**Abstract:** It is believed that north and south magnetic fields or forces which are mediated by photons are same . It is myth . North magnetons are different than south magnetons as we have two different charges like positive charge ( +ve emf ) that proton possess and negative charge ( -ve emf ) that electron possess . When these magnetons interact with matter , they produce effect by generating thoughts . Which are known as Laws of Physics . These laws are Fleming's Left hand rule ( clockwise rotation ) or Fleming's right hand rule ( Anti clock wise rotation ) . Two different programming's ( Code PcPs clockwise rotation or Code PcPs anti clock wise rotation ) are made and when target Basic Building Blocks receive the messages , they work accordingly and we finally observe the effects calling rotational movement of objects either clock wise or anti clock wise . In cosmos dying binary stars in which one is red giant and other one is neutron star , the falling matter forms circular disc ( by inter orbital shift phenomenon ) and it obeys both Fleming right and left hand rules simultaneously . The two types of charged particles while falling in black massive body ejected out with velocity of light right angle to disc in opposite directions . It is by virtue of receiving two different messages ( Code PCPs right and left ejection of falling matter ) . With the result we observe ejection of matter on both the side of center of disc . The energy for work done in this phenomenon is supplied by energized gravitons .

## I. Introduction

Earth's magnetic field [1]

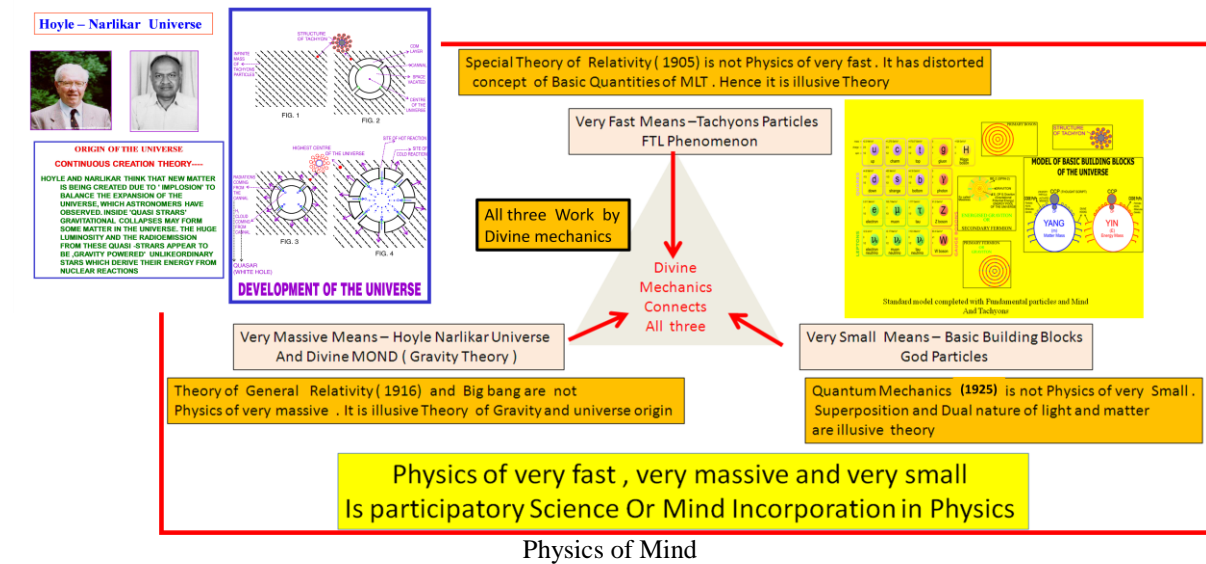

Computer simulation of the Earth's field in a period of normal polarity between reversals.<sup>[1]</sup> The lines represent magnetic field lines, blue when the field points towards the center and yellow when away. The rotation axis of the Earth is centered and vertical. The dense clusters of lines are within the Earth's core.<sup>[2]</sup>

**Earth's magnetic field**, is also known as the **geomagnetic field**, is the magnetic field that extends from the Earth's interior out into space, where it meets the solar wind, a stream of charged particles emanating from the Sun. Its magnitude at the Earth's surface ranges from 25 to 65 microteslas (0.25 to 0.65 gauss).<sup>[3]</sup> Approximately, it is the field of a magnetic dipole currently tilted at an angle of about 11 degrees with respect to Earth's rotational axis, as if there were a bar magnet placed at that angle at the center of the Earth. The North geomagnetic pole, located near Greenland in the northern hemisphere, is actually the south pole of the Earth's magnetic field, and the South geomagnetic pole is the north pole. The magnetic field is generated by electric currents due to the motion of convection currents of molten iron in the Earth's outer core driven by heat escaping from the core, a natural process called a geodynamo.

While the North and South magnetic poles are usually located near the geographic poles, they can wander widely over geological time scales, but sufficiently slowly for ordinary compasses to remain useful for navigation. However, at irregular intervals averaging several hundred thousand years, the Earth's field reverses and the North and South Magnetic Poles relatively abruptly switch places. These reversals of the geomagnetic poles leave a record in rocks that are of value to paleomagnetists in calculating geomagnetic fields in the past. Such information in turn is helpful in studying the motions of continents and ocean floors in the process of plate tectonics.

The magnetosphere is the region above the ionosphere that is defined by the extent of the Earth's magnetic field in space. It extends several tens of thousands of kilometers into space, protecting the Earth from the charged particles of the solar wind and cosmic rays that would otherwise strip away the upper atmosphere, including the ozone layer that protects the Earth from harmful ultraviolet radiation.

**What is New Physics or Physics of Mind ?**

**Quantum Consciousness – According to Physicists and Biologist**

The nature of consciousness remains deeply mysterious and profoundly important, with existential, medical and spiritual implication. We know what it is like to *be* conscious – to have awareness, a conscious ‘mind’, but who, or what, are ‘we’ who know such things? How is the subjective nature of phenomenal experience – our ‘inner life’ - to be explained in scientific terms? What consciousness actually *is*, and how it comes about remain unknown. The general assumption in modern science and philosophy - the ‘standard model’ - is that consciousness emerges from complex computation among brain neurons, computation whose currency is seen as neuronal firings (‘spikes’) and synaptic transmissions, equated with binary ‘bits’ in digital computing. Consciousness is presumed to ‘emerge’ from complex neuronal computation, and to have arisen during biological evolution as an adaptation of living systems, extrinsic to the makeup of the universe. On the other hand, spiritual and contemplative traditions, and some scientists and philosophers consider consciousness to be intrinsic, ‘woven into the fabric of the universe’. In these views, conscious precursors and Platonic forms preceded biology, existing all along in the fine scale structure of reality.

Wrong depiction of visual realization

My research involves a theory of consciousness which can bridge these two approaches, a theory developed over the past 20 years with eminent British physicist Sir Roger Penrose. Called ‘orchestrated objective reduction’ (‘Orch OR’), it suggests consciousness arises from quantum vibrations in protein polymers called microtubules inside the brain’s neurons, vibrations which interfere, ‘collapse’ and resonate across scale, control neuronal firings, generate consciousness, and connect ultimately to ‘deeper order’ ripples in spacetime geometry. Consciousness is more like music than computation.

Colleagues Travis Craddock and Jack Tuszyński and I also study how anesthetics act in microtubules to erase consciousness, and with Jay Sanguinetti, John JB Allen and Sterling Cooley, we are studying how transcranial ultrasound (TUS) can be used noninvasively to resonate brain microtubules and treat mental, cognitive and neurological disorders.

Many thanks to my assistant Abi Behar-Montefiore and Ed Xia for maintaining this website.

1.2 Mind and Mass Realities [2]

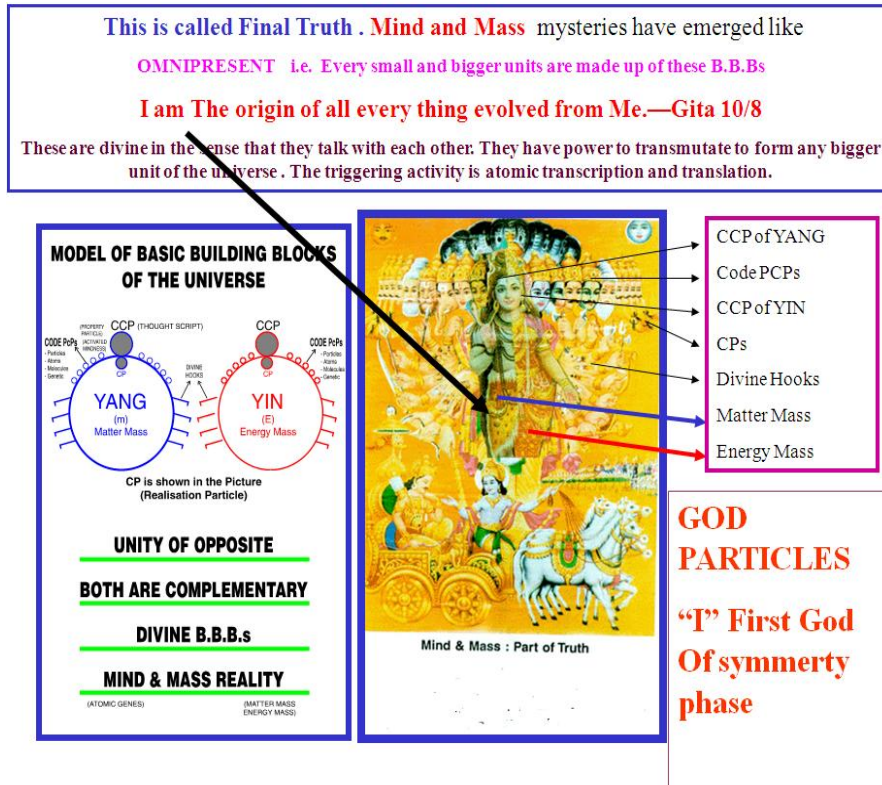

Fig. 1 Divine Mechanics Unit – CCP, CP and information s – Code PcPs with B-Bit – Mass

Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations . New words have been coined to understand hidden science of mind part of reality. Mind reality has been recognized as different faces by “I” about 5000 years back to Arjuna in Mahabharata.as shown in Fig 1. It is just like to understand any language through Alphabets. These are ( different faces ) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different faces represent different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties consciousness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation . In all, it is automatic system of the universe . The mind realities which are of good properties have devtas face identity ( first five faces on both side ) and those mind realities which are of bad properties have demons face identity ( last four faces on both side ) . These are named as code PCPs or messenger atomic genes . The central face is CCP or Thought script where all thoughts of the universe are banked . It is bank of data of all information s of the universe It is face identity of Anti mind particles as data of all information’s of the universe are stored as anti mind particles . It is the Time mind ness ( biological clock ) that keeps on expressing different thoughts from this thought script (CCP) . There are four more faces ( black bodies ) shown on extreme left and right floating in fire are CPs ( translating Atomic genes) . That translates the messages and realizes it and reacts accordingly.[2]

