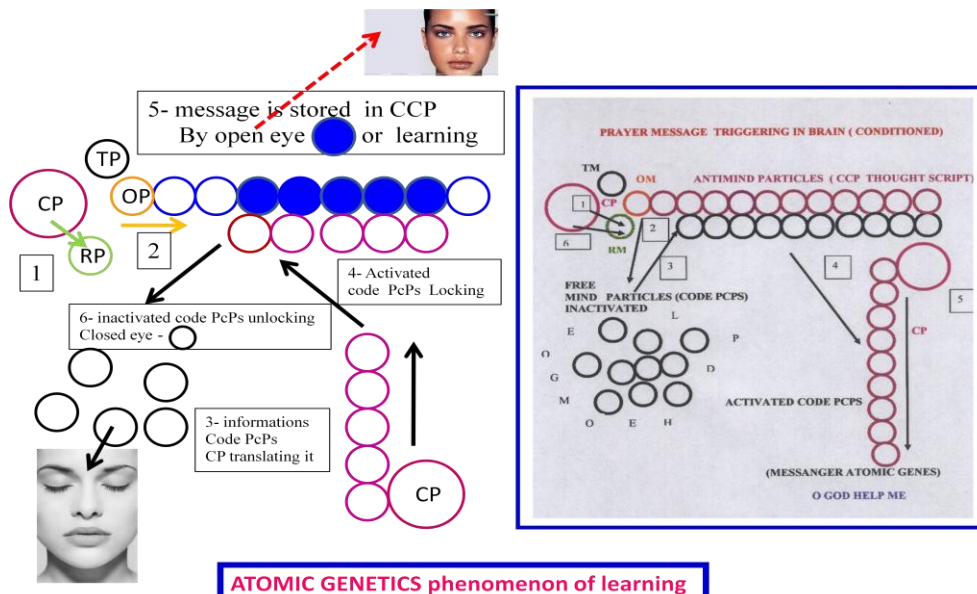

Figure 16 Stimulation of thought expression by unconditioned and conditioned

Our all body functions are triggered by different thoughts expressions by different higher centers present in biological genes or DNA or in membrane of the cell . Thus different life effects are seen . There is feed back to Highest center of the universe. That controls higher centers of our body. Prayer triggers this highest center to have its healing effect. Highest center is situated in invisible universe beyond CDM layer. Concept of SOUL is myth.

2.4 Phenomenon of learning and Memory recall –

Learning message formation in brain – reverse of prayer message formation (Fig 17)

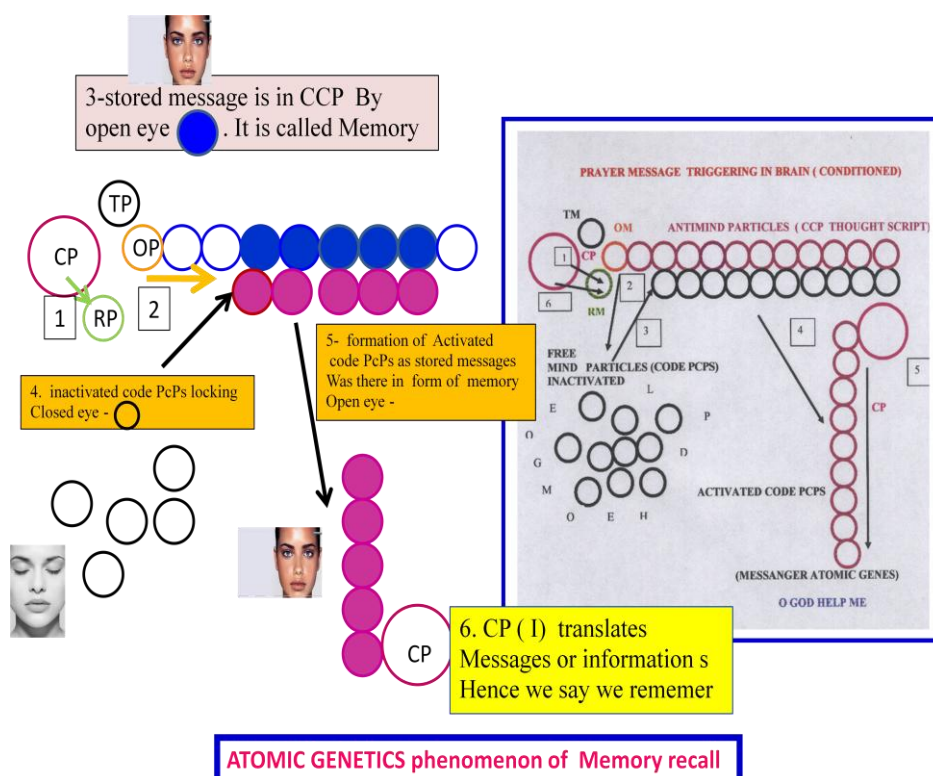

ATOMIC GENETICS phenomenon of learning

Fig 17 phenomenon of learning

In phenomenon of learning , following steps take place on Yang B.B.B – B-Bit (Figure 17) .