1.3. Messages From Biological world to understand B.B.B world as shown in Fig 2 [2]

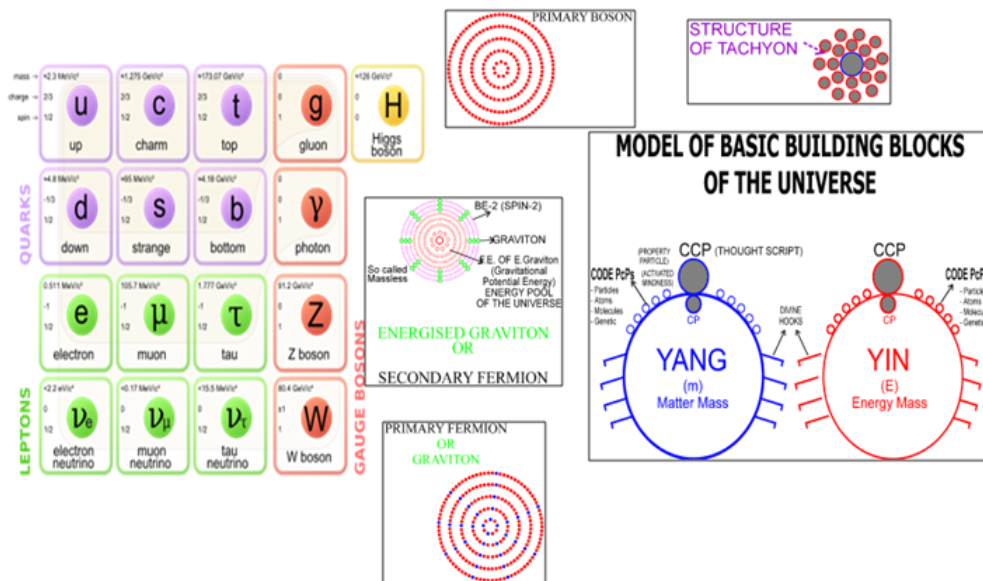

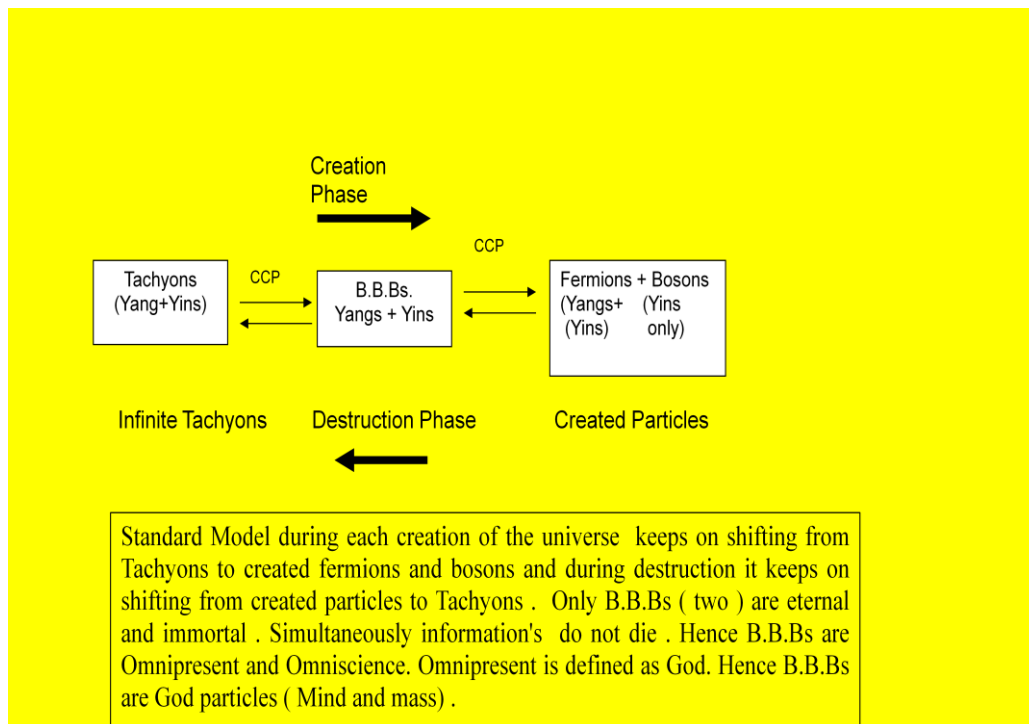

Fig. 2 Parallel teaching by participatory science

The standard model not only modified rather it has been completed [3] with introduction of energized gravitons , primary fermions, primary bosons , Basic Building Blocks , Mind and Tachyons as shown in Fig 3

Standard model completed with Fundamental particles and Mind And Tachyons

Fig. 3 standard Model chart [3]

**Fig .3.1** one creation and destruction cycle [4]

Participatory science has coined [5] some new words and there are some words which already exist in physics. Both these words are defined here and the definitions are according to participatory science. It has no relation with the definitions given in modern physics.

1. Mass - The part which gives shape to the smallest mass unit i.e. basics building blocks (B. B. Bs.) is called mass.
2. Matter :-Mixture of fermions and bosons or only bosons which are made up of mass (B.B.Bs) and that is why we realize their shape is called matter.
3. Inertial mass :-Mass (smallest mass units i.e. B. B. Bs) having inertial properties (classical inertia) either absolute rest or uniform motion in straight line is called inertial mass. Or Number of B. B. Bs. Per unit space present in bigger units is called inertial mass. Or Total matter contained by the bigger units or total number of fermions and bosons contained by the bigger units is called inertial mass. Therefore it never changes from place to place.
4. Gravitational mass :- The mass (interacting surfaces) which takes part in gravity (divine energized gravitons theory) interaction ( which is due to mind ) is called gravitational mass. When gravity interaction increases (number of divine energized gravitons increases) the interacting mass (interacting surface) also increases or when interacting mass (interacting surfaces) increases, gravity interaction (number of divine energized gravitons ) also increases. Therefore gravitational mass (interacting mass or surfaces) changes from place to place. It is the fed mind that decides gravity interaction. We shall discuss it in gravity chapter and in atomic genetics.
5. Pure m (matter) mass :-matter mass (smallest mass unit or B.B.B) which have got inertial property of absolute rest.
6. Energy mass:-Energy mass (smallest energy mass unit B.B.B) which have got inertial property of uniform motion in straight line and which also gives shape to the bigger energy mass ( Higgs Bosons etc ) units.
7. m ( impure matter ) of  $E=mc^2$  :-Matter particles (fermions) which have got spin property are called impure matter particles.

1.4 Prayer message formation in brain.

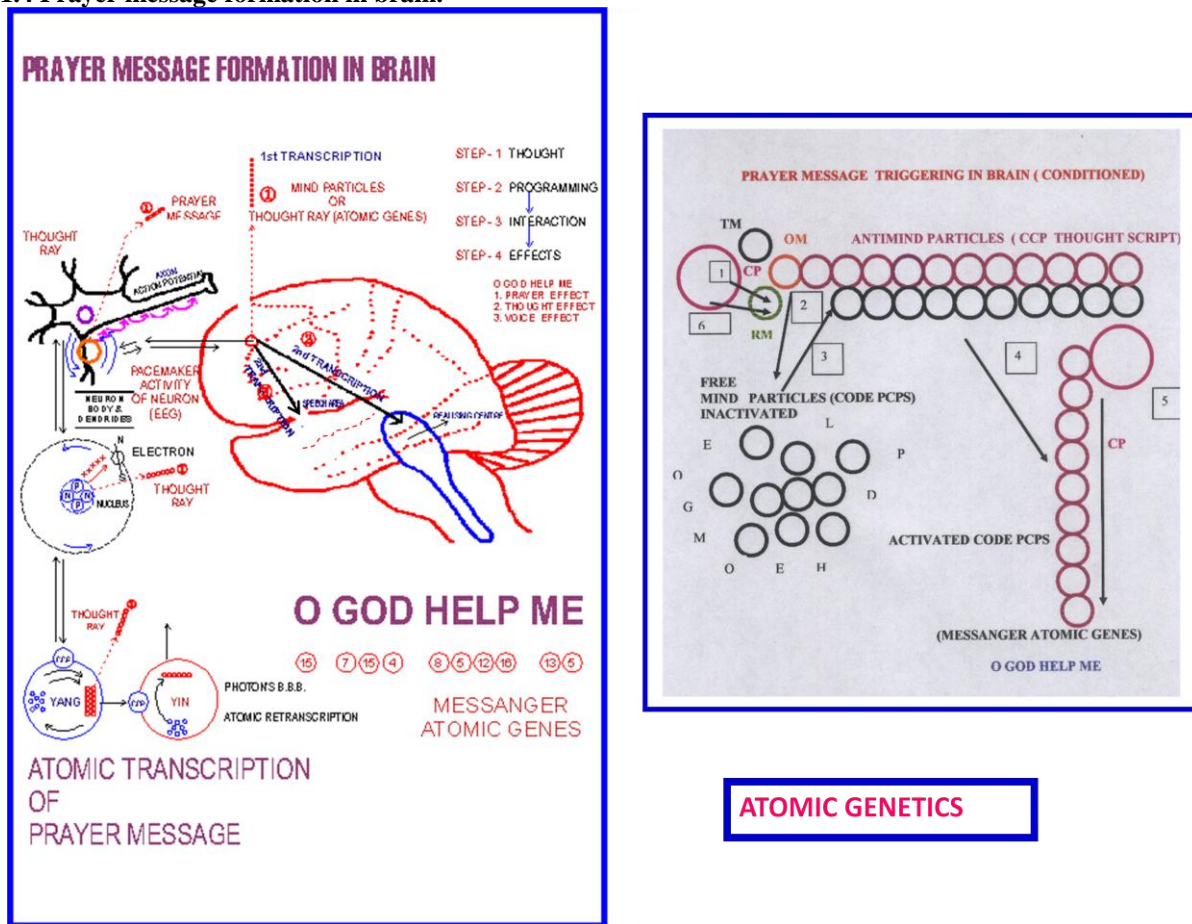

Fig 4 Divine Mechanics - Prayer message formation in brain

In atomic transcription and translation of prayer [5], following steps take place on Yang B.B.B – B-Bit as shown in Figure 4.

- 1.CP removes RM ( repressor mindness-green) from OM ( operating mindness -orange ) thus induction of atomic transcription triggers.
- 2.OM triggers activation of free mind particles ( black -inactivated code PCPs ) of that thought script (magenta ) of “o god help me ”.
- 3.Free mind particles ( black -inactivated code PCPs ) get attached to anti mind particles script ( magenta one ) to form messenger thought script of “o god help me ”.
- 4.Messenger atomic genes ( black ) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes ( activated code PCPs) ( magenta ) of “o god help me ”
- 5.CP carries phenomenon of splicing by translating the messenger activated atomic genes ( activated code PcPs ) and finally there is activated message of “ o god help me” is formed .
- 6.CP represses atomic transcription by adding RM ( green ) to OM ( orange) . Thus atomic transcription gets halt.

Having formed the message it comes out in three forms .

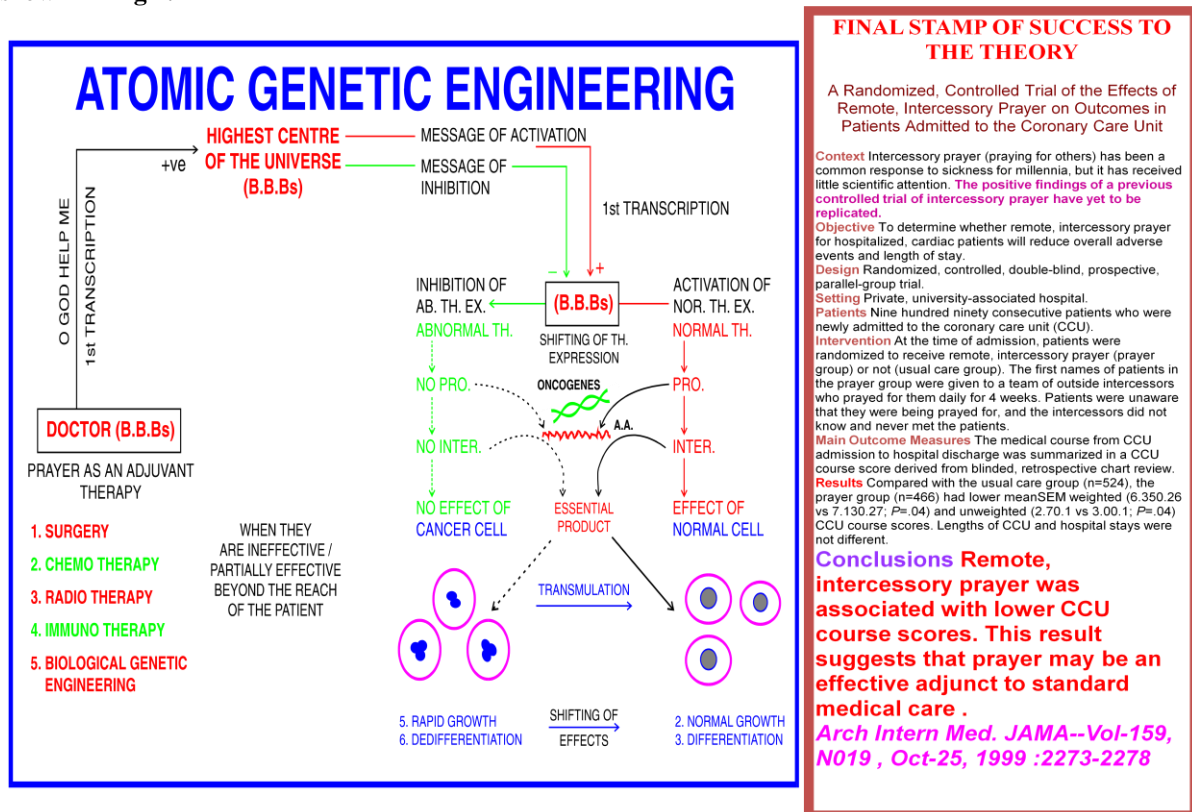

In atomic genetic engineering ( prayer ) we use our basic power i.e. power of B.B.Bs. Our B.B.B. (higher center) talks with highest center of the universe by sending the message by first transcription. Till today nobody knows how does the brain generate thoughts. I am going to tell you that mystery too. In the frontal lobe the neurons are responsible for thought generation. In the neuron there is electrical activity called pacemaker activity which is occurring between dendrites and the body of the neuron. The membrane of the cell is made up of atoms and atom is made up of B.B.Bs. At the level of B.B.B. say thought of 'O GOD HELP ME' is expressed. As a result programmed messages of O GOD HELP ME (code PCPs) are formed. Out of three programmed messages, one is carried by atomic genes to highest center of the universe. It is called **THOUGHT RAY ( Quantum entanglement )** which is made up of pure atomic genes and then the message goes through

phenomenon called first transcription. They come out from brain directly. The other two messages are carried by photons from nucleus of atom to electrons. Here they are modulated on electrical activity of the cell called pacemaker activity. Further they are modulated on actions potentials going towards **REALIZING CENTER** situated in brain stem (RAS) and from RAS to speech area situated in the frontal area. Target B.B.Bs. of the realizing center finally realizes thought effect of O GOD HELP ME. While from speech area message goes to motor cortex again via RAS and from there to vocal cords and finally it comes out as a speech effect of O GOD HELP ME. In layman's terminology formation of the thought ray means PRAYER as shown in Fig 4

Where Does Prayer Message go ?

Prayer message goes as shown in Figure 5 to highest center of the universe via first transcription where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5 and 6) to normal (2 and 3). This shifting of thought expression is called **ATOMIC GENETIC ENGINEERING** as shown in **Figure 4.1**

The changed messages reach to target B.B.Bs. through same route. Having received the changed messages, target B.B.Bs. stop expressing the previous programming and they start expressing the normal programming. As a result the cancer cells transmutate into normal cells. **Or diseased cell gets cured [6]** as shown in **Fig 4.1**

**Fig . 4.1** A.G.E and Final stamp of success to New Theory[6]

### 1.5 Message system of the Universe

Before the origin of the universe [2] nature had only one type of message systems which is called FIRST TRANSCRIPTION. Messages ( Code PcPs ) used to go from one B.B.B. to another B.B.B. by atomic transcription. Messages were carried by atomic genes ( Code PcPs ) with very very high velocity. It is the fundamental message system.

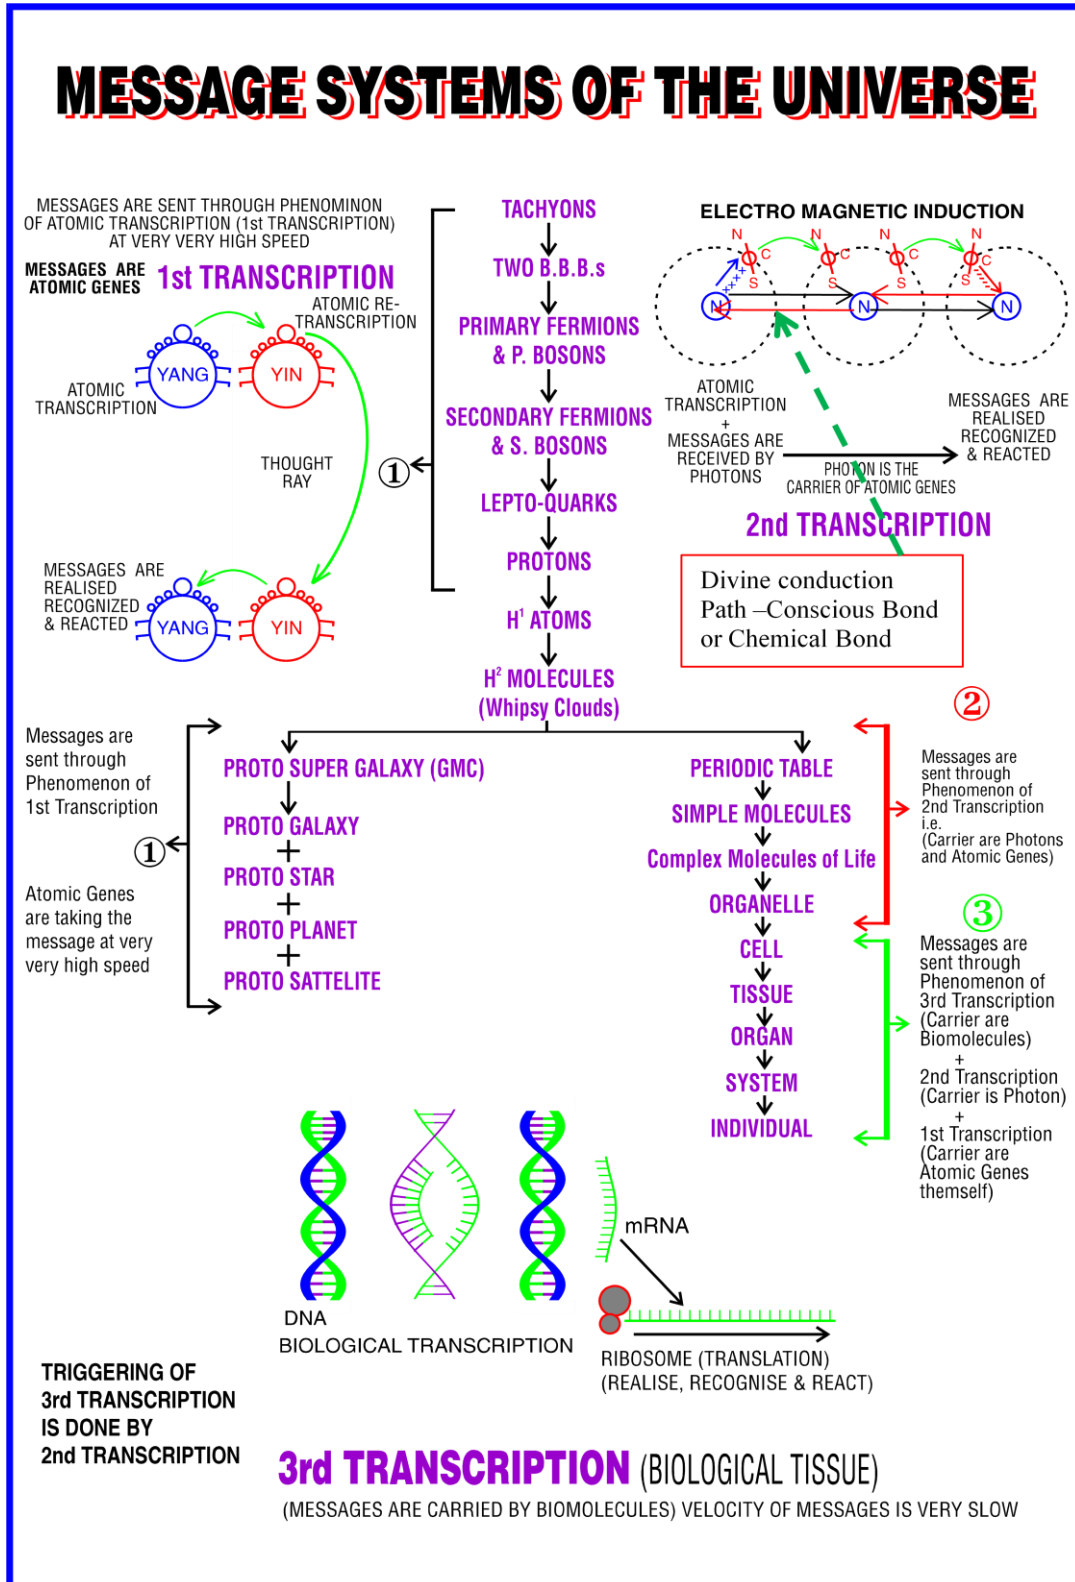

After the origin of the universe, nature created atoms. It also created one more message system called SECOND TRANSCRIPTION. Here the message (code PcPs) are carried by photons from one atom to another atom with velocity of light. Thus atoms ,molecules, cells, and even individuals talk with one another

After the formation of the cell , nature created one more system called THIRD TRANSCRIPTION .Here there is a message storage system formed by DNA. There are messenger molecules called mRNA that

carry message from DNA script to cytoplasm where the message (code PCPs) is read or translated by ribosome and they work accordingly. Thus the messages reach to enzymes and hormones and finally messages reach to target units. Having received the messages, target units work accordingly. Finally life effects (metabolic) are observed.