- 1.CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of learning is triggered
- 2.OM triggers Anti mind particles (Anti mind particles script) of that thought script (blue not filed circles) of “**o god help me**” .
3. CP translates activated mind particles (magenta - . **activated code PCPs**)
- 4.They get attached to anti mind particles script (Blue one) to activate anti mind particle script of “**o god help me**” .
5. Finally there is activated message of “ o god help me” is formed is stored in CCP (Filled blue – open eyes antimind particles)
- 6.Messenger atomic genes (magenta) get detached from anti mind particles thought script to form inactivated messenger atomic genes (inactivated code PCPs) (black – closed eyes) of “ o god help me ”
- 7.CP represses learning by adding RM (green) to OM (orange) . Thus learning or storing of information s gets **halt**.

Phenomenon of Memory Recall – (Fig 18)

ATOMIC GENETICS phenomenon of Memory recall
Fig 18 Phenomenon of memory recall

In phenomenon of memory recall , following steps take place on Yang B.B.B – B-Bit (Figure 18) .

- 1.CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of recall is triggered
- 2.OM searches learning mindness on Anti mind particles (Anti mind particles script) of that thought script (blue filed circles- open eye) of “**o god help me**” .
3. But as that learning mindness is there with opening eyes of learnt anti mind particles .
4. Inactivated code PcPs mind particles triggering to lock on Anti mind particles script
5. Formation of activated code PcPs as stored messages was there in form of memory (open eye)
6. Finally there is activated message of “ o god help me” is formed (Filled magenta circle – open eyes) by CCP (filled circle blue –open eyes) . CP makes phenomenon of splicing . Information s are sent to realization center in RAS where CP translates the information s . Hence CP of realization center (I) translates message and I say I remember the prayer of “ O God Help Me ”.
- 7.CP represses act of recall memory by adding RM (green) to OM (orange) . Thus recalling information s gets **halt**.

Depiction of Conditioned and Unconditioned Dream (fig 19)

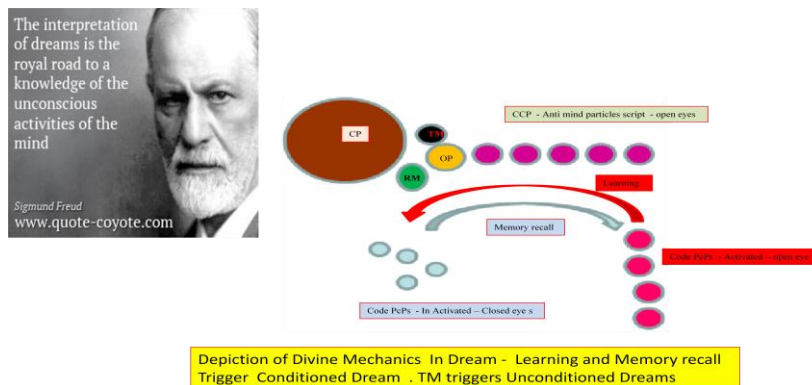

Fig 19 Conditioned and Unconditioned Dream

2.5 Flip-Flop Switch Hypothesis in Human beings .

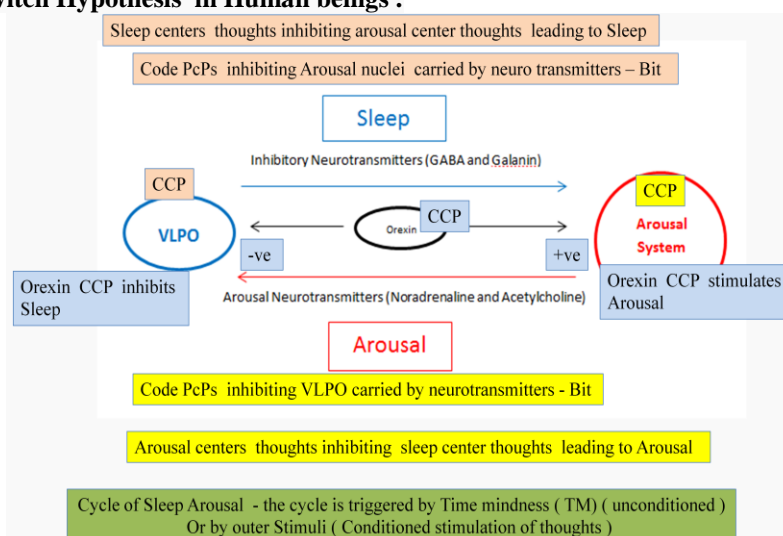

Fig – 20 Schematic representation of the Flip-Flop Switch Hypothesis (modified and completed) and Divine Mechanics