These three types of message systems are working in the nature. These message system are being used by the nature according to nature's need. as shown in Fig 5

**Fig. 5** Messages system of the universe

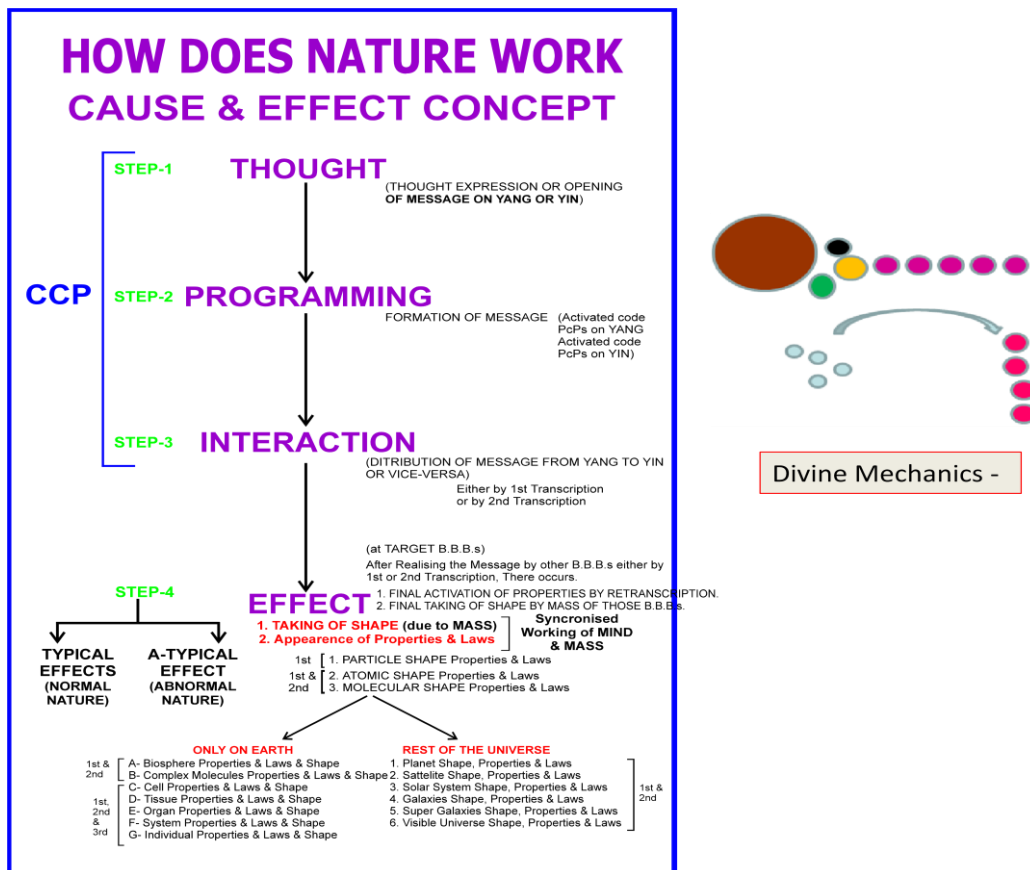

**1.6 How does nature work & triggering of normal & abnormal effects**

To understand creation physics as shown in Fig 6 and Fig 7. . There are two types of thought stimulation [2] . One is **CONDITIONED THOUGHT STIMULATION** and other one is **UNCONDITIONED THOUGHT STIMULATION**.

**STIMULATION OF THOUGHT EXPRESSION** --- There are two types of thought expressions one is **CONDITIONED STIMULATION** of thought expression, and other one is self stimulation of thoughts i.e. **UNCONDITIONED STIMULATION** of thought expression .

At the time of the origin of the universe, all effects got created. The cause of all effects of the universe is **THOUGHT** expression. These thought expressions were triggered by **UNCONDITIONED OR SELF STIMULATED WAY** . It is the first step and it is followed by **PROGRAMMING** or formation of programmed messages by code **PCPs**. This programmed message moves from higher centers to target **B.B.Bs**. it is called **INTERACTION**. Having received the messages, the mind and mass of the target **B.B.Bs**. work in a synchronized way so as to produced the effects as thought by a the higher center. If the thought expression by higher center is normal, the shapes, properties and laws produced by target **B.B.Bs**. would be normal and if the thought expressions are abnormal, the shapes, properties and laws would be abnormal. This is the basic concept of **transmutation phenomenon**. Finally what we observe is called **EFFECT**. Appearance of new shapes. properties and laws is called **TRANSMUTATION**. The first three steps are collectively called **CCP**. During transmutation process if **CCP** is written, it does mean that unless the thought, programming and interaction take place, nature cannot transmutate. Transmutation phenomenon is seen in particles, atoms, molecules and even in cells. The basic steps of any transmutation remain the same except that the thought expressions differ.

*The subatomic particle are made up of more fundamental particles called Basic Building Blocks ( B.B.Bs) which are made up of mind and mass. These B.B.Bs are divine in nature with the result they talk with each other by phenomenon called atomic transcription and translation ( thought expressions). The triggering of broken symmetry is caused by atomic transcriptions. Unless the atomic transcriptions occur, subatomic particles could never exhibit phenomenon of broken symmetry . So the broken symmetry is never spontaneous. It is being mis understood that sub atomic particles do have spontaneous activities as far as broken symmetry is concerned. Hence the Nobel prize physics 2008 awarded to this work is too early to give prize.*

**Fig. 6 Divine Mechanics – How Does Nature work ?**

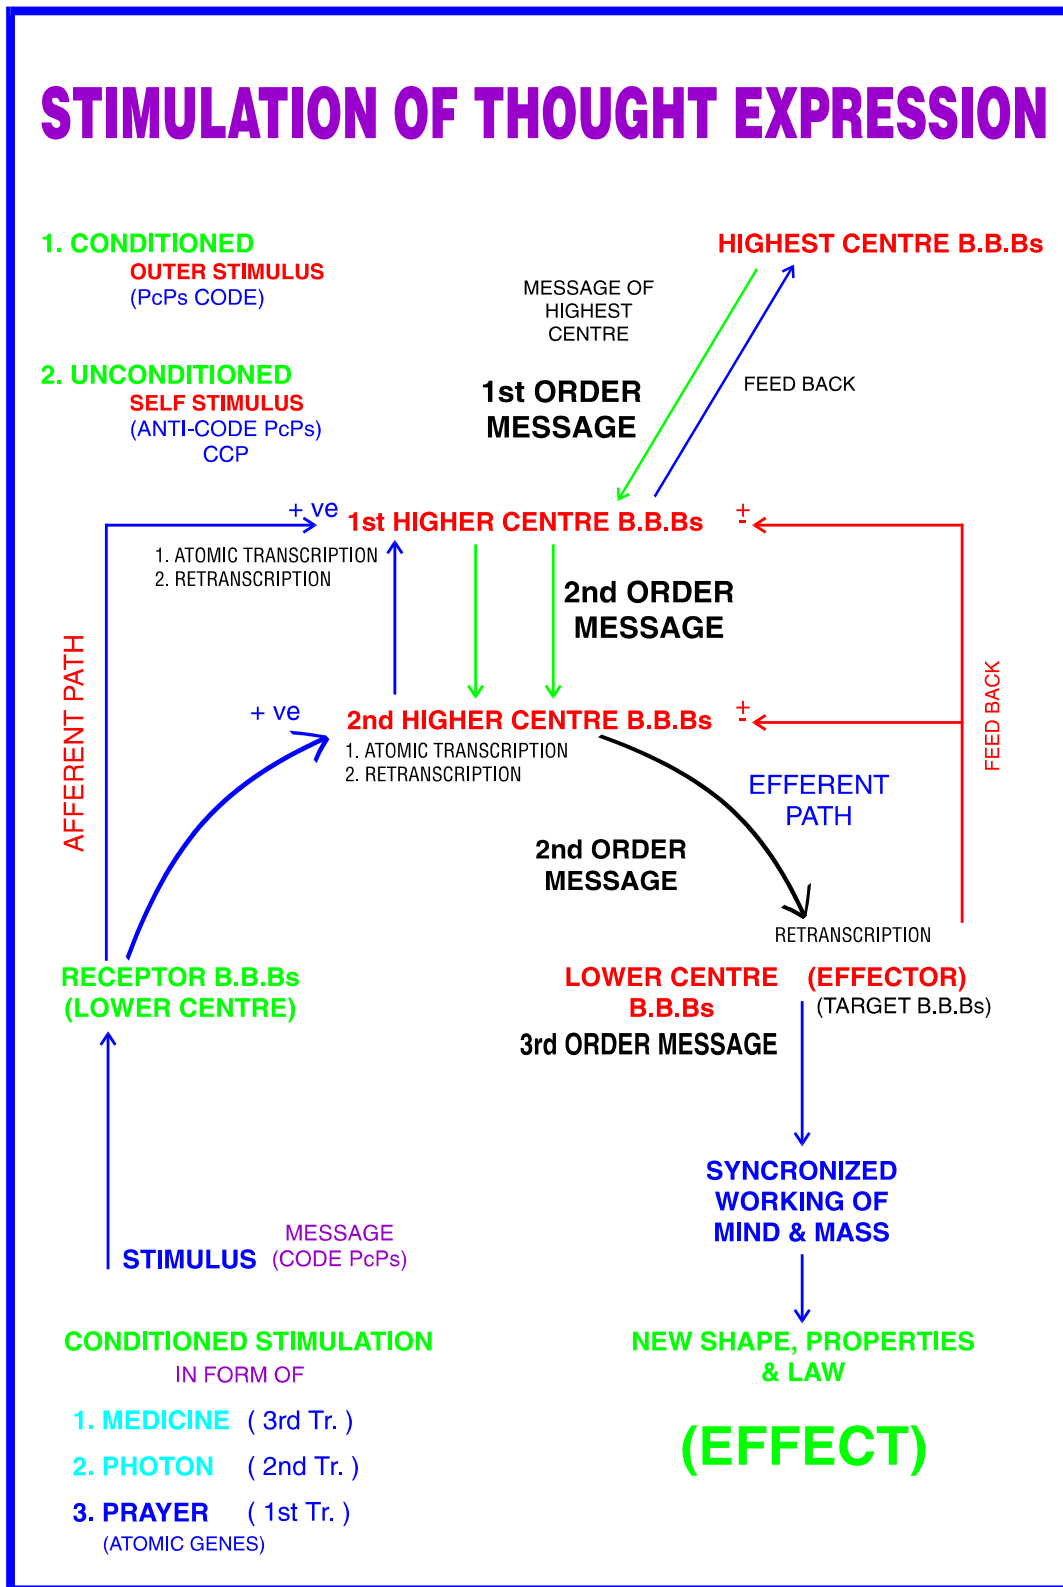

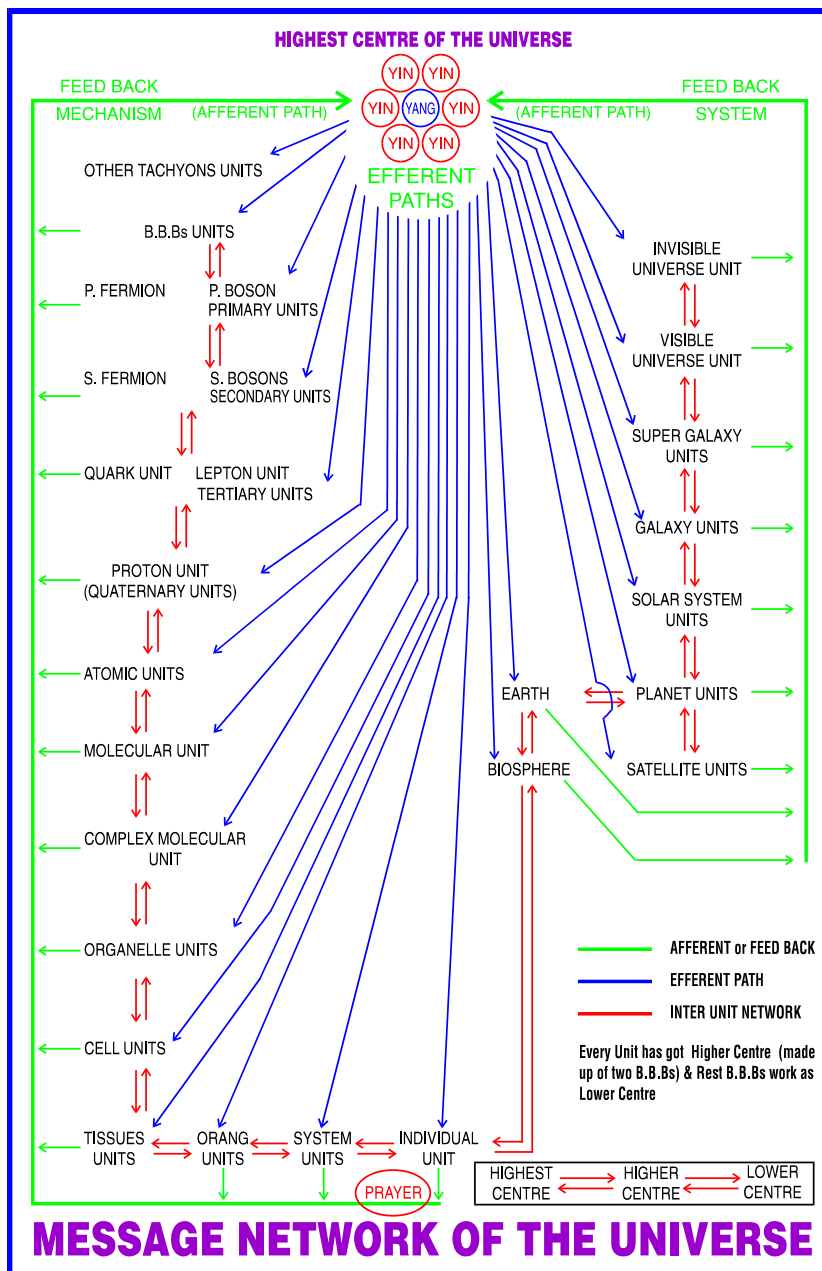

Fig. 7 Conditioned and Unconditioned thought expressions

**1.7 Message network of the Universe ( Feed Back Mechanism and different centers of the Universe )**

With the origin of universe, nature first created primary units i.e. primary fermions (gravitation) and primary boson, these primary units are equipped with one higher center (one B.B.B.) and rest of the B.B.Bs. are working as lower centers or target B.B.Bs.[2] After primary units ,nature created secondary units i.e. secondary fermions and secondary bosons. similarly nature created tertiary units (lepto-quarks) and then quaternary units (protons& neutrons).

Each unit is equipped with higher centers, lower centers and target B.B.Bs. After quaternary units nature created atomic units, molecular units, complex molecules of life units, organelle units, cell units, tissue units, organ units, system units and individual units. Each unit is equipped with higher centers, lower centers, and target B.B.Bs. Similarly nature created satellite units, planet units, solar system units, galaxy units, super galaxy units, dark matter layer unit. These units are also equipped with higher centers, lower centers and target B.B.Bs. Thus our universe is divided into different units and each unit is equipped with higher and lower centers.

All higher centers are under control of highest center of the universe by efferent paths. This efferent path is made up of first transcription. Higher centers can send messages to highest center of the universe by afferent path or feed back path. Thus highest center of the universe is well informed about all effects of the universe. Messages can come from lower centers to higher centers and from higher centers to highest center of the universe via afferent path. The highest center of the universe can send messages to higher centers and from higher center to lower centers. There is an inter unit message network also which is made up of first, second and third transcription depending upon the nature's need. Thus the entire universe is under control of highest center of the universe. Highest center can change any programming programmed by it during pre creation era as shown in Fig 8

**Fig. 8** Messages Net work of the Universe

1.8 Origin of the universe [7]

**Hoyle – Narlikar Universe**

**ORIGIN OF THE UNIVERSE**  
**CONTINUOUS CREATION THEORY----**  
 HOYLE AND NARLIKAR THINK THAT NEW MATTER IS BEING CREATED DUE TO 'IMPLOSION' TO BALANCE THE EXPANSION OF THE UNIVERSE, WHICH ASTRONOMERS HAVE OBSERVED. INSIDE 'QUASI STARS' GRAVITATIONAL COLLAPSES MAY FORM SOME MATTER IN THE UNIVERSE. THE HUGE LUMINOSITY AND THE RADIOEMISSION FROM THESE QUASI -STARS APPEAR TO BE ,GRAVITY POWERED' UNLIKE ORDINARY STARS WHICH DERIVE THEIR ENERGY FROM NUCLEAR REACTIONS

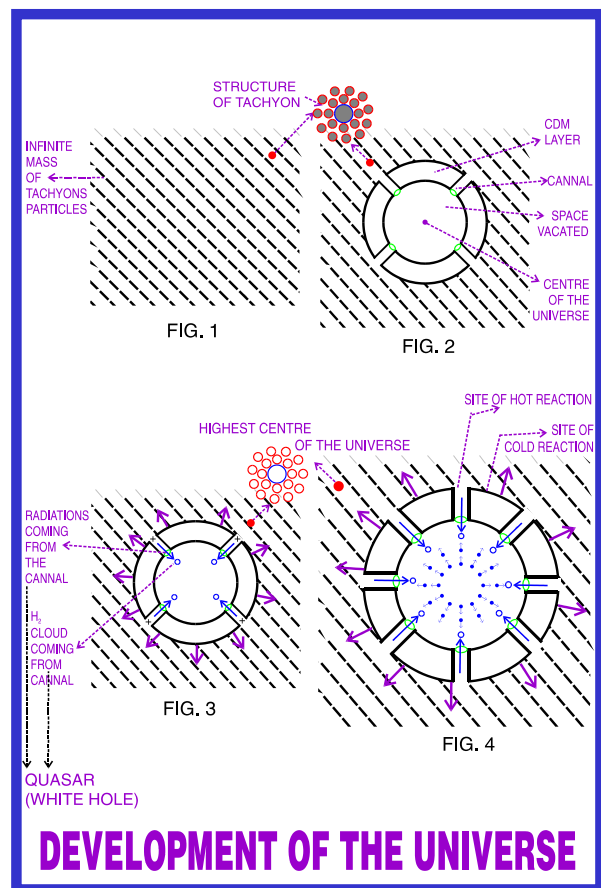

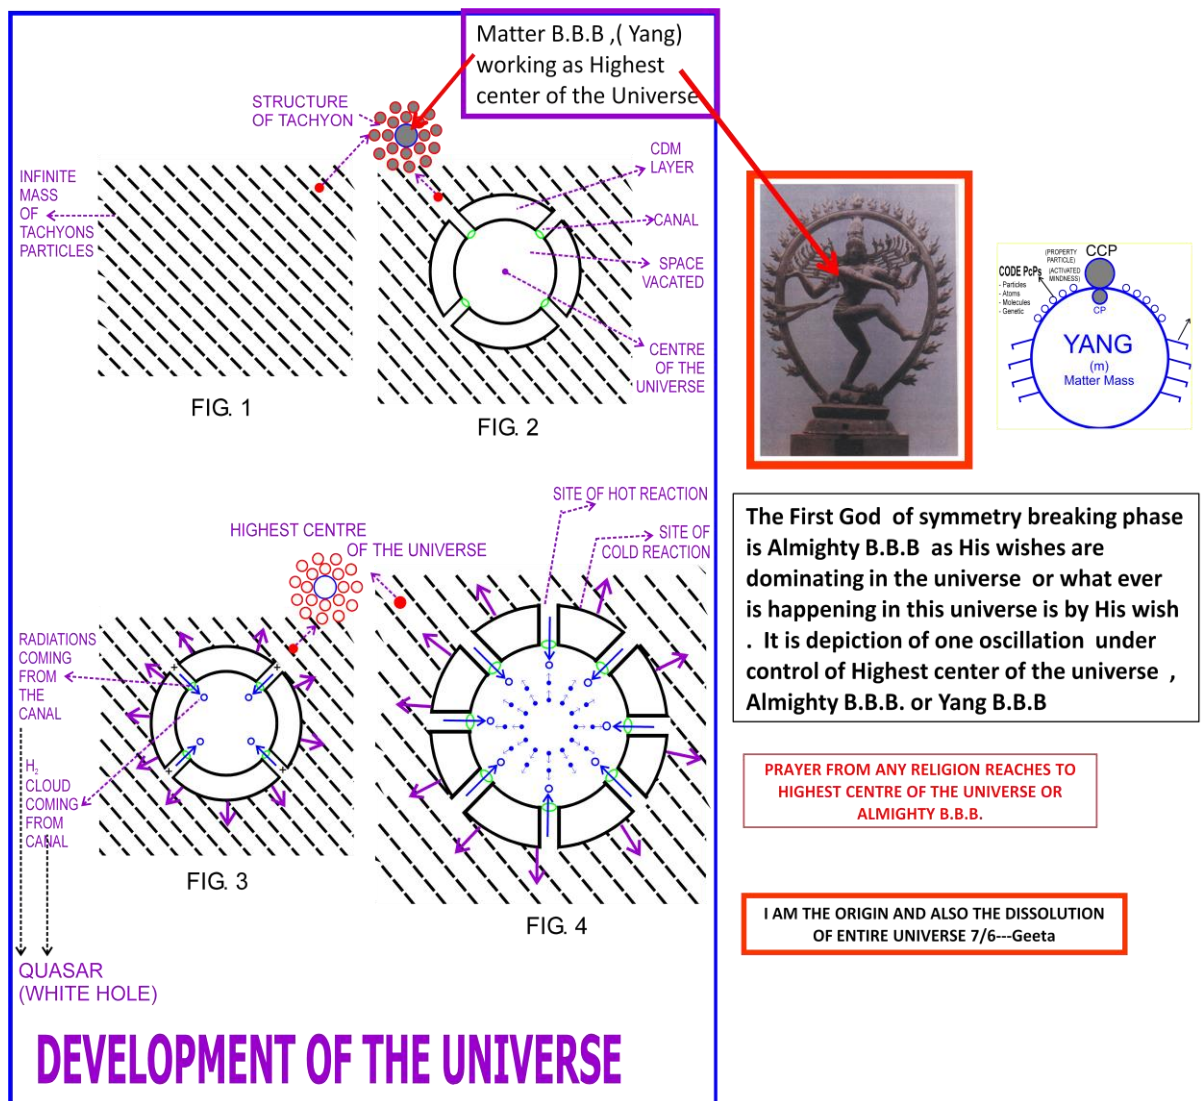

Fig. 9 Development of the Universe

Before the origin of the universe, these Basic Building Blocks (B.B.Bs) as shown in Fig-3 were in the form of tachyons as shown in Fig- 9 [7]. It means that at that time the tachyons were everywhere in the universe. Let us look at the structure of tachyons; it is made up of one matter B.B.B. (YANG) and many energy (YINs) B.B.Bs. Initially out of the infinite tachyons, one became the **highest center** of the universe. Messages used to go from highest center to rest of the universe and messages could come from rest of the universe to highest center of the universe by atomic transcription. Thus highest center had fed its thought to rest of the B.B.Bs. that would take part in creation - that they would express only those thoughts to give desired effect as wished by the highest center of the universe. So all B.B.Bs were informed about their role before creation of the universe. In pre-creation era programming of the future universe was done by highest center of the universe. Our universe is oscillating and it is a divine universe. It means that it has a creation phase and a destruction phase. During creation phase tachyons break into their B.B.Bs. and from these B.B.Bs, formation of fermions and bosons take place as shown in Fig 3.1. After the creation phase, destruction would start and in this phase all created particles would again break into their B.B.Bs and finally tachyons would form. At the time of origin of the universe, all the effects got created. These effects are taking of different shapes and appearance of properties and laws. All these effects are studied in various branches of science.