The timing of transitions between sleep and wakefulness are also tied closely to the body’s internal biological clock located in the suprachiasmatic nucleus (SCN). This tiny structure—made up of approximately 50,000 brain cells—receives light signals directly from the eye, through the optic nerve. Light resets the clock to correspond to the day-night cycle. In turn, the clock regulates the timing of dozens of different internal functions, including temperature, hormone release, and sleep and wakefulness. The SCN promotes wakefulness by producing a powerful alerting signal that offsets sleep drive. The SCN promotes sleep by turning off the alerting signal. In addition, the SCN actively maintains sleep throughout the night even after sleep drive has dissipated in the second half of the night.

2.6 Sleep arousal phenomenon in Plant Kingdom (Fig 21 and Fig 22)

Sleep and arousal phenomenon is not only found in animals but also it is found in plants too. It is TM (time mindness) that triggers and regulate unconditioned thought expressions of sleep and arousal both in animals and plants . The behavior of plant changes while sleeping or during arousal . During sleep , mimosa plant shows sagging of leaves by inward movements of leaves and by adduction of pedicles of leaves . During arousal plant shows outward movement of leaves and abduction of pedicle of leaves . At higher center (B.B.B) thought of sleep or arousal are expressed . Programmed Messages (Code PcPs sleep / arousal) are carried by photons (second transcription) from higher center to target B.B.Bs . Having received the messages , target B.B.B s work accordingly and we observe the effect of sleep (in word movement of leaves and adduction of pedicles) or arousal (out ward movement of leaves and abduction of pedicles) . Higher centers (CCP) of sleep and arousal are different and their alternate stimulation or inhibition is triggered by TM (Time mindness – real biological clock) at the level of B.B.B . It is property of B.B.B that triggers and control through TM both sleep and arousal thought expressions in plant and animals but in animals a specialized system is evolved that is

formed by neurons and chemicals (in RAS) but in plant it is formed by divine atoms only . But the Flip Flop switch hypothesis is same and it is triggered and controlled by different thought expressions through TM (time mindness or real biological Clock) . Sleep and arousal phenomenon is higher thought expressions or functions of B.B.Bs and it is life .

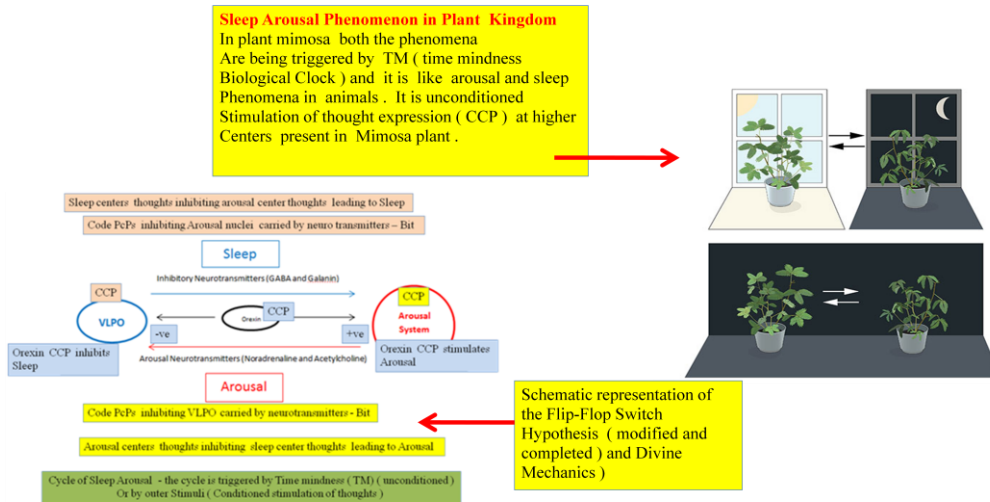

Fig 21 Sleep arousal phenomenon in Plant Kingdom and Flip Flop Switch Hypothesis in animals.

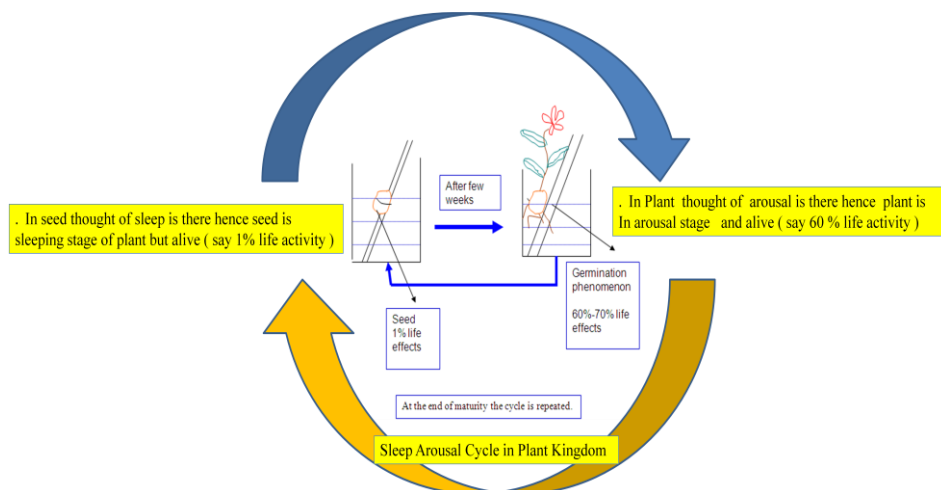

Fig 22 In seed thought of sleep is there hence seed is sleeping stage of plant but alive (say 1% life activity)

2.7 Sleep and arousal phenomenon in Universe “I” .

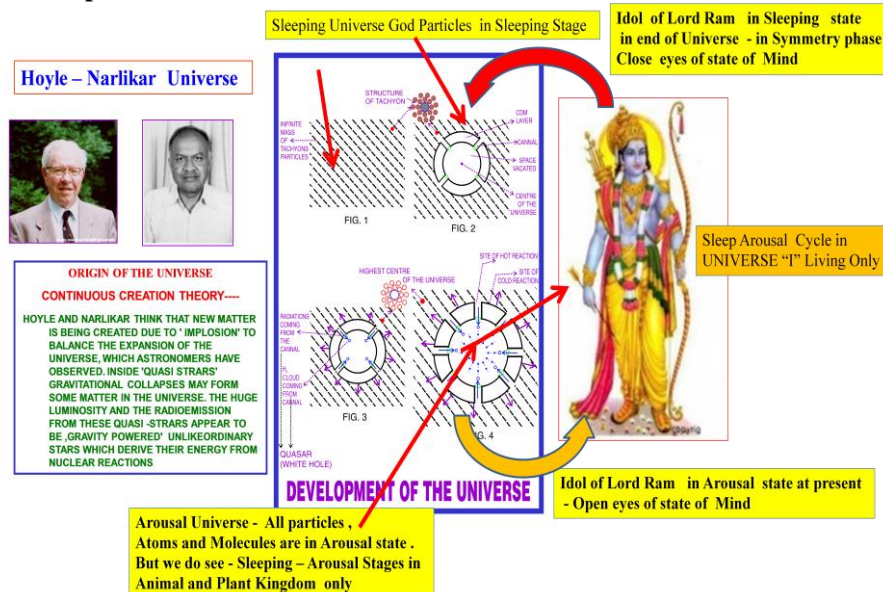

Fig 23 Sleep and arousal phenomenon in Universe. State of God particles (Sleep – Arousal Cycle in one creation in different stages . Tachyons particles and particles , atoms and molecules) of universe “I”

Hence Idols never sleep as they are made up of particles, Atoms and molecules . Idols are set of informations (Code PcPs) and that too not changing or fixed . In us, death set of informations are different than life set of informations and our set of informations could be recreated only by Almighty B.B.B . Hence death is illusion in us . In Idols , single stage of set of information is there and particles , atoms, molecules have arousal state of mind (Eye open) . Hence Idols are alive even in statue stage by virtue of arousal - sleep property (property of life) of God particles (Mind and Mass) . (Fig 23)

II. Conclusion

It is the thoughts that trigger arousal (some thought expressions are active mainly related with higher functions)and sleep (some thought expressions are inactive mainly related with higher functions) phenomenon by virtue of sleep and arousal property of B.B.B .It is TM (time mindness) that trigger and regulate sleep arousal phenomenon . . Similarly in symmetry phase of universe , thought of sleep triggers that makes all God particles in sleeping stage but alive . When universe got created , these sleeping thoughts get transformed into arousal thoughts and arousal state with the result formation of particles , atoms and molecules took place . Idols are made up of these stuff , hence they are in arousal state and by virtue of this property they are alive .(Pran Pratishtha) . Sleep (mind close eyes) and arousal state (mind open eyes) is common in all stages of the universe (B.B.B , particles, atoms, molecules, cell , animal and plant kingdom). Hence Life means sleep and arousal phenomenon (new definition) . Hence statues are alive because they are in arousal state of mind . (Open eyes) till creation exists . After the creation is over all stages of God particles would come in sleeping state in symmetry phase (close eyes –mind) but alive (new definition) . Arousal Cycle in one creation in different stages (Tachyons particles to particles , atoms and molecules and) of universe . Universe “I” is always Alive (new definition) whether it is in sleeping state of mind or arousal state of mind.