With the origin of the universe, nature first created a sphere of **COLD DARK MATTER (C.D.M)** and canals in it. With the result space got created. At the other end of the canals, hot reaction started (**the relics are back ground radiations 2.7 degree K of our hydrogen clouds**). As a result hydrogen clouds and lot of radiations were created. The empty canals were filled by these hydrogen clouds and radiations and thus **QUASARS** appeared in the universe. Simultaneously C.D.M. layer started expanding and clouds and radiations kept on coming in this closed universe as shown in Fig 9 . With the passage of time more and more C.D.M. layer formed, more and more quasars formed. The hydrogen cloud came in this closed universe. They started running towards C.D.M. layer as they were attracted by the gravity of C.D.M. layer. Those clouds, which were nearer, moved faster than those, which were away from CDM Layer. The **HUBBLE LAW**, can thus be explained. With some more passage of time, clouds were joined to form **GMC** (giant molecular clouds). Later

by self-gravitation different proto stars, proto planets, proto satellites were formed. Finally stars became bright and thus bright galaxies appeared in this universe. Our universe is still in expansion phase and creation is still going inside quasars. It is to be remembered that highest center of the universe does not come in the visible universe. It keeps on receiving the messages by atomic transcription and it has power to change any programming programmed by it during pre-creation era.

It is the atomic genes which constitutes mind part of reality. Mind incorporation in physics is awaited as theory of every thing is not yet investigated . I have investigated theory of every thing ( ToE) and I found that while studying unified theory at the time of origin of the universe by Hoyle Narlikar universe , it was mind reality that triggered symmetry breaking phase . It is mind reality that triggers oscillation phenomenon of the universe. It is the mind reality which is behind perfect cosmological principle . There is nothing like artificial intelligence in the universe . These mind particles constitute intelligence of the universe that controls the deterministic order of the universe. It is the mind reality behind all effects of the universe. But this is not our mind rather it is mind of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe ) . His mind could be manipulated by prayer only . as shown in figure 9.1 and 9.2

**Figure 9.1** Hoyle Narlikar Universe

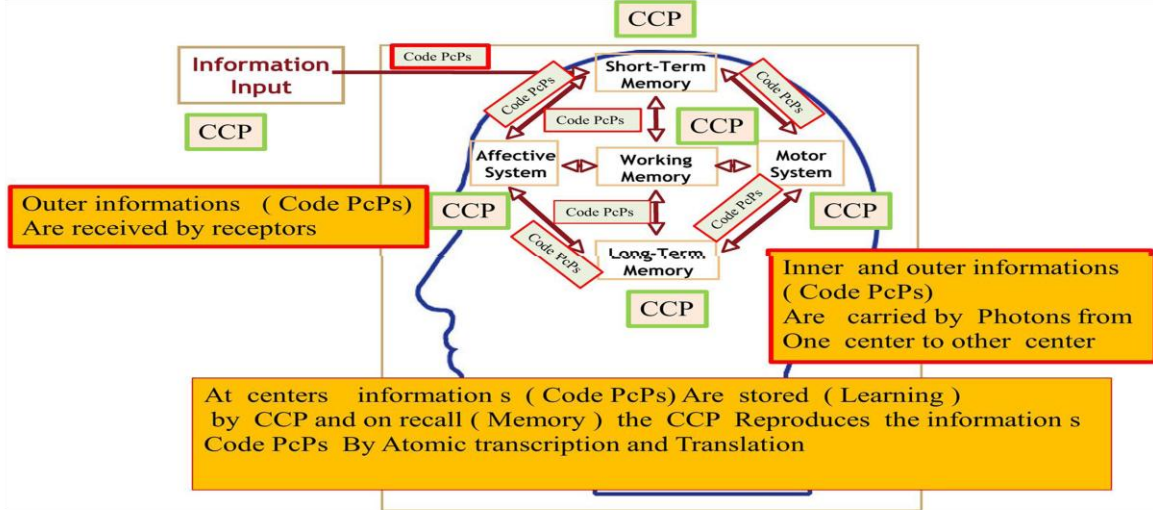

Fig 11 structural configuration of DM and DE at macro level [9]

1.10 Divine Mechanics and Brain Computation

Learning and Memory and information s ( Code PcPs ) Net work in Brain [10]

Divine Mechanics and Brain Computation

Fig 12 Divine Mechanics of Brain Computing System – Learning and memory

At all steps , these are B.B.Bs ( B-Bit ) that are responsible for information's control and triggering . If CCP is written it means unless atomic transcription and translation occur , brain cannot have learning and memory triggering and control and it is called Divine mechanics of Biology and it is life . These are higher thought expressions of B.B.Bs . In Bits of classical computers and qubits of QC , the thought expressions are lower and different but the mechanics ( DIVINE ) remains the same. as shown in Fig 12

Physics dictates the lowest limit of size of chip **but DIVINE mechanics does not**  
**Moore's Law Modified and Completed**

**Fig 13 - The Theory of Computers and Brain are same – DIVINE MECHANICS**

( Structural and Functional smallest Bit ( mass ) is B-Bit of the universe and the Divine Mechanical Unit is CCP , Code PcPs and CP.)

DIVINE MECHANICS The Theory of Computers and Brain is SAME as shown in Fig 13

Physics dictates the lowest limits of the size of chips [11]. But divine mechanics does not . Hence the bit is a typical unit of information. ((Classical and Quantum Bit ) is wrong and to describe informations by adding qubit is also illusion as in complicate system ,it is the different thoughts expressions that describe informations . Informations are separate ( Code PcPs ) and bits ( Electron of transistor ) qubits ( electron of diamond crystal ) are separate. At DNA level the bit is nucleotide (A,T,C,G ) and at Atomic level the bit is photon and electron , at particle level ( secondary fermions and secondary bosons ) the bit is primary fermions and primary bosons and informations are still code PcPs and at B.B.B level the bit is B.B.B ( Yang mass and Yin mass - B- bit ) it self and the information is carried by Code PcPs but at all level of all bit units the information storage system is CCP ( Physiological arrow of Time ) it never dies even after destruction of the universe. Hence informations are eternal . In computers, Bit is a structural configuration that describes informations of the system and informations are in form of Code PcPs. The working of the bit is triggered and controlled by thoughts of higher centers that form that bit. If the bit is classical ( transistors of chips ) the effect is different . But if the bit is qubit with entanglement the working is triggered and controlled by thoughts of higher center that form that crystal . In both the effect of describing informations would be different.

One is classical ( thought expressions are fixed and limited )and other one is quantum ( thought expressions are changing and more wide to describe the more wide complicated system to have fast results . ) . In life sciences in Brain the bit is again Photon and the information s are Code PcPs and they are triggered and controlled by CCP of higher centers that is triggered by DIVINE MECHANICS .

In life sciences the CCP ( cryptography ) of B-bit expresses informations ( Code PcPs ) which were not fed like speaking Lie and unlike Bit of classical computer and qubit of QC it shows phenomenon of forgetfulness and IQ phenomenon ( mental age /real age ) . It is Higher functions of B.B.B or B Bit and it is life . Hence there is difference in some aspect of DIVINE MECHANICS \of Computers computation and Brain computation

## Structure

**2.1 Modified theory of atomic structure** as Niels Bohr's theory has limitations in explaining different series of hydrogen spectra.

New assumptions of structure of hydrogen atom. – Divine Modified Niels Bohr 's Theory ( **Divine MONB** ) as shown in Fig 13.1

1. Hydrogen atom is like a miniature solar system with the negatively charged electron moving in circular orbit around positively charged nucleus having positively charged particle proton. In this circular orbit or stationary orbits , electron is being held by single string of energized gravitons . This energy level is called ground state.

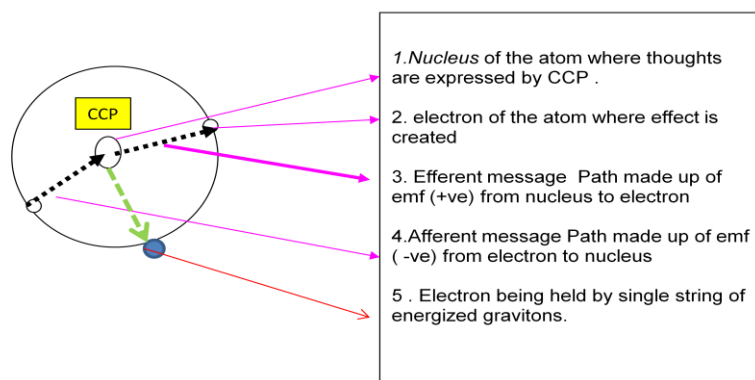

2. When Hydrogen atom is excited, the electron moves from ground state to excited state energy levels making a bigger circular orbit and having reached in this new energy levels , it also emits radiations . Hence absorption and emission of energy quanta occur simultaneously. Shifting is understood in inter orbital shift phenomenon.

3. When excitation is over, the electron once again come back to ground state energy level . All above mentioned events are triggered by different thoughts or atomic transcriptions from the nucleus or proton in case of hydrogen atom.

4. These atomic transcriptions are being triggered by conditioned stimulation of CCP by the message system made up of photons (second transcription or –ve charged photons or afferent path ) coming from electron to proton and further they are transmitted by photons ( second transcription made up of +ve charged photons, or efferent path ) to electron. Having received the messages , electron works accordingly. Unless the thought is expressed, nature cannot work . as shown in Fig 15

5. When electron is in ground state, its interaction with energized graviton and electromagnetic photon is more hence IP -13.59ev ( n=1) is required to remove electron from this energy level. During excited stage the interaction is different hence I.P. to remove electron from this state is -3.4ev (n=2), -1.511ev (n=3),- 0.850ev (n=4) , -0.544ev (n=5) respectively. It the changing thought of interaction with energized graviton and electromagnetic photons that gives changing effect .

6. Electronic configuration of higher atoms could be known by studying I.P. curve . Working of hydrogen atom as shown in Fig 13.1 .

**Fig 13.1** working of hydrogen atom – Divine MONB Theory

**2.2 Energized Gravitons and dying stars. Figure –14,Figure 15, and Figure 16 ) ( Theory of inter orbital shift )**

Figure 14- Dying Binary stars one is Red Giant and other one is neutron star

Figure 15- Dying Binary stars one is Red Giant and other one is neutron star

Fate of the star is decided by fed thoughts ( unconditioned thought expression by Time mindness ) which gets triggered as the end stage of star is reached. These fed thoughts were fed in precreation era by highest center of the universe. .1.Thought of Red Giant leads to formation of red giant and finally white dwarf. .2.Thought of neutron star leads to formation neutrons star.. It never depends upon the different masses of suns as predicted by Prof. Chandrasekhar. Though the different masses ( critical mass 1.44 times the sun's mass) of suns could decide the type of thought expressions ( conditioned stimulation of atomic transcriptions) .When binary stars come to end stage , its one star takes the shape of Red Giant and the another star takes the shape of neutron star ( figure 13) or so called highly dense black body having very high gravitational effect such that the escape velocity is more than speed of light. Thus making it a highly dense black body.. Having reached this critical stages, the hot material of red giant stars falling into highly dense black body in circular manner such that it forms a circular disc all around highly dense black body. During fall, as the matter is made up of charged particles , there develops a electrical field right angle to the falling matter . The effect of electrical field is very high and as it reaches the limits of event horizon , the falling material ejected out right angle to the electrical fields. During fall , the velocity of the matter increases and it reaches at the speed of light ( body falling under gravity gets accelerated due to g) and it obeys so called Flemings right and left hand rules simultaneously that is why positive charged material is ejected in one direction and the negatively charged is ejected out in opposite direction with speed of light . The hot material of Red Giant never falls in highly dense black body ( it is not Black hole ) .

**2.3 Theory of inter orbital shift - Simultaneous triggering of Fleming's Right and Left Rules By Thought .**

Figure 16- Dying Binary stars one is Red Giant and other one is neutron star

This phenomenon is seen in dying binary stars where one is red giant and other one is massive black body orbiting in each other gravity field ( Figure 14, Figure 15 and Figure 16) . The phenomenon of inter orbital shift triggers. With the result thought of centripetal force enhancement is expressed and centripetal force gets enhanced . With the result matter of red giant changes its orbit and the energy supplied in this phenomenon is from energized gravitons of black massive body . No sooner it reaches event horizon , the thought of centrifugal force enhancement gets triggered. With the result centrifugal force gets enhanced and it throws the orbiting matter in inter settler space with velocity of light in both directions. The energy again is supplied by energized gravitons . Hence gravity under these circumstances work as both ways . ( It is called Quantum gravity ) . This is the phenomenon of inter orbital shift of red giant star. The matter ( charged particles) of red giant orbiting in spiral way ( changing orbit ) , before it falls in black massive body , it gets ejected out with velocity of light by centrifugal force. All effects are triggered by separate thoughts . All are unconditioned thoughts . Red , yellow and blue means temperature of orbiting and ejecting matter. There are many thoughts that trigger this phenomenon step by step. The entire phenomenon is under inter-orbital shift theory .Falling matter is coming from one orbit or rather changing orbit and it is going to other orbit rather out of orbit . It is the massive black body that triggers this phenomenon of inter orbital shift. It send messages to red giant via first transcription ( figure 3) . Higher center of red giant having received the message , it enhances centripetal force and with result matter start changing its orbit. Having reached the event horizon , Red giant again receive new message from black massive body via first transcription . This new message of inter orbital shift triggers enhancement of centrifugal force and suppression of centripetal force . With the result the matter is shifted to other outer orbits or rather in interstellar space by centrifugal force . The ejecting matter is made up of charged particles . Few particles to be ejected out in one direction and other to be ejected out in other direction . This direction is decided by the thought of charged particles . If +ve chared charged particles decide to move in one direction then -ve charged particles would decide to be ejected out in other direction. It is just like Fleming's left ( figure 17) and Fleming right hand rule ( figure 18) . These rules are made by thoughts. Orbiting matter and electrical field generation are perpendicular to each other , then the ejecting matter would be perpendicular to electrical field . For +ve charged particles Fleming's left hand rule and for -ve charged particles it is feming's right hand rule as shown in Figure below.

#### 2.4 Fleming's Left Hand Rule

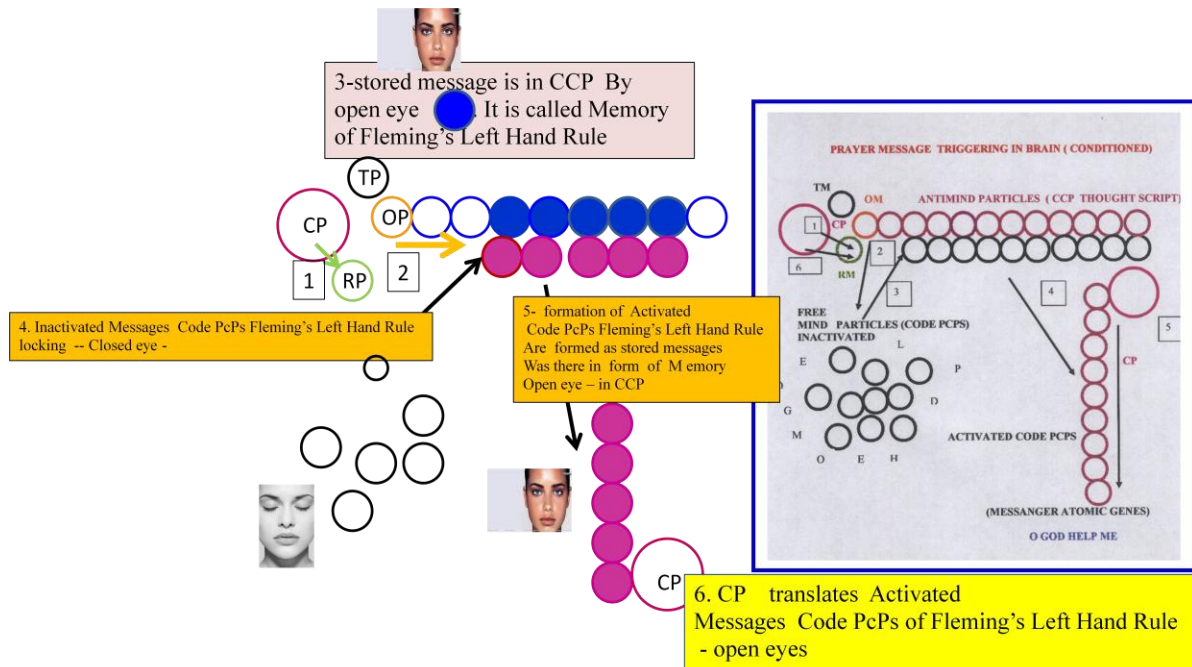

Figure 17– Fleming's left hand rule

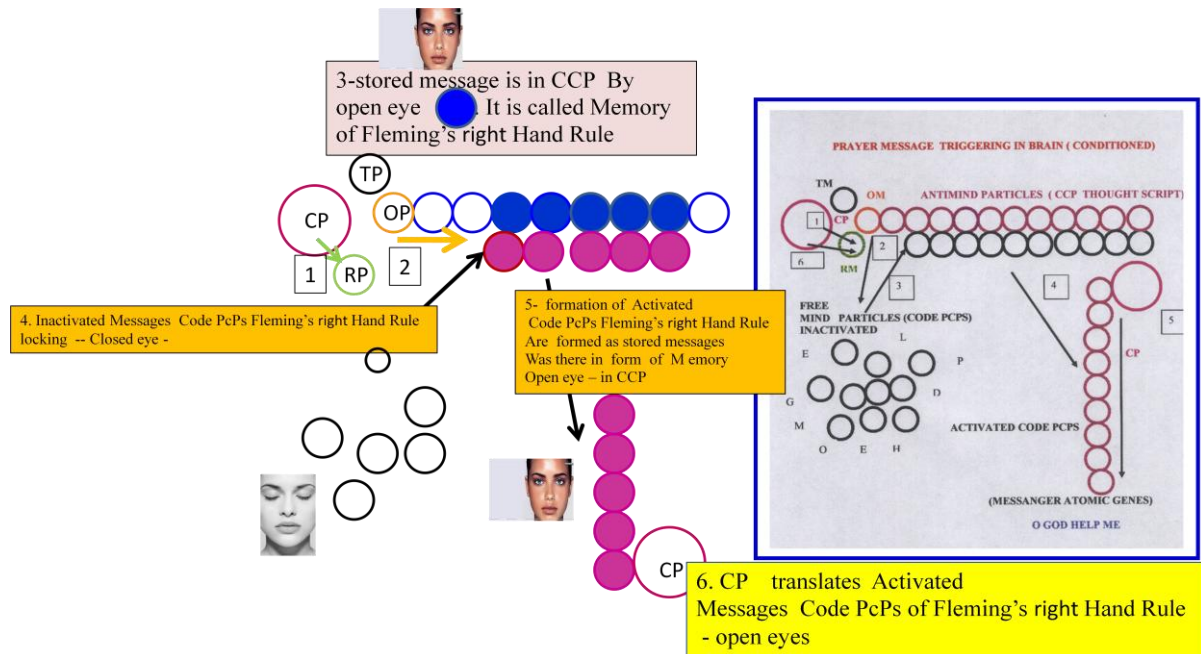

**ATOMIC GENETICS phenomenon of Fleming's Left Hand Rule**

- In phenomenon of Fleming's left hand rule , following steps take place on Yang B.B.B – B-Bit ( Figure 17 ) .
- 1.CP removes RM ( repressor mindness-green) from OM ( operating mindness -orange ) thus induction of recall is triggered
  - 2.OM searches learning mindness on Anti mind particles ( Anti mind particles script ) of that thought script (blue filed circles- open eye ) of “Fleming’s left hand rule”.
  3. But as that learning mindness is there with opening eyes of leant anti mind particles .
  4. Inactivated code PcPs “Fleming’s left hand rule “ mind particles triggering to lock on Anti mind particles script
  5. Formation of activated code PcPs “Fleming’s left hand rule” as stored messages was there in form of memory ( open eye)
  6. Finally there is activated message of “Fleming’s left hand rule ” is formed ( Filled magenta circle – open eyes ) by CCP ( filled circle blue –open eyes ) . CP makes phenomenon of splicing .
  - 7.CP represses act of recall memory by adding RM ( green ) to OM ( orange ) . Thus recalling information s of “Fleming’s left hand rule” gets **halt**.

**2.5 Fleming's Right Hand Rule**

**Figure 18– Fleming's right hand rule**

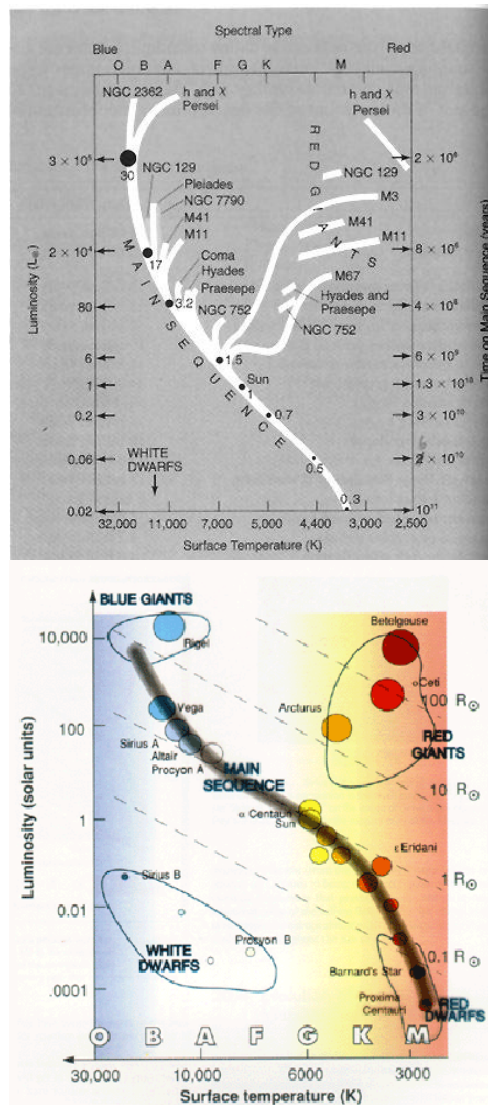

**ATOMIC GENETICS phenomenon of Fleming's Right Hand Rule**

- In phenomenon of Fleming's right hand rule , following steps take place on Yang B.B.B – B-Bit ( Figure 18 ) .
- 1.CP removes RM ( repressor mindness-green) from OM ( operating mindness -orange ) thus induction of recall is triggered
  - 2.OM searches learning mindness on Anti mind particles ( Anti mind particles script ) of that thought script (blue filed circles- open eye ) of “Fleming’s right hand rule”.
  3. But as that learning mindness is there with opening eyes of leant anti mind particles .
  4. Inactivated code PcPs “Fleming’s right hand rule “ mind particles triggering to lock on Anti mind particles script
  5. Formation of activated code PcPs “Fleming’s right hand rule” as stored messages was there in form of memory ( open eye)
  6. Finally there is activated message of “Fleming’s right hand rule ” is formed ( Filled magenta circle – open eyes ) by CCP ( filled circle blue –open eyes ) . CP makes phenomenon of splicing .
  - 7.CP represses act of recall memory by adding RM ( green ) to OM ( orange) . Thus recalling information s of “Fleming’s right hand rule” gets **halt**.

**2.6 Reverse H.R. Activity**

All effects are triggered by separate thoughts . All are unconditioned thoughts . Red , yellow and blue means temperature of orbiting and ejecting matter . There is one more activity going on simultaneously and that is reverse H-R activity ( figure 19) .

**Figure 19** ,H-R Diagram

Both star classification and evolution can be summarized in a graph like chart that consists of a plot of luminosity (vertical axis) versus star surface temperature which is expressed also by (correlated with) the star's visual color (note also the Spectral Type designations at the top). This is known as the Hertzsprung-Russell (H-R) Diagram. Temperature ranges (in °K) are: O class = greater than 30000; B = 11000 - 30000; A = 7500 - 11000; F = 6000 - 7500; G = 5000 - 6000; K = 3500 - 5000; M = less than 2500. Colorwise, the first three are all "blue-white" stars, F is bluish to white; G is white to yellow; K is yellow orange; and M is red.

Reverse H-R Activity ( figure 16) . The dying star while changing its orbit, it changes its color. It does mean that the temperature of the falling matter is increasing with reverse H-R activity i.e. it also starts emitting rays starting from red giant to blue star. Hence reverse evolution is also taking place not in star form but in dying stages of star. The energy supplied ( for temperature rise ) for reverse H-R activity comes from energized gravitons . But changing radiations ( from red to blue i.e from infra red to ultra violet or spectral type ) are triggered by changing thoughts of reverse evolution. In star evolution , color change means energy supply is being reducing ( from blue to red) and also simultaneously radiations maxima are shifting from ultra violet to infrared. ( spectral type ). While in reverse H-R activity of dying star , the whole process gets reversed i.e. energy supply gets enhanced and reverse thought got expressed to get reverse H-R activity i.e. radiation maxima shifts from red to blue type.

2.7 Divine Mechanics triggering Fleming's Right and Left Rule in North and South side of Equator .

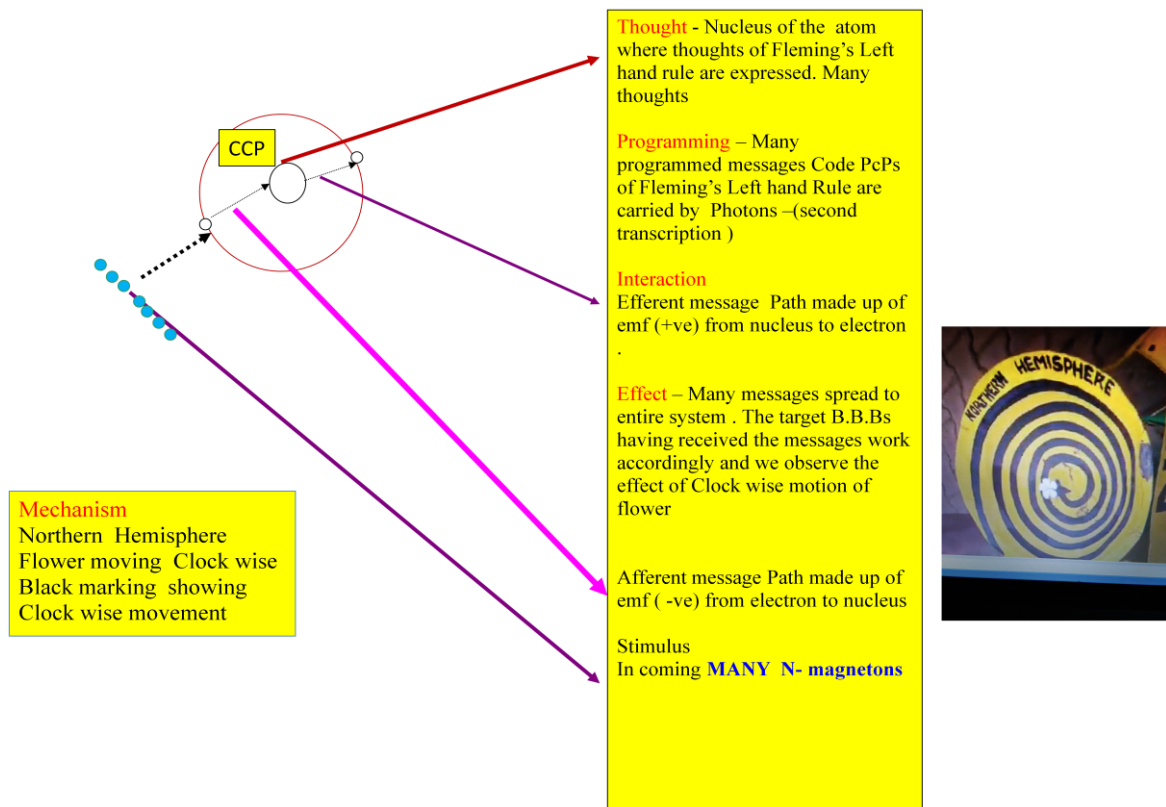

Fig 20 Divine Mechanics Depiction of triggering of Fleming's Left Rule in North side of Equator .

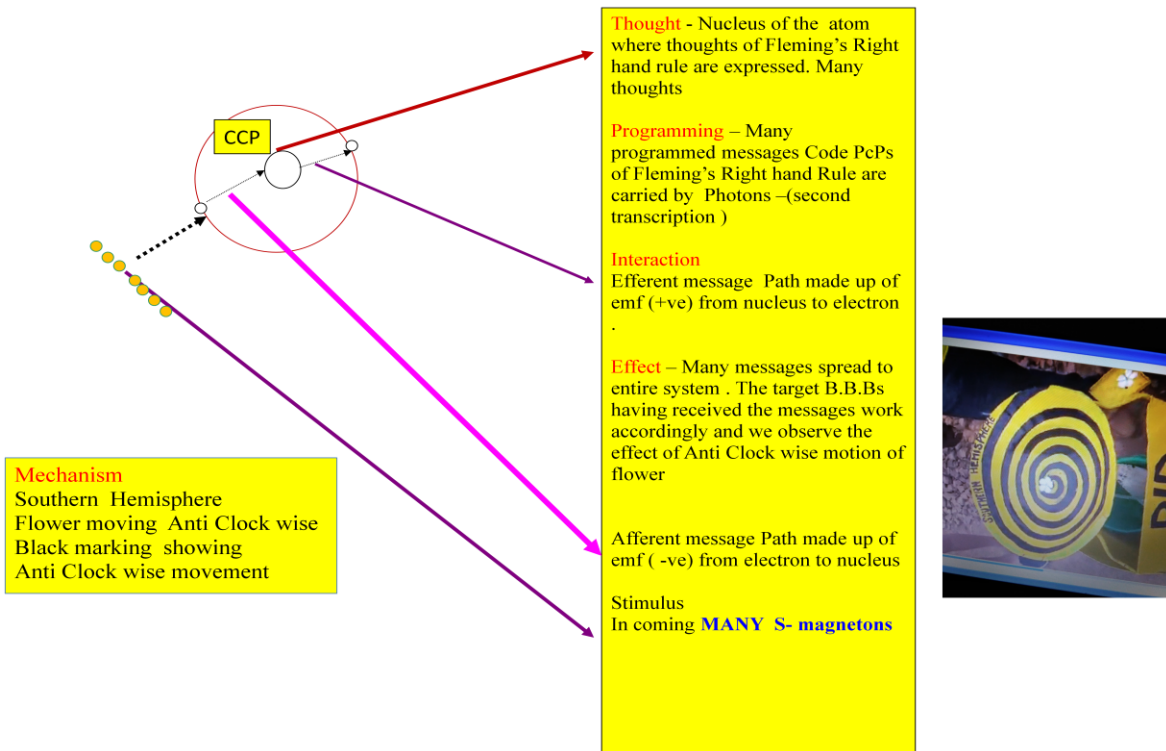

Fig 21 Divine Mechanics Depiction of triggering of Fleming's Right Rule in South side of Equator .

**Fig 22** Divine Mechanics triggering Fleming's Right and Left Rule in North and South side of Equator . And at the Equator .

In physics ( motor ) Laws are made by Divine Mechanics whether it is Fleming's Left hand rule ( Code PcPc Fleming's left hand rule ) or Fleming's Right Hand Rule ( Code PcPs Fleming right hand rule ) . Both the rules are triggered by different stimulus ( S- Photons or N Photons ) . These rules expressions are also seen in north and south side of equator when flower is placed in water showing anti clock wise ( south side ) and Clock wise ( North side ) movement or rotation of flower . There are many thoughts that trigger the effect but to understand the concept only one main thoughts are depicted in diagrams and the energy for work done ( rotational energy ) is supplied by magnetic photons . Nature of Magnetic stimulus gets changed when one moves from north to south side . Hence the phenomenon is also changed . At the equator No effect is seen . This is by virtue of No law is expressed or trigged by divine mechanics or mind at higher center of flower unit . Hence no rotational movement of flower is seen . Magnetic fields trigger thoughts of Fleming's right hand rule ( Anti Clock wise rotation ) and Fleming's left hand rule ( Clock wise rotation ) at southern and northern hemisphere respectively ( Fig 20 , Fig 21, Fig 22 ) . These are fed thoughts and feeding was done in pre creation era by Highest center of the universe. South magnetons ( south photons ) are different than North magnetons ( north photons ) like two different charges ( positive and negative charges ) . Both are different stimulus . Hence we observe two different opposite effects . But at equator no stimulus working , hence no thought is expressed , no programming formation ( No - Code PcPs ) and finally no effect is seen .

## II. Conclusion

It is believed that north and south magnetic fields or forces which are mediated by photons are same . It is myth . North magnetons are different than south magnetons as we have two different charges like positive charge ( +ve emf ) that proton possess and negative charge ( -ve emf ) that electron possess . When these magnetons interact with matter , they produce effect by generating thoughts . Which are known as Laws of Physics . These laws are Fleming's Left hand rule ( clockwise rotation ) or Fleming's right hand rule ( Anti clock wise rotation ) . Two different programming's ( Code PcPs clockwise rotation or Code PcPs anti clock wise rotation ) are made and when target Basic Building Blocks receive the messages , they work accordingly and we finally observe the effects calling rotational movement of objects either clock wise or anti clock wise . It is conditioned thought stimulation and energy for work done is supplied by the field that trigger the effects .

These are separate thoughts that trigger and control energy input ( magnetic force energy is transformed into mechanical energy for rotational movement or work done )
